

# Klamath Festival Interest to Many

### Elimination Contests Slated for Coming Week in Local Communities of County

Interest in the Klamath Skit and Folk festival to be held in the Klamath Union high school auditorium, April the fourth, is centered now in the local communities where plans for the elimination contests are being made. At various centers in the county these contests will give each organization entered a chance to participate in the county festival. One of the first groups to choose winners was the Girl Scouts who had their contest in connection with the father-daughter banquet, Friday, March the fourteenth at the armory. Mrs. H. A. Dressie is chairman for this group.

Other community programs being planned are: Bonanza with Mrs. Lois McDonald, chairman. Organizations taking part will be: Bonanza Extension unit, Beef club, PTA, Dairy Extension unit, Lapsness Study club, Poe Valley Extension unit. At Pelican City the elimination programs will be held Monday, March the seventeenth, at the Pelican school. Organizations taking part will be the Pelican PTA, 4-H clubs, Pelican-Aigoma Extension unit.

Mrs. Hal Ogle of Weyerhaeuser will have charge of the program when skits by the PTA and the school will compete to represent Weyerhaeuser camp.

### Venturists Study Town

### Industry Claims Attention of Club's Program Meeting

Following up their program of "Know Your Town," Venture club members met in the gold room at the Willard hotel on the evening of March the fourth, devoting the evening to a program on industry and workers in Klamath Falls.

Emma Howard gave interesting information on the preparation offered young people by the high schools of the county, whose curriculum includes all the commercial subjects. Another service offered by the high schools is help in securing jobs, although they do not have a regular employment service. Miss Howard stated that the local chamber of commerce is helpful by offering work to graduate students for an occasional week.

Miss Peggy Johnson's subject covered the state limitations on working hours for men and women and the provisions for proper ventilation, lighting, and other working conditions. She also explained safety devices required by law and the provisions for checking by commissioners.

The subject of factories and mills was handled by Dorothy Teed, who reported that these are all well built and well lighted and have been guarded against serious fires. She spoke with praise of the recreational activities offered but noted that the majority of workers locally do not have paid vacations, due to the seasonal employment in this community.

The Workman's Compensation law was the subject of Dora Cameron's report, who gave the interesting information that since the law came into effect in 1915 benefits amounting to \$60,000,000.00 have been paid for loss of time and life. Miss Cameron stated that maximum benefits for a married man is \$97.00 and for a single man \$55.00. In her investigations Miss Cameron found that, in general, relationship between employers and employees is good, but that occurrence of recent strikes indicates some dissatisfaction.

Questions regarding local occupations, methods of job hunting, and the Wagner-Peyser act were answered by Dora Foster under her topic. Presiding at the meeting was President Margaret West, with Dorothy Teed, Emma Howard, Dora Cameron, Peggy Johnson, Eleanor Pruitt, and Dora Foster attending.

Venturists are looking forward with considerable anticipation to their next meeting, which will be a dinner at the Rose Poole residence on Conger avenue with Mrs. Rose Poole and Mrs. Ruth Ray as hostesses.

# Eight Balls of Fire

IF you like fireworks, and who doesn't, it's really too bad you can't see what goes on inside that sparkling big Buick FIREBALL eight that romps you so easily down the broad highway.

There you'd see eight busy cylinders, with pistons flashing up and down... **and how they can travel!**

You'd see each fuel charge packed tight into a tiny bundle shaped like a flattened ball...

You'd see the spark leap, the flame spread, the piston thrust down with extra force as each furious fireball lets go its pent-up wallop.

You'd see all this happening as fast as thirty times a second in each of those eight cylinders—and we think you'd understand then just why there's such a special and exciting satisfaction in the way a Buick travels.

Gasoline gives up more of its power when it's packed as tightly as it is here.

That special, flattened-ball shape of the compressed fuel charge means smoother, better burning, full focus of the power on the piston head, where it counts.

So when you've got these eight balls of fire working busily under the bonnet, you really travel! You travel farther on every gallon; you travel more pleasurably. You travel—but, shucks! Why listen to talk when there's a Buick dealer nearby waiting to show you how you travel behind a FIREBALL?
