"I don't know how they build it, all I know is I can't HURT it!" That's TERRAPLANING! Because we've said so much about the ruggedness of the Essex Terraplane, its owners "give it the works." They try to hurt it. They would never ask any other car even to attempt the things they make it do. And it never lets them down. Skeptical? Ask any Terraplane owner. Tell him you want to know. He'll answer you the way one of them recently answered just such a question. He said, "Everything the Hudson Motor Car Company has said about the Terraplane is true. It out-climbs and out-accelerates every other car I've ever seen or driven. It costs me less for gas and oil and tires. I've driven my Terraplane twenty-nine thousand miles over the worst kind of roads, and it hasn't cost me a cent for repairs. I don't know how they build it—all I know is, I can't hurt it." Before you buy any car, go TERRAPLANING! "DID it! And a lot you never mentioned. Every mountain in high gear. The best gas-mileage I've ever had with any car. And 400 miles a day without tiring us. This Terraplane is a CAR!"
