The rare "taste" of Hills Bros Coffee is never the result of luck...it is the result of roasting evenly...continuously...

a little at a time

NO ONE can drink Hills Bros. Coffee without realizing that it has a flavor no other coffee has.

Controlled Roasting—Hills Bros.' patented, continuous process—is the reason for this delicious difference. Every berry is "done to a turn" by this process that roasts only a few pounds at a time, and possesses the utmost in uniform flavor and fragrant aroma. Such perfection cannot be achieved in bulk-roasted coffee.

Whenever or wherever you buy Hills Bros. Coffee, it is always fresh. Air, which destroys the flavor of coffee,

is taken out and kept out of the vacuum can in which Hills Bros. Coffee is packed. Ordinary cans, even if airtight, do not keep coffee fresh.

Ask for Hills Bros. Coffee by name and look for the Arab—the trade-mark—on the can. Sold by grocers everywhere.

No can of Hills Bros. Coffee will ever "go stale." The vacuum can keeps it FRESH ALWAYS!
