C. of C. Opposed To Plan for Cut In License Fees

The proposed plan of reducing the Oregon auto license fee to three dollars was discussed at the board of directors meeting at the chamber of commerce yesterday and it was agreed that since the present plan finances Oregon highways it should not be altered.

If the license fee is reduced other property would have to be more heavily taxed, and the proposed reduction might result in stopping all present highway construction so vital to the development of Klamath county, it was pointed out. There are several important highways being constructed in the state and anything to hinder this would be a great drawback, directors felt.
