

PARK CHIEFS HONORED AT DINNER HERE

Fond farewells and a hearty welcome were combined at Thursday night's Willard hotel dinner in honor of Superintendent and Mrs. David Canfield, who are leaving Crater lake for Rocky Mountain national park, and E. P. Leavitt, who succeeds Canfield at Crater lake.

John Doerr, Jr., Crater lake park naturalist, who has served under both Leavitt and Canfield, presided at the dinner, and presented Leavitt with the official key to the city of Klamath Falls. Doerr, "resigning" temporarily from the park service, cited Klamath Falls' important relationship with Crater Lake national park, pointing particularly to the increasing visitation at the park from The Dalles-California highway—exceeding that from other highways.

The park naturalist has charge of the Klamath Falls branch office, and said he was speaking as a citizen of this city.

He then reviewed Canfield's rapid rise in the park service, which made him the youngest superintendent in the service. Canfield, deeply touched by the occasion, made a short talk in which he credited "luck" with the advancement cited by Doerr. The young superintendent warmly praised the spirit of the people of southern Oregon.

Doerr, who served under Leavitt when the latter was superintendent at the national park at Hilo, Hawaii, then gave a warm eulogy for the incoming chief. Leavitt, in his talk, outlined the value of the national parks to the people of America, and told of his long interest in Crater lake. He moves there from Lassen.

Jean Steel, daughter of the late William Gladstone Steel, "father of Crater lake," was introduced. Miss Steel is United States commissioner for Crater lake park.

Frank Jenkins, president of the chamber of commerce, after a short talk, presented Mrs. Canfield with a bouquet of red roses. John Houston had charge of music at the dinner, which was arranged by a committee headed by Frank Holmes. Mrs. Earl Clanshaw acted as accompanist.

FT. KLAMATH

PORT KLAMATH—Miss Juliet Brooks left last Wednesday for her home in Portland after spending the past two months visiting at the home of Mr. and Mrs. C. V. Looney and daughters, Carol Jane and Frances. Juliet's father, Dr. Lloyd Brooks of Portland, is motivated to Fort Klamath to take his daughter back to her home.

Mrs. Harold Moon is recuperating in the Klamath Valley hospital from an appendectomy performed last Thursday evening. During Mrs. Moon's stay in the hospital her mother, Mrs. Frank Edwards of Fort Klamath, is caring for her small daughter Velma.

Mrs. Bert Vaughn and son, Charles "Bug" Johnson, were in Fort Klamath Sunday from the San Orino construction camp in Crater lake park. Bug will be unable to walk for six weeks at least, as a result of injuries sustained recently when he fell over a cliff at the rim of the lake.

The 14-year-old lad miraculously escaped serious injury and possible death when he fell and rolled 200 feet, but he received one badly sprained ankle, torn ligaments in the other leg and ankle, and a sprained wrist. In addition to severe bruises, his leg-father, Bert Vaughn, is employed in construction work on the rim road at Kerr Notch. Bug attended school here last year.

Mr. and Mrs. Paul Wampler of Tionesta, Cal., were Sunday visitors in Fort Klamath with their family. They spent the day with Mrs. Wampler's parents, Mr. and Mrs. E. D. Briscoe, and other relatives here. Their two sons, Jimmie and Billie remained with their grandparents for a two weeks' visit, while the Wampers returned to Tionesta Sunday evening.

Mr. and Mrs. Ralph Gray and daughter, Genevieve, left Monday after enjoying a visit with relatives in Fort Klamath for the past ten days.

A. L. Maguire of Bonanza is drilling an artesian well in the Fort Klamath cemetery, and reports good progress with the work, which commenced Monday.

Mr. and Mrs. E. D. Briscoe were Klamath Falls visitors Monday.

Mrs. Edith Wright of Grants Pass is visiting her brother and sister-in-law, Mr. and Mrs. R. S. Ballou.

