BIBLE SELECTION AND PRAYER

January 13, 1929. REJOICING IN LOVE—Rejoice ye with Jerusalem, and be glad with her, all ye that love her: rejoice for joy with her, all ye that mourn for her.—Isaiah 65:19. PRAYER—"Giver of immortal gladness, fill us with the light of day."

40,000 MILLIONAIRES

If you have been having doubts as to the real, enduring achievements of our country during the last dozen years, you may lay them to rest forever now. The country has nearly 40,000 millionaires!

This is on the word of Carl Snyder of the Federal Reserve Bank of New York, who recently addressed the American Statistical Association in Chicago.

In 1914, says Mr. Snyder, America had approximately 7000 millionaires. The number has grown to more than five times its original size since then, and is still going up. Much of the increase is attributed to the war; much more to the recent stock market boom.

We may have our problems. Some industries may be stagnant. Textile workers may be underpaid, coal miners may be starving, the power trust may be propagandizing our schools and the farmers may be in despair—but we have 40,000 millionaires, anyway. Doesn't that encourage you?

TO PRESERVE NIAGARA

It is encouraging to read that Canada and the United States have reached an agreement for the construction of remedial works to prevent the destruction of Niagara Falls' great natural beauty.

At certain points the falls have been eroding the rocks so fast that the entire contour of the cataract threatened to change. Goat Island, in midstream, was in danger of being left high and dry, with the American falls disappearing altogether.

Now submerged weirs and jetties are to be built above the falls to deflect the flow of the water so that the falls can be perpetuated as they are now. It is good news for citizens of both nations.

Chairman: A sucker who is willing to do all the work in return for a little imaginary honor.

Awful thought. Planes flying far inland during the next war can drop cooties on noncombatants.

Two Kinds of Laws From the Track to the Street N. Y.'s Road in the Air An Octopus Fight

Copyright, 1929, by the Star Company

MR. HOOVER, it is said, will take up prohibition in his own way, not controlled by wets or drys. That's the right plan. He was elected president, not the wets or drys.

IT IS added that Mr. Hoover has investigated "control in other countries." Other countries legislate on the drink question, making laws to suit the people rather than trying to remake the people to suit a law.

AMONG intelligent nations of Europe it is made difficult and costly to get whiskey and the other alcoholic poisons, comparatively easy and inexpensive to get beer and wine and the less harmful stimulants, that men have drunk temperately for centuries.

THE "TIPSTER" moves from the race track to Wall street. You can buy tips on what stocks will do, based on mysterious information.

THESE TIPS do not come from the "feed box." But tipsters assure you they get information from the man that waits on C. E. Mitchell, president of the National City bank, in his private dining room in the bank building, or from the man that waits on Otto H. Kahn or Mortimer Schiff at Kuhn, Loeb & Company, in their private dining rooms.

FOOLS actually buy the tips. NEW YORK CITY after much discussion, has appropriated the money to build an elevated highway down the west side of the city, to cost more than \$15,000,000. It will remove thousands of cars morning and evening from congested districts. That step other cities eventually must take while waiting to double-deck their streets, which also must come. The old fashioned city will fade.

JOHN D. ROCKEFELLER, Jr., has begun a fight to put Colonel Robert W. Stewart out of Standard Oil company of Indiana. Mr. Rockefeller doesn't approve Mr. Stewart's action in connection with a quickly improvised Canadian oil company, and asks stockholders for their proxies.

THIS FIGHT, inside one of the little Standard Oil octopuses will be interesting. It is the first fight in which the Rockefeller family has appeared in some time. They have had many in the past, and usually won them.

DR. E. L. RICHARDS, of Johns Hopkins, says "40 per cent of all persons that visit doctors at hospitals have nothing wrong with them."

Their trouble is in their imagination. MIND controls the body, and the mind is imagination. The power of various "faith cures" that relieve so many "stak" is due to the fact that so many of the "stak" are not really sick at all.

RELIGION with sufficient power to control their imaginations persuades them that they are not sick, and so they are well. But no faith cure will cure you if there is anything really the matter with you.

It won't cure a broken leg, an aching tooth or a cancer, nor's the pity. MR. LUCKY, the old Northampton cobbler, who knew President Coolidge when a boy, is supposed to have given little Calvin this advice: "Keep your shoes faced tight, and never let your tongue wag."

President Coolidge took that good advice about the tongue. There is no information as to the advice concerning shoes.

IT IS harmful to face children's shoes too tight. Lacing tightly around the ankles, pressing on blood vessels, impeding the flow of blood, gives the heart more work to do. Cobbler's hearts was only half right.

SOME JUGO-SLAVS are annoyed, that their King Alexander should declare himself an absolute monarch, promising to kill anybody that questions his autocracy.

Very intelligently the king promises death or twenty years in jail to any newspaper writer offering serious objections to his plan. Absolute monarchs and a free press don't go well together.

Excitement following the war and all the talk about "self determination" created separate kingdoms that might more wisely have been left in control of others.

Nations fit to survive, do survive, without outside help. THOSE governed by the self-announced autocrat, Alexander, include Dalmatians, Serbians, Croatians, Slovenes, Bosnians, Montenegrins, Herzegovinians, and others. To manufacture a homogeneous working government machine out of that combination is not easy, even with a hangman and autocracy to help.

THE FISHER BROTHERS, who began building automobile bodies in a small way, not long ago, now run many things and have been invited to form a combine to control practically all the world's production of whiskey.

THE IDEA started in Canada. A combination of British and Canadian concerns, would doubtless make some gentlemen very rich. It would not, however, affect the whiskey business of the United States, its tens of thousands of secret stills, tens of thousands of "speak easies" at least, 26,000 of them in New York city alone. They make their own, and heaven help the drinkers of it.
