Have you discovered how smoothly you take the hills with Finer Flying A?

SMOOTH AT EVERY SPEED

Try a tankful today and feel the difference at any speed

"Slow down," warns one sign. "Speed up," says the next. 25 miles an hour, 45, 10, 15. Slow, fast, slow again. Changing speed limits wherever you go. And at some of these varying speeds, some motors fail to respond with ordinary gasoline. And all motors are different. One motor balks at 10 miles an hour, but works OK at higher speeds. Some motors cough and hesitate only on the hills. Another motor chatters at 45. But now the problem is solved. You can have a motor smooth at every speed.

Use 7 gasolines in one. Seven proved fuels scientifically blended to give you smoothness at every speed. Polymerized gasoline is in there. Cracked is another.

Alkylated, Solvent-refined, Re-formed, Natural and Straight-run make the seven gasolines in Finer Flying A.

Try a tankful of this new blend of gasolines today. Discover how smoothly you ride through the changing traffic zones and over the hills with Finer Flying A. Go fast. Go slow. Go fast again—smooth at every speed.
