In talking with you about its cars, the Hudson Motor Car Company tries pretty hard to make only statements that can be easily proved by anybody.

So, when we say, "The Terraplane Eight is the fastest and most powerful car in its price-range," you can not only have confidence in the truth of the statement—you can easily prove it.

The Terraplane Eight's engine is rated at 94 horsepower in all official lists of motor car specifications—the two next highest ratings in its price-range are 82 and 77 horsepower.

The New De Luxe TERRAPLANES with **RADIO** as Standard Equipment are now on Display

The Terraplane Eight's top speed of 85 miles an hour has been proved under official supervision of the American Automobile Association.

THE EIGHT

AND UP

The Terraplane Eight's ability to out-climb and out-accelerate any car on the road, regardless of price, is provable, not only by 32 official A.A.A. records, but by yourself, any time.

The greater roominess of the Terraplane Eight is measurable—a simple dressmaker's tape is all you need to prove it.

We are glad to have built such a car. We think you'll be glad and proud to own it.

what makes a cigarette taste better

WHAT makes anything taste better? It's what is in it that makes a thing taste better.

CHESTERFIELDS taste better because we buy ripe tobaccos. These ripe tobaccos are aged two and a half years—thirty months. During this time the tobaccos improve—just like wine improves by ageing.

CHESTERFIELDS taste better because they have the right kind of home-grown tobaccos and Turkish Tobaccos "welded together."

We hope this answers your question.