Mr. and Mrs. Llewellyn Smith and twin boys, Lloyd and Lawrence, returned last Tuesday to Lamm's camp at Yamawa. Smith was confined to a Klamath Falls hospital several days last week suffering from a severe sinus infection, but was able to return to work at Lamm's camp later in the week.

Mr. and Mrs. Lee Denton are having a fine modern 5-room home built on their ranch near Fort Klamath. The outside finish is unique, consisting of redwood brought from the redwoods country in California by Denton by truck. Carpenters from Klamath Falls are employed in the building work.

Mr. and Mrs. Harold Bevan, proprietors of the Calico Cat, are having their roof re-shingled with Pabco asbestos shingles this week. Klamath Falls workmen are doing the re-shingling.

DRUNKENNESS FINES LEVIED BY JUDGE

George Feeder, who forfeited \$10 bail for failure to appear in police court Thursday to answer to charges of intoxication, landed in jail again late Thursday night on the same count. He was assessed a fine of \$10 on the count by Police Judge Otto Langslet.

Mr. and Mrs. Bob Allen, who live in the rear of 909 Alameda street, were fined \$15 each Friday morning and sentenced to spend 30 days in jail on charges of drunk and disorderly conduct. Loren Cates and Raymond Pompey were fined \$10 each on drunkenness charges, and Merrill Mellow, charged with vagrancy, was fined \$100 or given an alternate jail sentence of 30 days.

TEACHER INSTITUTE SET FOR OCTOBER

SOUTHERN OREGON STATE NORMAL SCHOOL, Ashland, Aug. 6 (Special)—The third annual teachers institute and educational conference, in conjunction with alumni homecoming, have been set for the weekend of October 29 and 30, 1937, at the Southern Oregon State Normal school in Ashland.

The teachers institute and conference, the third of its kind to be held on the normal school campus, sponsored by the counties of Jackson, Josephine, Klamath and Lake and the Southern Oregon State Normal school, is expected to draw over one thousand teachers from these and adjoining counties.

Dr. Paul McKee of the Colorado State College of education at Greeley, who was so popular at the conference in April, 1936, has been secured for lectures and discussions, as have other prominent educators in the Pacific northwest.

The institute program will cover the 29th and the morning of the 30th, with C. R. Bowman, Jackson county school superintendent; Fred Peterson, Klamath county superintendent of schools; H. H. Wardrip, Josephine county superintendent; Mrs. Anne Sprague, superintendent of schools in Lake county; and President Walter Reuther of the normal school as executive committee.

Homecoming of the normal school graduates is to be in conjunction with the conference this year for the convenience of the school alumni who are teaching in southern Oregon. The festivities will be initiated with a banquet, followed by a play presented by the normal school, both open to conference attendees not graduates of the school, on the evening of the 29th.

A football game on the local field Saturday afternoon will be featured on the homecoming program, followed by an alumni "mixer" in the evening.

BERTRAM SPEAKS AT ROTARY LUNCH

F. W. Bertram, who has recently returned from a trip abroad, was the principal speaker Friday at the regular noon meeting of the Klamath Falls Rotary club. Bertram represented this city at the Rotary International convention in Nice, France, in June. Dr. Ralph W. Stearns presided as chairman of the meeting. Mrs. J. E. Swanson, Jr., and Mrs. Don J. Zimwalt presented the musical program.

SCHAUPP GIVES QUALIFICATION IN BOND VOTE

Many inquiries have been made recently, according to A. W. Schaupp, attorney for the Enterprise irrigation district, relative to qualifications for voters in connection with the bond election to be held for the district on August 9, when landowners of the section will vote on the proposition of issuing bonds for the purpose of constructing a power plant for the use of the district.

In answer to these inquiries, Schaupp has issued the following explanation:

"For the information of the people residing in the district, I am quoting section 48-104 Oregon laws, relative to qualifications of voters.

