EXPERT EXPLAINS GOOD POINTS CONCERNING ETHYL GAS WITH RESULT MOTORISTS ARE PLEASED

We have received a very interesting letter from the Ethyl Gasoline Corporation regarding complaints which have developed on Ethyl gasoline in automobiles, and are quoting below certain portions thereof, states M. C. Harrow, manager of Associated Oil Company:

"In every new territory when we have put Ethyl gasoline on the market the same complaints have developed. For the first few weeks everything that goes wrong on an automobile is blamed on Ethyl gasoline. Having so many complaints, with very few owners telling you of their success with Ethyl gasoline, may cause you to have some doubt as to the action of Ethyl gasoline in automobiles.

During the first few months we began to think there must be some basis for these complaints, though tests on a great number of cars had proved otherwise. It was a known fact that the same trouble, such as burning and sticky valves, had occurred since the early days of automobiles, irrespective of fuel used, and these conditions will probably

continue as long as automobiles are built. In most cases it is possible to find a mechanical condition that causes the trouble.

As you probably know, the color of the carbon in an engine that has been using Ethyl gasoline for a considerable period might be light gray or reddish. Unfortunately when the valves are reddish they have the same appearance as valves that have been burned, and, since very few mechanics on the Pacific coast have seen the inside of an engine that has used Ethyl gasoline for any length of time, they assume that Ethyl gasoline produced a very high heat in the motor, and accordingly blame it for whatever trouble may develop. The fact is that a motor that knocks on straight gasoline runs cooler with Ethyl gasoline than it does with straight gasoline, which is easily proven by the fact that Ethyl gasoline gives more power in a motor that knocks than straight gasoline. By the addition of a small amount of Ethyl fluid to straight gasoline there is no heat added, as the Ethyl fluid, gallon for gallon, contains less heat units than gasoline. As more power is developed by Ethyl gasoline than straight gasoline more heat units are used as useful power and fewer heat units are thrown out as waste heat through the exhaust, cooling system or radiator, which is proved by tests.

All organizations or individuals that gave Ethyl gasoline a fair test had no trouble with it, and are very enthusiastic about its use. Some of these are the various racing drivers, United States government, Dayton Power and Light company and speed boat racers. All of the automobile races sanctioned by the American Automobile Association run since Decoration Day, 1924, were won by a car using Ethyl gasoline as fuel. The United States government has designated Ethyl gasoline as fuel for naval air craft, which includes the dirigible Los Angeles and other lighter than air craft. The Dayton Power and Light company, which also pays a premium of 3 cents more per gallon, have been using Ethyl gasoline continuously since early 1923 in all of their cars and trucks, including everything from a 5 1/2-ton truck to a Ford roadster. In 1923, when they were operating 72 cars, nine mechanics were required to keep 125 pieces of equipment operating. Their cost per ten miles has decreased about 25 per cent, due principally to the use of Ethyl gasoline. While other economies have been introduced, these people attribute the greatest increase in economy to Ethyl gasoline. Though their consumption of gasoline was not decreased materially, they state the major credit for decreased cost of operation with Ethyl gasoline is due to less valve grinding, carbon cleaning and overhauling. Further, the life of their cars has increased about 29 per cent and trucks about 59 per cent, and reports from other commercial users bear out the statements of the Dayton Power and Light company.

Motor boat racers are very enthusiastic about Ethyl gasoline, and Garwood, one of the leading motor boat racers, uses Ethyl gasoline in all races in which he has an entry. Recently at San Diego "Spitfire the Fourth" won the race, using Ethyl gasoline.

We have just completed our investigation of the use of Ethyl gasoline in General Motors' cars in the territory where Ethyl gasoline has been on sale for the longest period, and from reports obtained from 309 or more owners, a large number were on cars that had been driven from 40,000 to 70,000 miles on Ethyl gasoline. Out of the reports obtained there were only five that in any way blamed Ethyl gasoline for any trouble experienced, four of which were due to sticky heater valves in the carburetor, they had the same trouble on straight gasoline. The other instance was that of burning valves, which is not unusual for straight gasoline. On Chevrolet, taking cars that have been using Ethyl gasoline for more than 10,000 miles, the average mileage between valve grindings is between 12,000 and 13,000 miles, which is some record, and probably twice the average on those using straight gasoline. The average on other cars is greater than this."

