STATE CHECKS CATTLE HERDS FOR DISEASE

CATTLE ACTIVE ON FRISCO'S MARKET

The greatest menace to Oregon's cattle industry is the infectious abortion disease, according to Dr. W. H. Lytle, director of the animal industries division state department of agriculture.

Tests made by veterinarians show that an average of 9.8 per cent of cattle in the state are afflicted by the disease, though in Grant county, where it is most prevalent, 36.3 per cent of the cattle tested last year were affected.

Of 140,367 cattle tested in Oregon in 1932, reactors were 7,389.

Tuberculosis Reduced. Tuberculosis has been nearly stamped out in Oregon, the agricultural department reported. Percentage of cattle reacting to tuberculosis was only .34.

There is no effective cure for either infectious abortion or tuberculosis, other than slaughter of affected animals to prevent spread of the disease. Presence of abortion does not impair value for beef cattle, but prevents reproduction. Carcasses of tubercular cattle are unfit for food.

County second to Grant in prevalence of infectious abortion was Lake, where 31.4 per cent of the cattle were affected. Twenty per cent of Malheur county cattle had the disease.

Klamath Listed. Other counties included Baker, 9.3; Benton, 5.08; Clackamas, 1.78; Clatsop, 2.1; Coos, 4.07; Curry, 1.1; Deschutes, 11.5; Jackson, 3.4; Klamath, 12.1; Lane, 5.5; Linn, 6.59; Marion, 6.6; Multnomah, 12.6; Wasco, 6.

No reaction to tests were found in Gilliam or Sherman counties. In Douglas county percentage was only .59. No tests were made in Harney or Wheeler counties.

Gilliam county, with 4.33 per cent, showed the greatest reaction.

BUYING ORDERS BOOST CHICAGO RYE QUOTATION

CHICAGO, Aug. 22. (AP)—Rye earned the spotlight in the grain markets today with an advance of five cents a bushel, the maximum permitted in one day. Buying orders, especially from Mills and elevators, boosted rye.

All other grains were carried a little higher in sympathy with rye after spending most of the day in the doldrums. Erratic fluctuations, such as characterized yesterday's trading, were absent, and traders said the markets were beginning to reflect the laws of supply and demand. Crop comments were generally unfavorable and trading was sluggish.

Wheat closed firmer and 3c to 1 1/2c higher than yesterday's finish; corn was easy, 3c to 1c lower; oats 1c to 1/2c higher; rye, 4c to 1 1/2c advance.