"The term 'owner of land' or 'elector,' as used in this act, shall include every person, male or female, over the age of twenty-one (21) years, whether a resident of the district or state or not, who is a bona fide owner of one (1) acre or more of land situated within and assessed by the district whose deed has been recorded in the county records more than six (6) months, or, in case of a bona fide contract of sale of one (1) acre or more of land situated within, and assessed by, the district, which contract has been recorded in the county records more than six (6) months, the vendee named in such contract shall, for the purposes of this act, be considered the elector to the exclusion of the vendor; provided, that in any irrigation district contracting with the United States for a water supply the qualifications of a voter shall be ownership of four (4) or more acres of land situated within and assessed by the district or who is the holder of an uncompleted title or contract to purchase state or Carey act lands."

"The Enterprise irrigation district being an irrigation district contracting with the United States government for a water supply, it appears that an 'owner of land' or an 'elector' residing within the Enterprise irrigation district would be a person, or corporation owning four acres or more of land. In other words, no owner would be permitted to vote at the election in question, unless he or she was the owner of four (4) acres or more of land.

"I trust that this will be of some assistance to the electors in the district.

"Very truly yours,
A. W. SCHAUPP."

Present crowded conditions will be relieved and work will move more freely, the company plans.

SALEM, Ore., Aug. 6 (UP)—Now in possession of one-fourth of the remaining stand of merchantable timber in the United States, Oregon is one of the few states in which it is not yet too late to adopt policies of sustained yield forest management which would insure a permanent forest industry, the 26th annual report of State Forester J. W. Ferguson showed.

"On the basis of 1936 figures, the timber and wood products industry in the state was directly employing about 52,000 persons and supporting an additional 75,000 persons in service industries, including family dependents, the total number of persons drawing support from the forest industry was approximately 256,000, or 32 per cent of the population of the state," the report stated.

Best estimates show the total stand of Oregon timber to be about 297 billion board feet. Of this stand, about 201 billion board feet can be considered as economically available under present lumber and marketing conditions.

With an improvement of economic conditions, the board predicted an additional 142 billion board feet might be cut. The remaining stand of 54 billion board feet is of low quality or inaccessible.

Heaviest fire losses, the board

3 SHEEP KILLED BY AUTO ON ROAD

Three sheep were killed Thursday evening 13 miles south of Klamath Falls on The Dalles-California highway, when an automobile driven by John O. Mitchell of this city crashed into a herd of 50 sheep.

Mitchell reported the accident to the sheriff's office, and stated that the sheep were unattended and that he was unable to find a brand.

COPCO INSTALLS NEW SWITCHBOARD

A telephone switchboard has been installed in the offices of the California Oregon Power company, and hereafter all telephone calls will be handled through the switchboard, the company announced.

Telephone business will be speeded up by this arrangement, Copco believes, and Miss Cleo Champagne, employed to operate the switchboard, will also function as information clerk for persons coming to the office to transact business in various departments.

The switchboard is the first step in a program of reorganization of office space in the Copco building at Fourth and Main streets. Offices with which the public has contact will be moved to positions more convenient to the front office, while the accounting department and similar divisions will be moved to offices on the second floor, along with the office of District Manager H. P. Bosworth.

Present crowded conditions will be relieved and work will move more freely, the company plans.

SUSTENSION OF YIELD FAVORED FOR FORESTS

SALEM, Ore., Aug. 6 (UP)—Now in possession of one-fourth of the remaining stand of merchantable timber in the United States, Oregon is one of the few states in which it is not yet too late to adopt policies of sustained yield forest management which would insure a permanent forest industry, the 26th annual report of State Forester J. W. Ferguson showed.

"On the basis of 1936 figures, the timber and wood products industry in the state was directly employing about 52,000 persons and supporting an additional 75,000 persons in service industries, including family dependents, the total number of persons drawing support from the forest industry was approximately 256,000, or 32 per cent of the population of the state," the report stated.

Best estimates show the total stand of Oregon timber to be about 297 billion board feet. Of this stand, about 201 billion board feet can be considered as economically available under present lumber and marketing conditions.

