 the people of another nation in an orderly manner, using the facilities of their government for the transaction of their business. It DOESN'T mean putting the stamp of approval on the institutions of the recognized nation.
 THE state of Louisiana, for example, countenances certain practices which we of Oregon don't approve—practical peonage of labor, among others, and disfranchisement of a considerable part of the population. But that doesn't prevent us from doing business with the people of Louisiana when we have something they want to buy or they have something which we want to buy. Nor does it prevent us from using the courts for the orderly settlement of such disputes as may arise in the transaction of business.
 SOVIET RUSSIA countenances many things of which we don't approve, but that is no reason why we shouldn't do business with Russia, if we can, nor is it any reason why we shouldn't take advantage of all the facilities of our government in the orderly transaction of the business we do. That is all recognition of one nation by another amounts to.

NRA CHIEF SEEKS RIGID COMPLIANCE

WASHINGTON, Nov. 15. (AP)—Hugh R. Johnson took to President Roosevelt today a report that compliance with codes and the blue eagle reemployment agreement is not working successfully and means must be taken quickly to secure more thorough enforcement.
 This conclusion was reached by the NRA administrator on his ten-day swing around the midwest, which he said today he considered highly successful from every point of view.
 Johnson's Plans Formed.
 At virtually every city where he spoke, he obtained reports on conditions. The overwhelming consensus was that non-enforcement stood as the greatest immediate hazard to NRA's part of the recovery program.
 The administrator appeared to have a clearly defined idea of how the situation should be handled, but he did not make his intentions public.
 He has decided to hold a new hearing on the construction code, which has caused extensive controversy.
 Johnson went to the White House for luncheon with the president with the intention of giving him a comprehensive report and also to offer his opinion on problems which have developed during his absence, notably the decision of Comptroller General J. R. McCarty that Henry Ford is eligible for government contracts despite the fact his signature was not affixed to the automobile code.

Taxes And Penalties

AN investigation indicates that Oregon's cancellation of tax delinquency penalties has been a factor in the difficulty of disposing of veterans' state aid bonds in the east. The state's credit appears to be suffering under the policy of making it easy to let taxes go delinquent.
 While this policy may have been justified and helpful in the period of great economic stress, it appears that the time is at hand to make some careful readjustments. We say careful, because the imposition of too severe penalties, resulting in the confiscation of much property, would be no wiser than the elimination of penalties.
 What the state wants is to keep property on the tax rolls and to keep it paying taxes. This calls for a moderate increase in the interest rate, which at present is eight per cent, the going rate of commercial interest. Perhaps 10 per cent would be the place to stop. In 1927 and 1929, the rate was 12 per cent. A small percentage penalty for delinquency and a discount for payment on time are other proposals deserving consideration.
 The moral obligation to pay taxes has not weighed very heavily in the past few years. One factor in this has been a breakdown in the confidence in state and local governments. A feeling that those in power were spending extravagantly and foolishly while there was private economic stress everywhere, didn't stimulate the payment of taxes. Getting back to fundamentals, however, it must be admitted that the thing for the good citizen to do under such circumstances is to get the extravagant spender out of office, instead of damaging public credit by refusing to pay taxes.
 The analogy between taxes and lodge fees is a good one. If you want the benefit of your lodge membership, you have to keep paying your fees. The lodge member is willing to do that, and the citizen who enjoys the benefits of government and an orderly society ought likewise to be willing to make his small contribution to their support.

Beauty Hints

The outstanding beauties in America grow older every year, of course. But their complexion does not. Which proves that it is possible for a middle-aged woman to have skin as soft and lovely as that of a 19-year-old college girl.
 There is no use in saying that it is inevitable that your skin will become dry and rough and wrinkled once you have passed the forty mark. Your skin at that age can be smooth and beautiful if you will just take the time to give it a little deserved attention.
 The time to begin is when you're young. Get into the habit of a daily beauty routine and the chances are that you'll have no cause for worry later on. However, if you have neglected your skin, there still is time to do something about it.
 Every woman over thirty needs a nourishing cream. Call it tissue cream or anything else that you wish but be sure that it is composed of oils and not of animal fats. When your face has been given its nightly cleansing, smooth on a little nourishing cream and leave it on all night. It puts back the oils which the years tend to take out of your complexion.
 A foundation cream is another necessity. There are grand liquid ones and also cream varieties. If you prefer. But do get one and put it on before you touch your face with either powder or rouge. It keeps the skin moist and soft and protects it from wind and dust.

