ROBBER'S WEAPON BELIEVED FOUND

An automatic revolver, believed to have been used by a lone bandit who held up the attendant of the Crater Lake service station at Prospect and Upam streets Thursday night, was found Saturday morning and turned over to the police department.

Bruce Staub, employee of the Big Basin Lumber company, discovered two small boys playing with the loaded gun, pulling at it and staring down the barrel. He took it from them and reported it to police bureau. One of the youngsters, Daniel Irwin, 9, of Frazier court apartments, said that he had found the revolver in the weeds near a telephone pole on the corner of Shasta and Mitchell streets.

There were no fingerprints except those of the children found upon the gun. The firearm was believed to have been stolen June 22 by the service station robber, from the McKinnon and Shannon service station at Sixth and Division streets.

The gunman who held up the Crater Lake ranch home of Mrs. Rosa McCormack, Mrs. William Weston acted as co-hostess, and Mrs. Mary McClure

A MESSAGE TO ALL FORD WORKERS

You and I together are credited with having created "mass production." We use it to make more things in less time at lower cost. By it the people have more and better goods at cheaper prices. Workmen earn higher wages with less strain—not less work. The level of American family comfort has been visibly elevated.

Industry never harms a country: harm comes from elsewhere. But industry bears the brunt of it. After the slump came, we increased our \$6 minimum wage to \$7 a day, which continued for 22 months. Today our wage rate is the highest in our line. But industry still suffers for something else did not cause. Between making and using things, something outside industry has stepped in to prevent the maker from making and the user from using.

We pioneered the 8-hour day, the 5-day week, a minimum wage that has always exceeded the market rate. Relations between employees and the Company have always stood on a just and human basis. We are as interested in social progress, and possess as sensitive a social conscience as any reformer whose theories have never met the test of a pay-roll. We pay for doing what we think is right. And we achieved these industrial decencies not by regulation or compulsion, but by being free of financial control and "gentlemen's agreements"—free to do what we saw was right and necessary.

We have no fears of what is ahead. We can make good motor cars under any just system. I think industry will spread out. Big factories, crowded industrial centers, will dissolve. Instead we shall have workshops in village and country. Nearness to the land will prevent the worst shocks of economic change. The benefits of "mass production" can be retained without the evils of massed industrial crowding. That is the next step.

You and I are able to take this next step because of what we learned in taking the present one.