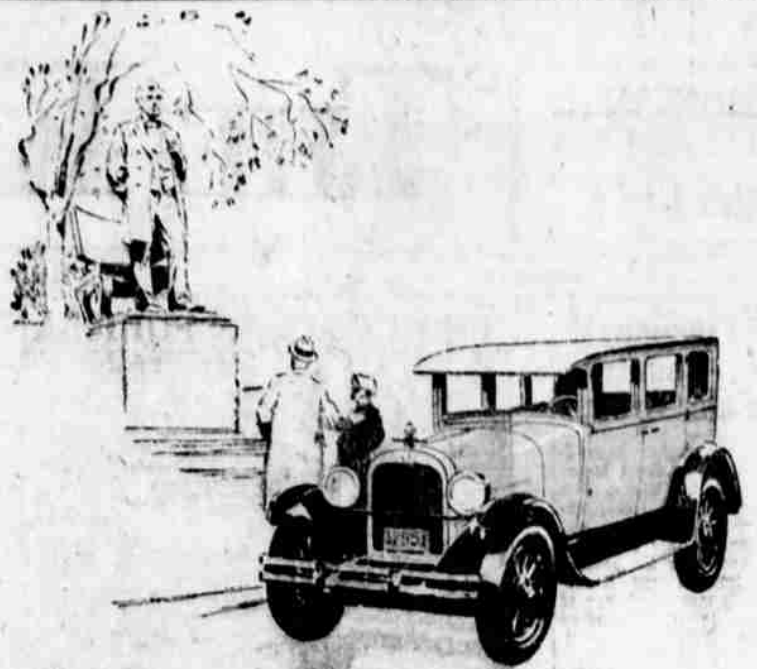

LARGEST MANUFACTURING SCHEDULE IN HISTORY

DETROIT, Mich., Feb. 12.—The Hudson Motor company has entered on the largest manufacturing schedule for February in its entire history, with a daily output of 500 Hudsons and 700 Essex.

Since the introduction of new cars the first of the year, distributors and dealers have been urgent in asking for additional shipments. As cars have gone directly into the hands of retail buyers this demand has increased constantly. As a result, all tentative schedules for production have been sharply advanced.

In January 12,000 Essex cars were shipped. The new Hudson super-sizes went into production February 1. The 500-a-day schedule on Hudsons is the largest in the company's history. Many factory departments have gone on a two-shift-a-day basis. Total 1927 production is estimated at 300,000.

PRODUCT OF GENERAL MOTORS

Dollar Week at "Western Auto"

A week of values even greater than our usual money saving offerings... A week during which some prices have been cut nearly in half, and every article shown represents most unusual economy!!!

"Kay-Bee" Ruby Ray Stop Signal
A \$1.75 stop signal at one dollar! This efficient Kay-Bee warning flasher is visible from long distance. Easily attached. No holes to drill. Complete with bulb, switch, wire and spring for connecting to brake pedal. During our Dollar Week—only \$1.00

Steering Wheel Cover
This soft, elastic rubber cover affords an easy, secure grip on the steering wheel, keeps hands warm in cold weather and cool in summer. Two sizes, for wheels 16 in. and smaller, and 17 in. and larger. Reduced from \$1.45 to just \$1.00

"Klassy" Step Plate
Prevents slipping, saves wear on running board, and scraper keeps mud out of car. Has heavy ribbed rubber center and strong aluminum frame with handy strap slots for fastening bundles. Regularly \$1.45 each. Special at \$1.00

15-Inch Tooter Horn
A snappy looking black enameled horn with a "different" tone. This heavy brass horn is extra size—15 inches long, with flared end, high-grade rubber bulb. Complete with bracket for attaching to any car. A wonder-bargain at our reduced price... Regularly \$1.95. Only \$1.00

Flare Reflector Flashlight
This well-known flashlight is 6 1/2 inches long, with 2-inch flare reflector—durable, fine case and nickel-plated trimmings. Complete with bulb and fresh battery. Regularly \$1.25—on sale at \$1.00

"Neverburn" Ford Transmission Set
A chatterless lining, specially treated to resist wear and heat of Ford transmission system, and to absorb enough oil for perfect lubrication. Set includes three pieces of lining and rivets. Reduced from \$1.45 (for all models) to \$1.00

Neva-Lost Gas Tank Cap
No danger of losing your gas tank cap if you install a Neva-Lost. Hinged top with spring clamp is easily opened and closed. Made of cast brass handily nickelled. Easily attached. Regular price \$1.35—sale price \$1.00

"Redmond" Gas Filter
Your dollar spent for a "Redmond" Gas Filter, besides the saving from our regular price of \$1.75, will prove a tremendous investment in gasoline economy and motor efficiency. Fits all cars, durably made and easily attached. Don't miss this bargain! \$1.00

FREE New Catalog

Be sure to get your copy of our new, complete 128-page catalog. It lists thousands of savings in Tires, Auto Supplies, Camp Goods and Radios.

Bargains for ONE DOLLAR

Ruby Ray Stop Signal

The "Kay-Bee" Regular Price \$1.75

Dandy Spotlight Regular Price \$1.25

Handy Cigar Lighter Regular Price \$1.25
