

KLAMATH BOY MOVES UP IN ARMY SCHOOL

PHILADELPHIA, Pa., April 30—Private First Class Earl W. Holbrook stationed at Fort Winfield Scott, Calif., has just graduated from the Quartermaster school at Philadelphia, Pa. Private First Class Holbrook, who joined the colors on April 1, 1940, is the son of Mrs. Madge Holbrook, Klamath Falls, Ore.

Included in his class were 108 other soldiers, all of whom received their certificates of completion of the course from Colonel H. L. Whittaker, commander of the school, in exercises conducted at Philadelphia.

All students returned to their former organizations where they will use their new knowledge to help carry out the functions of the Quartermaster corps.

The course of instruction, which lasted two months, covered the basic principles of procurement, storage and issue, supply, personnel administration, and a number of other subjects pertaining to the operation of the Quartermaster corps.

FORT LEWIS, April 30 (AP)—This is the story of how a dog fight took precedence over a "war."

In recent combat maneuvers, the 81st brigade's "reds" were battling the 82nd brigades "blues." It was a sham battle. It was forgotten momentarily when a real battle, between two regimental mascots started. Each was wearing the colors of the army to which he was attached.

While opposing troops whooped and hollered, the dogs fought it out in "no man's land."

The "blues" claimed their dog won. The "reds" contradicted. Taking a cue from umpires judging inter-brigade maneuvers, the soldiers compromised and called the honest-to-goodness fight a draw.

FORT LEWIS, April 30 (AP)—The United States is taking a page out of Germany's military book and will stress relentless, crushing attack, Major General Kenyon A. Joyce, commander of the IX army corps, indicated today.

Delivering a critique on the full divisional maneuvers engaged in this week by the 3rd and 41st divisions, the jut-jawed, two-star general told all commanding officers the offense "must be seized at all costs."

Four Words

"A passive defense rarely accomplishes anything but ultimate defeat," the corps commander said. "The defensive spirit is the defeatist spirit and it never wins wars."

If the IX corps, composed of the two divisions and attached troops based here, adopts modern warfare's "aggressive doctrine" it can "very confidently look forward to success no matter what its tasks may be," General Joyce declared.

"Four words—spirit, nerve, technique and speed—bring success to any army, no matter what battle task it may face," told the officers, many of whom were part-time soldiers in national guard regiments only seven months ago.

Offensive Wins

"A strong offensive wins wars. All advantages lie with an army that prepares adequately and then takes the rapid offensive. The attack must thrust; the defense must parry. Operations are most difficult for defenders in this day of rapid, mechanized warfare. Initiative with attack is more important than ever before and it must be seized at all costs."

General Joyce said the war games, in which 16,500 41st division troops and 14,000 3rd division men participated, were "exceedingly well conducted," but added, "they were not without the mistakes normal during training period."

"A smart soldier," the general added, "doesn't make the same mistake twice."

The general left two military suggestions before the men who command the Pacific Northwest's two divisions:

"Never substitute rote for common sense. Don't be bound by what's in the books. Apply individual resourcefulness."

"Remember—battles are won by determined, small combat groups, fearlessly and resourcefully led."

Eight states bound Tennessee: Kentucky, Virginia, Georgia, North Carolina, Alabama, Mississippi, Arkansas, and Missouri.

Feathers of a bird, instead of covering the entire body, occupy restricted areas and only over the bare patches.

Shields sometimes were covered with the bony covering of the alligator gar fish by primitive warriors.

His And Her Towels Are The Vogue

Household Arts by Alice Brooks

These Will Give Your Linens Color

Surprise the June bride with some of these in her shower. "His and Hers" — "Mr. and Mrs." — It's the gay and popular trend in towel embroidery and these are so easy! Pattern 6959 contains a transfer pattern of 12 motifs ranging from 3

Spring Is Here--That's Time To Think of Lemon Meringue Pie

The economy budget must always include eggs. They are absolutely essential to your family's health. It is seldom wise to buy more than a week's supply of eggs at one time. If possible, buy eggs that are kept in a refrigerator up until they are sold. Put the eggs in a refrigerator or other cool place as soon as you get them home.

Lemon meringue pie is a spring treat in most homes. Here is a recipe that will make the family ask for more.

Lemon Meringue Pie

PASTRY: 1 cup flour, 1/2 teaspoon baking powder, 1/4 teaspoon salt, 1-3 cup lard or other shortening, 3/4 cup ice water (about).

Sift together flour, baking powder and salt. Cut shortening in with a pastry blender or two knives until the lumps are the size of lima beans. Add ice water gradually, mixing it in with a fork. When only enough water to hold dough together has been added, pat dough together and chill if possible. On a floured board, roll out dough to 1-8 inch thickness. Line a 9-inch heat-resistant glass pie plate; trim and flute the edges.

Place another 9-inch pie plate over it, to hold crust sandwich style while baking. Bake in a hot oven (425 degrees F.) about

15 to 17 minutes or until the pie shell is a light brown.