With an improvement of economic conditions, the board predicted an additional 142 billion board feet might be cut. The remaining stand of 54 billion board feet is of low quality or inaccessible.

Heaviest fire losses, the board

said, on Oregon's approximate 28 million acres of forest land, have been from sources with which the timber owner had not the least connection.

Sustained yield, as advocated by the board, implies that the forest industry be organized so that annual cuts of timber will equal approximately the annual growth increment. To establish a balance, it would be necessary to set up loose administrative units in which given blocks of timber lands are more or less permanently associated with corresponding manufacturing plants.

Transition from a liquidating industry to a sustained yield industry, as pointed out by the report, is no simple matter. Greater stability of private ownership would be necessary.

The following concrete steps enumerated by the board in the report which may be taken soon, included:

- 1—Long-term credits at low rates of interest for those owners who will agree to conform to sustained yield requirements.
- 2—Adjustment or revision in the method of taxing mature timber stands.
- 3—Increase of state and federal appropriations to aid in developing more efficient fire protection for private lands.

FINED \$10

William K. Almasi was fined \$10 in justice court Friday for operating a motor vehicle with improper license plates. He was charged with removing plates from one machine and placing them upon another which he was driving at the time of arrest by state police.

All the fancy breeds of goldfish are the products of man's breeding experiments, and all the fancy breeds would revert to one common type if man ceased his tests.

400 ACRES SAVED ON SHUCK HOLDING

Auxiliary dikes are holding the Tule lake sump in check and crews have been able to save 400 acres of barley in the 1200 acre field at the scene of Monday's dike-break, according to Clifford Shuck.

The dike around the Tule lake sump broke last Monday in the same place it had broken a year

ago. Water poured through an 80-foot breach on the property leased by Shuck and W. H. Hooper. Experience of last year enabled workmen to control the flood with less damage this year, it is believed.

Fine, delicate furniture should not be kept near windows, radiators, or any place where sudden changes in humidity and temperature occur.

The telescope goldfish begins life with normal eyes. The curious telescope-shaped eyes, which make the breed valuable, sometimes do not develop at all.

**AIRWAY'S A BARGAIN
OLD THRIFTY HAS FOUND.
HE SAVES MANY A PENNY
ON MANY A POUND!**

And here's why! AIRWAY is packed in a sealable paper bag that makes big money unnecessary. What your grocery money buys in AIRWAY is an expertly blended, mountain-grown coffee—store ground for extra freshness, famous for its mellow, mild flavor. Give AIRWAY a try. Satisfaction guaranteed...or your money back.

FEATURED BY SAFEWAY STORES

Through the City of TOMORROW Without a STOP

—predicts NORMAN BEL GEDDES

"All types of vehicles will be routed through the cities of 1960 on thoroughfares specifically designed to carry traffic moving at several established speeds," says Mr. Geddes, authority on future trends.

"A network of 50-mile-an-hour Express Highways in the heart of the city will handle all traffic going ten blocks or more, creating a continuous flow of cars, uninterrupted by stop lights, intersections or pedestrians.

"On Local Streets, elevated sidewalks will carry pedestrian traffic above streets... main building entrances and shop windows will be on the second-story level. Trucks will be loaded and cars parked in open areas beneath buildings. The entire width of streets—from building-line to building-line—will be clear for motor traffic..."

.but TODAY, 4 miles in 5 are Stop and Go

YOU can drive up to ten miles on the amount of gasoline wasted by your 30 daily stops! And 30 stops a day is the nation-wide average.

The costliest kind of driving you do, both in time and money, is stop and go.

While traffic experts plan "the City of Tomorrow," Shell engineers have developed a fuel, Super-Shell, to meet today's driving problem TODAY.

They have found a way to rearrange the chemical structure of gasoline... actually to balance it.

Automotive engineers refer to Super-Shell as "motor-digestible," so quickly and completely its energy changed into power... at all motor speeds.

You'll cut the cost of your stop and go by the regular use of Super-Shell. There's a Shell dealer in your neighborhood.
