Vol. 8, No. 199—Price Five Cents

KLAMATH FALLS, ORE., FRIDAY, JUNE 2, 1933

(Every Morning Except Monday)

Editorials - on the - Day's News

By FRANK JENKINS THE NET bonded indebtedness of Klamath county on January 1, according to figures assembled the other day by Assessor Lee, was \$1,364,966—net bonded indebtedness meaning total debt less sinking fund.

The interest on these bonds to the time of maturity will be \$629,855. That is to say, the interest REMAINING TO BE PAID amounts to about half as much as the remaining principal.

WE VOTED these bonds, ourselves. We voted them to pay for things we wanted. The things they paid for are mighty nice, and we would find it hard to do without them.

BUT HERE is something to remember in the FUTURE, when we want things: Bonds draw interest, and interest mounts up exceedingly fast. When we get around again to wanting things, we shall be very, very wise if we follow the policy of PAYING AS WE GO.

Will Rogers Says: Santa Monica, June 1.—Editor The Klamath News: There is nothing more gratifying than to have been away and get back and get a hold of some home town paper.

It's like meeting an old friend and having a glass of three times two with him. Knowing I had been to the Morgan investigation, everybody asked me on the way out: "What's it going to lead to, and will it do any good?" Yes, it's going to be very educational. It's going to show us just how "big business" got big. It got big according to law. But not according to Hoyle.
