AFL RECEIVES CERTIFICATION AT TIONESTA

The AFL-Lumber and Sawmill workers union, local 2344, has been certified by the National Labor Relations board as the sole bargaining agent for the employees of the Shaw Lumber company's Tionesta mill, it was announced Monday.

Although the recently-held board election, which the LSU won, was supposed to have settled an issue of many months standing, the CIO in March filed a protest with the NLRB regional director on the grounds that the ballot was held at a time when the company's operations were curtailed and a large number of the eligible employees were not present to vote.

According to Joe Boyd, AFL organizer, the NLRB ruled that "the question whether the election should be postponed until the company resumed full operation was considered fully by the board before the original direction was issued. None of the parties raised it in connection with the direction of a runoff election and the difference between the number voting in the first and in the second elections was not substantial. The board finds the protest to be without merit."

Boyd said negotiations for a collective bargaining agreement would be begun at once.

DIPLOMACY OF TURKEY, REICH SAID MENACE

By DeWITT MacKENZIE

As a demonstration that the pen may be mightier than the sword, it's fair to say that the Hitlerian big-stick diplomacy now being brought to bear on Turkey is considerably more dangerous to the allied cause than is the Nazi advance into Greece.

The Fuehrer, looking forward to a quick killing in Greece, is said to be trying to maneuver the Turks into a position where they will grant him passage of troops into the Near East, should he decide to make that the scene of his next conquest. He has no desire to fight his way through the ferocious Bashibazouks of Asiatic Turkey.

As has been said before, conquering the Balkan peninsula won't win the war for the Hitlerites, but breaking through into the Near East would be more productive. The Iraq oil, plus a chance to assault the Suez canal and Egypt from the east would be big pumpkins.

You know the old Serbian saying — if you allow the devil to sow pumpkins he will hit you on the head with them later. Thus the Nazi progress with Turkey is a matter of vast importance to Britain and her allies.

There is no reason to believe that the Turks are panicky over the German success in Yugoslavia and Greece, because they expected it, although not with quite so much speed. However, Turkey is vitally concerned over anything which challenges Britain's control of the eastern Mediterranean.

This being so, without doubt the Turks are watching the axis drive along the Libyan coast into western Egypt with anxiety. This thrust hasn't created any desperate situation as yet, and the British protest as confident of dealing with it at the opportune moment. Still it is a grave menace potentially and so long as it exists the Turks are bound to regard it as a warning to them to tread cautiously in challenging the Germans.

When in Rome, one no longer does as the Romans do. Even the Romans now must do as the Germans do.
