

GRANTS GIVEN STIFF SENTENCES

Woods and George Duston, charged with vagrancy were each fined \$100 each and 50 days in jail. Both fines and sentences were suspended to allow them to leave town. Duston, however, who was also charged with vagrancy, was sentenced to a 5-day jail sentence before leaving the city.

Thomas Ryan, charged with vagrancy, was given a 10-day jail sentence. He had just been released from jail Thursday after serving a 30-day sentence for intoxication.

John Koach, charged with disorderly conduct, was fined \$15 or sentenced to spend 10 days in jail.

Defendants charged with vagrancy were given regular sentences of \$10 each or five days in jail.

Earl Benson and H. L. Killis, charged with running stop signs, were each fined \$25 and 10 days in jail.

PE SMALL FOR ACCIDENT VICTIM

Condition of Chester Sutherland, pedestrian who was struck by a car near Merrill Wednesday, was reported to be critical at the hospital Friday, and a hope was held out for his recovery.

Sutherland was hit by an automobile driven by V. N. Manuel Klamath Falls about three miles north of Merrill. Both were coming toward Klamath Falls, and Sutherland was walking in the middle of the highway.

Manuel was not held after the accident.

THREE OUNCES OF LIQUOR ENOUGH TO IMPAIR DRIVING

KANSAS CITY, Oct. 15 (AP)—A study shows that three ounces of whisky makes an unsteady driver.

Dr. Rollo N. Harger, biochemist, professor at Indiana University, gave that estimate to the national safety congress today, based on studies made with a "chemical breath analyzer" which he hopes to replace the policeman's nose as a test for intoxication.

Three ounces of whisky—or a little less than two jiggers—is enough to make the average motorist a peril to traffic, Dr. Harger said.

In discussing the "chemical breath analyzer," Dr. Harger said it can detect the smallest amount of alcohol present in a single glass of beer.

But the "chemical breath analyzer" can't be fooled.

No larger than the ordinary breathalyzer used in the tests has as sensitive a chemical reaction, he explained. "The fluid, usually a healthy pink color, is unaffected by onion or garlic odors at the slightest suggestion of alcohol on the driver's breath."

The degree with which the fluid is affected is the give-away on how much drinking the breather has done up to.

Although it is a rickety affair, the best, the thrifty blue herons repair and use the old nest after year.

Recreation Notes

News About Personalities and Events

TWO new volunteer recreation leaders have taken over some of the work of leading 4-H clubs at Mills school. They are members of the Mills PTA and are devoting an hour a week of their time in an effort to make the 4-H club work click in their community. Mrs. Cressa V. Grubb and Mrs. Mary F. Larson are the PTA members who have volunteered their services.

Mills is now off to a flying start. They not only have their own leadership for all but one of them, Mrs. Mattie Worley will assist the leaders with the technical part of the sewing club work. She also will assist the leaders at Fairview, Riverside and Pelican where clubs are being formed.

The Snow Clan people are beginning to talk real business. At their meeting Wednesday night it was pretty definitely decided that most of their interest this year would center on the Aspen Lake country. It is claimed that although the conditions at Aspen Lake are not ideal for winter sports, there are so many desirable qualities in the site that it should be developed.

We heard some talk of installing a power "pull back" on top of the hump at Aspen mountain. It seems that a short pull up a steep incline will permit about a mile of skiing to reach the bottom. The plan is being discussed seriously.

ously and something may come of it. We don't know a great deal about skiing but if they can find some easy way of getting up the hill we may give it a try.

Another scouting group from the Clan will visit the Aspen Lake area again this week. This group is not only interested in the snow possibilities but have in mind a logical site for the construction of a shelter. Members all agree that some sort of shelter is absolutely necessary and one large enough to accommodate overnight parties is desirable. According to one member "hot-stove skiing" is the most popular sport of all.

CAR THEFT CAREER ENDS AT SALT LAKE

A youth who was held here briefly after an automobile accident at Keno has been arrested again at Salt Lake City and is accused of committing a series of automobile thefts.

He is Dale H. Shreeves, 17, Grand Junction, Colo., arrested at Salt Lake when a service station became suspicious of his attempt to trade golf clubs for gasoline.

Shreeves and a companion were arrested here on suspicion of automobile thievery. They said the car they were driving was stolen

in California. Police, however, were unable to locate the owner of the car, and they were finally released here for lack of a prosecuting witness.

