ly because Sir Edward Grey, then prime minister, made a surprisingly similar speech before parliament just before the world war broke out.

HERE is a straw that is far more significant:

Roberto Farinacci, a member of Mussolini's fascist grand council, advises Italy to break off relations with Britain and France, and says "It is unquestionably far better to come to grips today rather than in the distant tomorrow, when it is convenient to our enemies."

He cites Britain's present military weakness and the internal political weaknesses of "semi-bolshevist France."

WHETHER war breaks out in Europe now or later depends on whether Germany and Italy WANT TO FIGHT NOW or think it better to wait until later on.

It is true that Britain is weak in a military way. She is frantically spending seven and a half billion dollars to make herself stronger. It is equally true that France is torn by bitter factional strife.

It may be, you see, that Germany and Italy think that NOW is a more favorable time than LATER. It all depends on that. Human welfare, unfortunately, doesn't enter into the decision.

The thrifty way to travel First-class

1937 Ford V-8 owners pay less for their cars, pay less to run them, and travel first class all the time!

Basic reason is the V-8 engine. Eight cylinders give smoother performance. V-type construction is the most modern on land, sea, or in the air, and permits a much more compact power-plant. Space saved under the hood means more room in the body, and more comfort.

This year's V-8 engine is offered in two sizes, 85 horsepower for top-notch performance. 60 horsepower for rock-bottom economy. The latter, available in five body types, makes possible the lowest Ford price in years and the greatest gasoline mileage in Ford history.

To this choice of V-8 engine sizes, add the other Ford first-class features—Center-Poise Ride, Easy-Action Safety Brakes, all-steel body, advanced design—and you'll realize why the Ford V-8 is the quality car in the low-price field.

LOWEST FORD PRICE IN YEARS
\$25 A MONTH, after usual down-payment, buys any model 1937 Ford V-8 Car—from any Ford dealer—anywhere in the United States. Ask your Ford dealer about the easy payment plans of the Universal Credit Company.
