When the pressure becomes too great, one of the tiny blood vessels—usually in the brain—bursts. The symptoms of high blood pressure are as follows:

1. Headaches 7. Heart Pain

2. Irritability 8. Short Breath

3. Indigestion 9. Cold Feet

4. High Tension 10. Cold Feet

5. Cold Hands 11. Nervousness

6. Constipation 12. Nervousness

To secure permanent relief from high blood pressure, the poisons in the blood must be removed.
