THE SPIRIT OF

76

by JOHN CLINTON

From now on you can call me Shock-Proof John. I've seen everything! Because the other morning when I was driving past the Union Oil station on the corner I almost fell out of my Hispano-Plymouth at what I saw.

There, drawn grandly up to the pumps was a horse and wagon. "This, I gotta see!" says I, and turned back. And when I returned I got the 2nd shock, for what do you think the hay-burner was doing?

Well sir, the driver had put four old auto wheels on his wagon, and he was having the tires filled with air! While he was doing it, one of the boys had put a bucket of water down for Dubbin to drink! It was the most unusual sight I've seen for years!

And while the situation was, to say the least, amusing, the boys at the station were doing their stuff with perfectly straight faces. I'm not sure just what the entire significance of this little drama was, but it certainly proves that the Union Oil boys are gentlemen from way back!

So, in addition to inviting you to drive your car into a Union Oil station for service, I'm now in a position to invite all horse-and-wagon operators to do likewise. It's really too bad that Union can't think up some way for horses to use 76, or Triton Motor Oil, because somehow I think life would be more picturesque (if less convenient) if we had more horses galloping by. Don't you?