FUND APPROPRIATED FOR OCEAN LANDING

WASHINGTON, Nov. 15. (AP)—Secretary Roper said today the public works administration had allotted \$1,500,000 for building a seadrome, a quarter the regular size, 500 miles off the Atlantic coast for experimental purposes.
 If the experiment succeeds, Roper said full sized seadromes, 1,250 feet long, would be placed at 500 mile intervals across the ocean to Europe.
 Roper estimated about four months would be required to build the demonstration section. The entire airway would cost \$30,000,000 and about 50 per cent of the total would go for labor, employing 10,000 men for two years.
 The development is also dependent upon the approval of the state department, he said, adding this was expected momentarily.

Trusty Re-Taken At Canyon City

WALLA WALLA, Wash., Nov. 15. EXCHANGE DECLINES AS DOLLAR SLUMPS

FINANCIER DENIES HUGE STOCK DEAL

WASHINGTON, Nov. 15. (AP)—Bertram Cutler, Rockefeller financial adviser, denied to senate investigators today he had arranged to "take care of" William S. Fitzpatrick, president of the Prairie Oil company who received \$300,000 from the \$12,000,000 Sinclair oil pool in 1929.
 Earlier, Fitzpatrick testified he had received \$449,000, including the \$300,000, as the result of arrangements the Rockefellers had made to compensate him for his long service to the Prairie company. He said his negotiations had been through Cutler.
 Cutler flatly denied he had arranged with Blair and company, New York bankers, to share with Fitzpatrick its profits on purchase of stock from the Rockefellers.

Hands Out For Teachers

CHICAGO'S school teachers haven't been paid in heaven knows when, but at least they aren't going to starve this winter. The Illinois Emergency Relief Commission has announced that it will provide them with food, fuel and clothing throughout the winter, accepting salary assignments in payment.
 Right here there is an ironic commentary on the breakdown of our public school system. Suppose you were a teacher, and had worked hard to get the education necessary for your job, and had toiled for years in your chosen profession—and then, in the end, found that your reward was to get packages of groceries and bundles of coal precisely as if you were a down-and-outer subsisting on charity.
 Wouldn't you, in that case, begin to feel that there was something tremendously wrong with the profession you had chosen?
 The plight of our school system is one of the most shocking features of the entire depression.
 Then there is the tragedy of the Klamath man who was skinned for his wife's winter furs.
 The liquor output, says a news dispatch, is increasing. So is the liquor intake.
 Keep out a dollar for the Red Cross. And if the roll call workers don't happen to "contact you," look them up. They're easy to find.
 The kidnaping racket apparently is flaring up again, this time on the Pacific coast. A California youth, son of a wealthy merchant, is believed at this time in the hands of abductors who have asked for ransom. That is getting close to home. It is to be hoped that the efficiency and vigilance of federal and California police result in the capture and punishment of the kidnapers.

NAZI PROPAGANDA BLAMED ON FISH

WASHINGTON, Nov. 15. (AP)—Charges that Representative Hamilton Fish of New York is engaged in spreading Nazi propaganda in this country were laid before the house immigration committee today by Clarence Hathaway, editor of the Daily Worker, a communist organ published in New York.
 As the only witness in a stormy session in which he was described as an anarchist by Representative Focht, republican, Pa., Hathaway asserted that Fish had attended a Nazi meeting Saturday night in New York with Nazi Heinz Spangnoel, a fugitive from justice.
 Fish was chairman of a congressional committee that investigated communists and the Daily Worker several years ago.
