

Henion to Remain on Pelican Team

Henion, star moundman for the Klamath Pelicans, will remain with the club till the end of the season despite the fact that the club management early last week decided to dispense with his services. With Henion at the bat the Pelicans are confident of the big game today with the Grants Pass Cavemen in the valley city.

Fans, learning of the decision of the management, subscribed a sufficient amount of money to insure a part of the star's salary for the rest of the season, thus relieving some of the financial responsibility of the club management.

The local club will present the same lineup as last Sunday when it walloped the Ashland team.

(Continued from Page One) northward from southern Oregon.

Salem, July 23. (AP)—Heat records in Salem for all time were shattered here today when the official government thermometer registered 103, eight degrees higher than the mark of 100 set yesterday. The hottest previous day since the weather bureau was established here 35 years ago was August 12, 1920, when a temperature of 105 degrees was recorded. A light rain began falling here this evening, accompanied by violent lightning and thunder, quickly cooling the atmosphere.

Spokane, July 23. (AP)—Today was the hottest day of the year in Spokane, the mercury reaching a maximum of 97.5 at 4:10 p. m. according to reading at the United States weather bureau. This is 2.8 degrees higher than yesterday's maximum of 95 degrees.

Medford, July 23. (AP)—The mercury registered 102 in this city this afternoon and was followed by a cooling summer shower.

Eugene, July 23. (AP)—Eugene had prospects for a rainy Sunday tonight after a torrid day during which the mercury climbed to the 97-degree mark, a new record for 1927. A thunder storm broke at six o'clock tonight and rain began to fall.

Pendleton, July 23. (AP)—A new heat record for the summer was established here yesterday, the mercury hitting a maximum of 101 degrees, according to the official thermometer.

Roseburg, July 23. (AP)—Higher temperatures and lowered humidity are increasing forest fire hazards, it was stated here today, as warnings were issued by forest protection organizations, to week-end campers. Yesterday's temperature was 92 degrees and appearances today were that the maximum today would be at least as high.

Grants Pass, July 23. (AP)—Mercury was rising here today and indications are that the high point of 101 degrees reached yesterday may be passed this afternoon. Yesterday was the hottest day of the present season, the temperature being four degrees higher than any previous day.
