

To Make Planes At Rankin Field

PORTLAND, Ore., Oct. 20. (AP)—Construction of new wing monoplane at a rate of six a day will be started by Rankin system, Inc., at a factory to be erected near Portland about the first of the year. J. Megerreis, president, announced today. Original investment in the project will be about \$175,000. The site for the plant, not yet selected, will be in the Willamette valley near Portland. About 200 acres will be required for factory and test field.

Designers of the plane are Lieutenant B. B. Smith, engineer for the company, and Professor Alexander Klemm of the Guggenheim school of Aeronautics. The type is similar to that of the trans-Atlantic plane Bremen. Two models, two and three-place, will be built. One will be 40 horsepower and the other 30.

DEATH CLAIMS JOHN JOHNSON

John Willis Johnson died at 10:30 Saturday night from heart complications following a long illness. He was at the home of his mother, Mrs. Etta Alexander, in Altamont Acres when death came.

The deceased was born in Klamath Falls, Oregon, October 11, 1853, and was 42 years and 3 days of age at the time of his death. He had been ailing for some time, and recently returned from Marshfield in the hope that he would recover. He was a lumber grader by trade.

The remains are at the Tower Mortuary, and funeral arrangements will be announced upon the arrival of relatives.

Both will be especially designed for training and sport use. One hundred men will be employed at the start. Capacity production will require about 200.

Hoover to Talk In New York City

(Continued From Page One)

In his conference with leaders, Hoover will devote considerable attention to upstate New York. The republican strongholds are there and in the rural districts. The problem is to get out the vote. Upstate New York seldom casts over 75 per cent of its registered vote, while New York City usually polls about 98 per cent of its registered vote.

Smith's strength is in New York City. Unless upstate leaders get out their vote, Hoover, it appears, will have a hard road. The city has less than 40 per cent of the total registered vote of the state, but active workers get nearly all of it out.

Republicans Optimistic

On the basis of last performance, a republican presidential candidate, under normal conditions, has the edge in New York. Except in the Taft-Roosevelt split in 1912, the republican presidential candidate has carried the state every election since 1875.

But in Smith, republicans face a different factor. The New York governor carried his state four times and ran far ahead of both Cox and Davis, democratic presidential candidates in 1926 and 1924. His only defeat was in the Harding landslide in 1920, but Harding's majority was over a million, while Smith ran 530,000 votes ahead of Cox.

Republicans get comfort from the 1924 results, when Coolidge's total was 192,000 more than the total vote for Smith. They also depend upon the women's votes. They have received their largest majority in presidential elections in which women have voted and the woman registration has increased this year.

Tunnel to Fight \$500,000 Oil Fire

In a desperate attempt to halt a spectacular oil well fire at Santa Fe Springs, Calif., engineers devised the tunnel pictured below. The tunnel was drilled on after the damage had amounted to more than \$500,000 and there seemed no way of quenching the flames. Through the tunnel the tremendous gas pressure within was to be tapped, while simultaneously tons of mud were to be dumped into the mouth of the well.

Daniels Speaks For Alfred Smith

NASHVILLE, Tenn., Oct. 20. (AP)—Josephus Daniels, delivering two addresses here yesterday in support of the democratic standard bearer, Governor Smith, warned southern democrats to remember that "thou shalt not steal" is a greater commandment than thou shalt not booze.

The former secretary of the navy declared that republican cabinet members had "enthroned" privilege in the place of equality. The republican party, he added, is a foe of the south.

Speaking of the republican organization in the south, Mr. Daniels said, "even honest republicans know their party exists only in the south so delegates to the national convention can be purchased."

SAVE

We Practice What We Preach

FOR many years we have urged the people of Klamath Falls to save a part of their income regularly. We like to have them do their savings here, and offer them safely, compound interest and a helpful service.

We believe in saving, and practice it ourselves. You will notice in our statement the item, Surplus and Undivided Profits \$108,020.98. This represents money saved out of profits and re-invested for the benefit of our stockholders and protection of our depositors. It is the bank's savings account.

We'd like to have yours.

Ohio State Beats Michigan 19 to 7

OHIO STADIUM, COLUMBUS, O., Oct. 20. (AP)—Ohio state made up for a lot of lean years today by defeating Michigan 19 to 7 for the first time since 1921. The Buckeyes outplayed the Wolverines throughout, making 13 first downs to one for Michigan.

The visitors could do nothing with the powerful Ohio state line and while Michigan's forwards also played a hard game, charging with energy and speed, the passing attack of the winners was too much of a puzzle for the men from Ann Arbor.

CHURCHES

- First Church of Christ, Scientist**
Tenth and Washington

Now We Can Show You the NEW McCormick-Deering Cream Separator

CAPACITIES:
350 to 1500 lbs. of milk per hour

Hand, Belted, or Electric

Ball-Bearings at all High-Speed Points

YOU may have seen the Harvester Company's announcement of their New McCormick-Deering Cream Separators. We now have the first of them in our store.

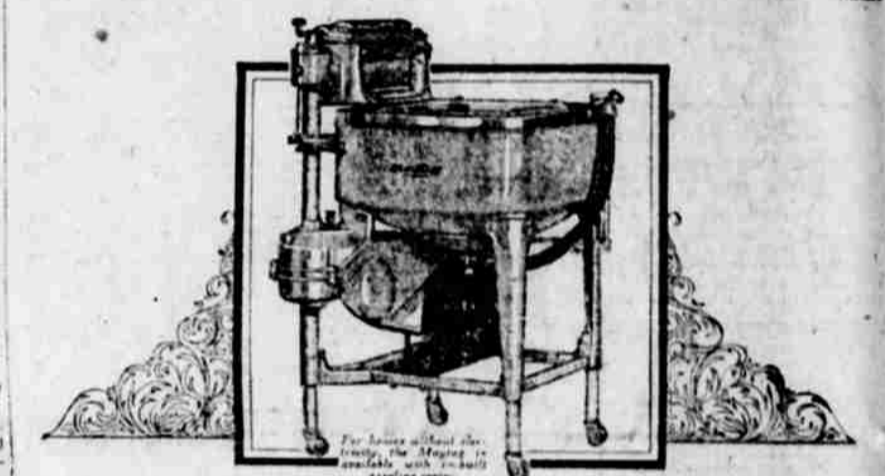

The New McCormick-Deering has many remarkable improvements. The machine now has high-grade ball-bearing equipment at all high-speed points. Its operation is the last word in light-running ease and durability.

A completely new bowl of skillful design, with a skim-walk-regulating screw controlling the cream density, combines with other features to produce what we believe to be the cleanest-skimming machine on the market. Splash lubrication that completely lubricates. A supply can with outside faucet. Every provision for sanitation and easy cleaning.

The six sizes of the New McCormick-Deering fit every need—"from one cow to a hundred." You are bound to like this new machine. We will demonstrate here or on your farm with no obligation to you.

VICTORIOUS

in Every Test and Fulfilling Every Promise the NEW Maytag observes Its First Anniversary

ONE year ago, I announced the New Maytag as our latest and greatest achievement. Noteworthy refinements and striking improvements, including a new method of soap and water removal, were incorporated in the new washer. It set standards of convenience and washing efficiency that had never been known before.

During the year that has passed, hundreds of thousands of NEW Maytags have been introduced into as many homes, and each time subject to the famous Maytag trial basis: "If it doesn't sell itself, don't keep it." Rigorous, exacting washday tests assailed the New Maytag, and it has emerged victorious to a degree exceeding my highest expectations.
