

Pictorial Highlights of Events in News of Day

Grandpa MacDonald Meets a Relative

Some day she may see this picture and be thrilled at the thought of having been cradled in the arms of Great Britain's Prime Minister. But when the picture was taken of Ramsay MacDonald and his tiny granddaughter, at Leeds, England, she didn't seem to be the least impressed. She is the child of Dr. Alastair MacKinnon and Mrs. MacKinnon, and this was the Premier's first glimpse of the diminutive miss.

STANDARD LISTS HIGHWAYS TO CHICAGO

Going to the Chicago Century of Progress Exposition or to such other points of interest as Glacier, Mesa Verde, Rocky Mountain, Yellowstone National Parks, the Grand Canyon or Pike's Peak near Colorado Springs in Colorado by motor car this year? If you are, this map prepared by the Standard Oil Company of California shows the principal routes as well as road conditions.

There are very few stretches of highway between the Pacific Coast and Chicago where road construction work is under way and only two detours, one on the Yellowstone Trail west of Fargo, North Dakota, and the other east of Vinita, between Joplin and Tulsa. The remainder of the way is either pavement, macadam, oiled gravel or gravel.

Philadelphia Convicts Beat Warden

A riotous demonstration against prison conditions at Philadelphia's old Eastern penitentiary was staged by more than 1500 convicts when, screaming curses, they flung burning mattresses in the cell corridors and beat Warden Herbert Smith. Warden Smith, with patches on his face, is pictured with Captain Thomas F. Martin after riotous and state and city police had quelled the riot.

They'll Try for New Endurance Mark

They're going up in the air for an extended stay, and Viola Gentry (left) and Mary Samson declare they won't land again until they've captured the world endurance flight record for women. Their plane, the Outdoor Girl, is being conditioned at Floyd Bennett Field, N. Y., for a take-off early in October. The present record of eight days and four hours is held by Frances Marzallis and Louise Thaden.

Blue Eagle Bride

A charming addition to the NRA family in Washington is Mrs. John Whitley Power (above), beautiful bride of the assistant deputy NRA administrator. She is the former Miss Mary Martha Stuart of California and New York.

Series Front From Air as War Begins

Surrounded by tall buildings and railroad tracks, the Giants and the Senators open the world series at the Polo Grounds. The photo shows the battleground set down in one corner of New York as seen from the air.

Kills Friend in Hold-Up Fight

Joseph G. Gregorovic, 18, of New York, had a few schemes to cover up the problem of \$5 which he borrowed from his father's grocery charge account. He would have his best friend, Louis Zelenka, wound him in a fake hold-up and thus bring him sympathy instead of scorn. Louis Zelenka shot. The bullet drilled Joe's chest and killed him. And here Zelenka, captor, tells his story to Detective Against Crime.

Pennsylvania Ford Workers Strike

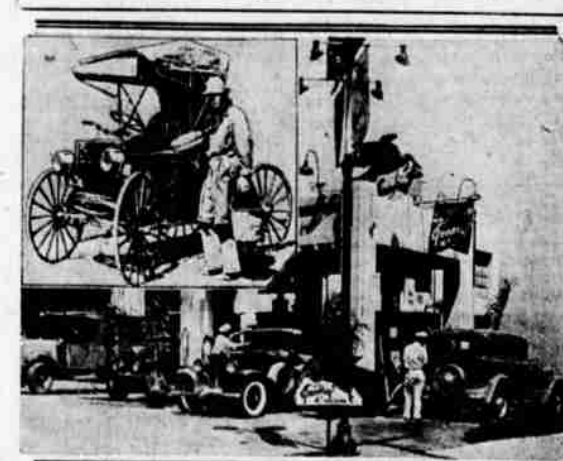

In protest against the shortening of the work week which reduced their minimum weekly wage to \$16, more than 3,000 employees of the Ford Motor Company assembly plant at Chester, Pa., laid down their tools and marched out before the eyes of their surprised employers. Here a group of strikers is shown after the walkout.

Disaster Area

This map shows how the hurricane which killed hundreds approached the Mexican port of Tampico. Flood waters of the Panuco river increased the death toll.

Service Progress Portrayed

The younger generation doesn't remember the grand-daddy of our present automobile pictured in the upper left-hand corner. General Petroleum corporation uses it here to form a striking comparison with the cars, service and gasoline in vogue today. The ancient model shown is of the vintage of 1902.

Modern Methods Aid Motorists

Those who think today's automobile is a far jump compared with the car of 30 years ago, should stop and consider the contrast of automobile service and of gasoline in the same period. A picture recently was submitted to General Petroleum corp. of a 1902 model automobile being approached in those days of long ago. Compared with the dapper service station attendant of today, the man who serviced a car in 1902 merely pulled a linen duster over his greasy clothes, caught up a five-gallon bucket, drew the gasoline out of a barrel and poured it into the tank of the car through a funnel. Sometimes the car ran—sometimes it didn't.

To contrast this, the above picture shows a modern General Petroleum service station such as now is dispensing that company's new General Four-Star gasoline all over the Pacific coast. The comparison was engineered by M. D. Leh, Oregon division manager for General Petroleum.

"The difference in gasoline now and in 1902 is as marked as the changes which have been made in automobiles and service stations over the past 30 years," Leh said. "The new General Four-Star gasoline, for instance, will not only do things unheard of in the early 1900s but the gasoline used at that time would hardly be recognized as a fuel for the modern motor."

"It is only because of the tremendous progress achieved in the scientific refining of gasoline that the modern high compression motor has been made possible."

Facing Noose

Louis S. Douglas, convicted at Yuma, Ariz., of murdering a prospector. He now waits death sentence.

Heads Brewers

Master Brewers' Association of America, in convention at Chicago, named Frank P. Von De Westlake, above, of Chicago, as president.

Plan Food and Clothing Aid for Nation's Needy

How to feed and clothe the needy from the country's food and cotton surplus was the problem confronting these fiscal and agricultural experts when, as shown here, they met at the Department of Agriculture in Washington. Left to right: Chester C. Davis, director of the production division of the Agricultural Adjustment Administration; Major Robert M. Littlejohn, fiscal expert of the Army's general staff and General William I. Westervelt, director of the processing and marketing division.

BEGINNING OF VOYAGE TO END OF THE EARTH

Her hold bulging with scientific equipment, the 59-year-old sealer The Bear of Oakland, supply ship of Admiral Richard E. Byrd's South Polar expedition, pulls out of fog-bound Boston harbor on the first leg of her long voyage to Little America. Commander of the ship is Captain R. A. F. English of the United States Navy, shown in inset.