At Salt Lake Shreeves admitted thefts at Pocatello, Ida., Grand Junction, Colo., Pleasant Hill, Mo., and Chico, Calif.

He told Salt Lake police he rode a freight train out of Klamath Falls and into Pocatello.

DISPLAY OF FURS ON VIEW AT LOCAL STORE SATURDAY

Sam Morse, New York, member of the Fur Designers' guild of New York, will be at the Emporium, 829 Main street, Saturday, October 16, with an assortment of more than 200 fur coats.

In addition to his fur showing, Morse will give the women of Klamath Falls advice on the care of their coats, and information about furs.

Morse comes here from Seattle, and his coats, which include lapins, Hudson seal, Persian lamb, squirrel, Russian caracul, China kid and lamb caracul, muskrat and eastern American mink, were recently shown at the national fur fashion shows in Chicago and New York.

WONDERMENT PLATTEMOUTH, Neb. (AP)—So love is blind, huh?

It wasn't to the young couple who lined up before the county drivers' license examining bureau and watched applicants take eye-sight tests.

Said he: "What's an eye test got to do with getting a marriage license, anyhow?"

Then someone found that a courtesan employe by error directed the young couple to the drivers' license instead of the marriage license bureau.

WORKER TRAPPED AS LUMBER FALLS

CHILQUIN, Ore., Oct. 15—Louie Burgoine, 23, narrowly escaped being seriously injured Thursday at the plant of the Forest-Lumber company when he was caught under a pile of falling green lumber.

At the time of the accident, Burgoine was working alone. Other workmen in the building, hearing the crash, ran to the scene and were only able to see the trapped man's feet. Two doctors and an ambulance were called, while co-workers pulled the planks off him.

When rescued, Burgoine was

unconscious but soon gained consciousness and was performing his duties this afternoon.

It was estimated there were 2500 to 3000 feet of green lumber in the pile which covered Burgoine.

RUPTURED?

After 40 years of wearing, making and fitting trusses, I have designed and patented the **LITTLE DOCTOR TRUSS** with its sponge rubber and air cushion pads that holds just like your hand. After fitting over 2,000 of them, I am convinced it is the answer to all rupture sufferers. Neat, simple, efficient; no steel; no elastic; no pressure on back or hips; no leg straps. No bar across front. Can be worn in bed or bath. Weighs 6 ounces. No matter how good your truss is, if interested in the best, see this one. I will give a free demonstration of this wonderful truss at

In the City of TOMORROW

*you'll cross right
under Main Street*

predicts **NORMAN BEL GEDDES**,
authority on Future Trends

"You won't have to wait for traffic lights to change when you want to cross Main Street in 1960," says Mr. Geddes. "Conveniently located underpasses will take you right across without a stop."

"Traffic going 10 blocks or more will speed along 50-mile-an-hour Express Streets connected by ramps with a network of Local Streets."

"These local streets will also be free from interference—from building-line to building-line. Open areas beneath buildings will provide parking space... loading platforms for trucks. Pedestrians will use elevated sidewalks—shop and cross streets at the second-story level."

**...but TODAY,
4 miles in 5 are
Stop and Go**

NO MATTER WHERE YOU LIVE, you average 30 stops a day... and one stop can waste enough gasoline to drive you 5 city blocks!

That's why stop and go is costly! While traffic authorities are planning "the City of Tomorrow," Shell engineers have developed a fuel, Super-Shell, to meet today's driving problem TODAY.

They have found a way to rearrange the chemical structure of gasoline... actually to balance it!

Automotive engineers use the term "motor-digestible" to describe Super-Shell, because at all motor speeds it is converted so QUICKLY, so COMPLETELY into power.

The regular use of Super-Shell will save money on your stop and go. There's a Shell dealer near you.

SUPER-SHELL

UP IN THE AIR
COLORADO SPRINGS, (AP)—Velmie Sanders dreamed she was married in an airplane. She liked the idea, but Alfred Welch, her fiancé, didn't.

They compromised and were married in the Will Rogers' of firewood.

Shrine of the Sun, amid the clouds on Cheyenne mountain.

Without using the upper one-third or the branches, a single Sequoia tree yielded 3000 posts, 550,000 shingles, and 100 cords of firewood.
