LET US LOOK TO OUR TREES

What is scenery? The dictionary states that it is the general aspect of a landscape. What a panorama flashes through the thought! Lakes set among high wooded hills under a clear blue sky. The sea white-crested under scudding clouds. The turn in the road exposing a humble, thatched cottage with its neat hedge and old-fashioned flowers, or a winding drive under an avenue of arched trees.

How is it that Europe has such old and stately trees in the grounds of estates? They have been there for generations, have received care and attention that remain and delight the eye of the traveler.

Living in a house one naturally keeps up the repairs, keeps the house and lawn in fine condition. But the trees? Maybe they are sprayed once in a while, and occasionally pruned. It is true, as some say, that these same trees would perhaps take care of themselves if in their natural surroundings; but they often have a difficult time when roadways are cut or paving is laid, both of which affect very seriously the root system, or when leaves are swept continuously off the ground. Those leaves, rotted by the action of time, are the natural way of giving back to the tree the nourishment that it requires annually. But often when the leaves are removed, no fertilizer is given the trees in their place. This is a typical instance of the shortsightedness of many tree owners.

Trees should be examined yearly and the periods of decay checked by having any existing holes cut out. Limbs having V-shaped notches which might split during a severe storm, should be bolted or cabled. Trees suffering from lack of nourishment should be properly fed.

Even the humblest home can have a portion of the yearly budget set aside for the care of its trees which so enrich the natural beauty of the landscape.

Any country has its beauty spots, but it lies within the power of every home owner to help make his own country more beautiful. Communities can show interest in roadside planting. Think of the charm and joy of picturesque tree-shaded lanes and country roads! Hand in hand with the planting of streets, roadsides and parks, can go an appropriation for the maintenance of healthy tree growth which can only be successfully accomplished by tree experts. Let us look to our trees!