FILLING: 1 1/4 cups sugar, 1/4 cup cornstarch, 1/4 cup flour, 1/4 teaspoon salt, 2 cups boiling water, 3 egg yolks, 2 teaspoons grated lemon rind, 6 tablespoons lemon juice, 2 tablespoons butter.

Mix sugar, cornstarch, flour and salt together in a saucepan. Add boiling water gradually; cook over direct heat 5 minutes, or until thick, stirring constantly. Allow to cook over very low heat a few minutes longer, stirring occasionally. Mix beaten egg yolks; add to cornstarch mixture. Return to heat and cook for 2 minutes longer, stirring all the while. Remove from heat, add lemon rind and lemon juice; add butter and cool almost to room

Menu

BREAKFAST: Grapefruit, soft cooked eggs, oatmeal, muffins, jelly, coffee, milk.

LUNCHEON: Macaroni and cheese, fruit salad, whole-wheat rolls, tea, milk.

DINNER: Baked pork chops with onions, baked potatoes, beets and beet greens, lemon-meringue pie, coffee, milk.

temperature. Pour into pie shell.

MERINGUE: Three egg

whites, 6 tablespoons powdered sugar.

Make a meringue by beating the egg whites to a soft peak stage and sprinkling the sugar over the top a tablespoonful at a time. Beat sugar in well between each addition. Pile meringue lightly on pie and bake in a moderately slow oven (325 degrees F.) for about 15 minutes or until light brown.

Co-Eds Prepare For Women's Meet At Oregon State

OREGON STATE COLLEGE — "Everybody's mother is every woman's guest" is again the slogan for the annual Women's weekend here, May 9, 10 and 11. Thousands of invitations have been mailed to mothers of Oregon State students by the Women's weekend committee headed

by Jean Dykeman of Vancouver, Wash.

A new feature this year is the combining of Women's weekend with the third annual garden days, which will begin Thursday, May 8, and will continue through Sunday. Visitors here primarily for Women's weekend will find many new garden attractions, while those who come especially for the latter will have other events of interest.

The Women's weekend program will feature the honor convocation, a campus tea, college plays, dance recitals and the annual mother-daughter banquet. Scheduled during the garden days will be educational talks, a district flower show, dedication of the new campus gates and numerous other events, including celebration of the thirtieth anniversary of the founding of the department of landscape architecture.

Waitresses Meet Halifax In Park at Washington

WASHINGTON, April 30 (AP)—Gee, you shoulda been along when Elizabeth O'Connor and Ann Magnotto and Billie Young met his lordship in Rock Creek park yesterday. Yeah, Lord Halifax, you know, the ambassador.

It's their afternoon off from the Silver cafe where they're waitresses, see, and they're wading in the creek when this Lord Halifax comes along with another fellow. Well, they recognize him from his picture in the papers and run after him and ask for his autograph.

Nice as anything, he writes it right on their popcorn box. Then he introduces the fellow

with him—Malcolm MacDonald. "You've heard of Ramsey MacDonald," he says. "Well, this is his son, Malcolm."

Elizabeth says, "Hiya Malc," and Ann asks him if he was married. He says he was, so she says, "I better be getting along then."

But first Elizabeth asks his lordship for a carnation he had in his buttonhole and he gives it to her and says, "I wish I had one for each of you." Sue put it in her memory book when she got home.

Then he asks the girls their nationalities and Billie and Elizabeth tell him their people were born in Ireland and Ann

FUR STORAGE

We Use Dry Fumigated Storage

WHY?

- Dry Storage** of furs is rapidly being installed by furriers who really know the fur business.
- Dry Storage** is SAFE STORAGE for furs because it does not shrink the pelts. When humidity is not properly controlled in cold storage sometimes as much as 2 or 3 inches shrinkage occurs.
- Dry Storage** does not counteract the tanning process. Cold storage often ruins furs by the salt used in curing the pelts, drawing moisture and counteracting the tanning process.
- Dry Storage** protects the furs from moths, as moth larvae frozen for months in cold storage become active as soon as they get warm.

DRY STORAGE and FUMIGATION
Kills All Forms of Moth Life... Even the Eggs!

- Cold Storage** has absolutely nothing to do with the lustre of furs, as any furrier well knows.
- Cold Storage** of furs is purely "hokum," and its only value is the advertising value, because the public has been educated to pay good money for it. No furrier ever keeps his stock of new furs in cold storage... why keep used furs there? What does refrigeration do to foods? Dries them out by evaporating the moisture... because REFRIGERATION is EVAPORATION.

The Only Safe Storage
As Recommended by U. S. Dept. of Agriculture
Bulletin No. 1353 Is

Dry Fumigation Storage

Don't take chances on shrinkage and mildew, besides moth damage. BE SAFE! Store your furs in the only safe, insured, fireproof and also fumigated storage vault in Klamath Falls.
