

THE STORY OF COFFEE

Fact No. 9

There are various methods of preparing the green coffee for shipment to roasting plants. The general practice throughout the world is to handpick the fruit, although in some countries the cherries are allowed to become fully ripe on the trees and fall to the ground. The coffee is freed as much as possible of sticks, leaves, etc., and is then conveyed to the preparation grounds.

SCHOOL BOARD HEAD EXPLAINS BUILDING PLAN

Chairman Percy Murray has prepared a letter to patrons of the Klamath Union high school district explaining the \$205,000 bond issue to be voted upon by taxpayers of the district at Monday's election.

The board of directors of the Klamath Union high school, in response to a petition signed by representative taxpayers of the district, has proposed a bond issue to be voted upon Monday, June 28, at the high school building, from 2 to 7 p. m.

As chairman of the board of directors I wish to present to you this brief resume of the situation, with the sincere hope that you will give the problem your serious consideration. In doing this it is only my desire to cause the voters of the district to give this problem sufficient thought to insure that any action taken will represent a thorough and careful consideration of the real problem at hand.

The present school plant was planned in 1927, and a part of the original plan was completed at that time. In 1931 six rooms were added, and in 1935 two more

rooms were built, giving the school a normal capacity of approximately 750 to 800 students.

"Year after year the student population has continued to grow, until during the year just passed 1137 enrolled in the school; most of the time nearly 1250 were in actual attendance, one-third more than the building was designed for. Almost without exception, every room in the school building was in use during every period of the entire school day. What is of more importance from an educational standpoint, the classes in the majority of these rooms were larger than is considered reasonable or right in the light of good educational standards. More teachers could not be added; for there are no more rooms in which to put them.

"Recognizing the trend of affairs, in 1936 the board of directors invited a noted educator, Dr. L. C. Huffaker of the bureau of educational research of the University of Oregon, to analyze the situation and to present, if possible, a solution. Entailing a great amount of careful study over a period of several months, Dr. Huffaker made a report, verifying emphatically the belief of those close to the situation that the school was one-third overcrowded and that steps must be taken to alleviate the condition.

"His recommendation was, in substance, that which is now proposed—namely, to increase the facilities of the present site, with particular emphasis on expanding the program for industrial arts, commercial and other practical subjects.

"The building program now proposed to fulfill this need could be said to be of three parts: first,

an addition to the present structure of 10 academic classrooms; second, a separate structure for the industrial arts, built on the basis of a regular factory, a shop building, sufficient to house five such complete courses; and third, an adequate physical education building.

"In the present building no facilities were provided for establishing a program of physical education for any large number of students. The present facilities allow only freshman classes three times a week. There is no way whatsoever to provide for three upper classes, who constitute over two-thirds of the students. The state department of education is now going to require that all high schools in Oregon give three years of physical education to pupils before they may be permitted to graduate. It is not even remotely possible to fulfill such requirements under present conditions.

"In summary, this building program would provide a school plant sufficient to care for 1400 to 1500 students. It would give the school an industrial arts department, long recognized as being of extreme importance in this community. It would provide a physical education plant that would make possible the fulfillment of state requirements, this physical education plant being no more, and in many cases far less, than ordinarily found in schools of comparable size. It would give to the girls equal opportunities in this department with the boys, whereas now there is absolutely no possibility of making such provisions for them.

"The members of the board of directors fully appreciate the desire to hold all expenditures of

public money to the lowest reasonable point. This building program is proposed only after the most careful and thorough consideration of all possibilities of solution of the problem. With the constant growth in school attendance, it will naturally follow that there must ultimately come an increase in physical facilities if even ordinary and reasonable educational standards are to be maintained.

"It is the hope of the board of directors that you will yourselves give this problem your very thoughtful consideration, and that whatever your decision may be on June 28, it will represent a careful analysis of all the factors.

"Very sincerely,
"PERCY MURRAY,
"Chairman, board of directors
"Klamath Union high school."

Less than a minute is required to dissolve the marriage bonds of a Kurd in the eastern part of Turkey. The man simply says "I divorce you" three times and the parties are free.

Four-H News

WEYERHAEUSER COOKING

On Wednesday, June 23, at 8 a. m., we started our club of 4-H cooking.

Here are the officers: Glen Kennedy, president; Bob McLean, secretary; Billy McLean, vice-president; Edward Schultz, news reporter.

Leslie Hopkins and Pearl McLean were appointed as the committee for songs and games.

We discussed different kind of camp fires, and decided we would each make our own stove in the

permanent camp, which is in the Weyerhaeuser townsite. We have to build a shack for our club meetings.

The name of our club is "Burn and Bake." Our fires burn and our ovens bake.

We practiced some 4-H songs and learned to play "Catch and Pull Tag of War." We hope all our meetings will be as great a success as the first.

The evening after we formed our club Arthur Dunn, the fire chief for the Weyerhaeuser Timber company met with us. He helped us weed our place and will help us make our fireplaces.

Our leader is Mrs. C. V. Schultz. EDWARD SCHULTZ, News Reporter.

MONTGOMERY WARD

Rodeo Sale!

Round Up Your Outfit at Montgomery Wards

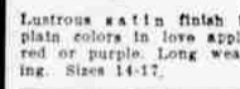

Fine Rodeo Shirt 2.98

Contrasting Trimmed

SHIRTS 2.98

Fine, lustrous celanese satin in a variety of contrasting colors. Sizes 14 to 17.

Lustrous satin finish in plain colors in love apple, red or purple. Long wearing. Sizes 14-17.

New Rodeo Handkerchief 39c

Fine Broadcated Satin 3.49

Eye-catching shirts in gold and cardinal! Made for wear, too! Sizes 14-17.

Light silk fabric. 17 x 27" square with rodeo illustration. Choice of colors.

Boys' Handkerchiefs . 25c

Carlsbad . . . Felt RODEO HATS

Durable wool felt with 4-in. curled raw edge brim. Leather sweatband. 1.95

Fur Felt "San Fran" 3.98

With 3 1/2-in. bound edge brim. Narrow silk cord hatband. Satin lined. The favorite.

Fur Felt "Armito" 3.98

With silk cord hatband and contrasting binding. In black or Belgian beaver.
