Can Kill Deer.

The open season for deer began July 15, but venison cannot be sold at any time under a penalty of \$100 to \$500. The state game warden is actively engaged in enforcing the game laws, having deputies in every part of the state who have orders to prosecute to the full extent any violation of the game laws.

New Incubator.

L. E. Warner, the Albany nursery man, was in the Falls City last Saturday on his way home from Nevada. Mr. Warner says while he was in Nevada he stopped at the ranch of James Richardson, who has a large hot spring in his field which he uses to hatch chickens with. By placing the eggs in a kettle and setting it in the water, it acts as a perfect incubator.

Keno School.

Sir—I send you a list of the names of the pupils of the Keno schools, who averaged 85 per cent or above, in their daily lessons, and final examinations for the past three months.

The Petrified Man.

One of California's pre-historic skeleton's which was found about six months ago by two prospectors, was on exhibition at Houston's opera house last Friday. Several old pioneers have been consulted, who say the gentleman came here prior to '49. He was found lying down and appeared to have been out of employment before Cleveland's first administration. He is supposed, by the proprietor of the opera house, to have been a native of Missouri. It may not be amiss here to speak of "petrified bodies." The nearest any human member comes to petrification is when a head receives and cherishes that old oil. Nor has wood ever turned to stone. Often water, charged with silica in solution, deposits the silica as the wood decays. In short the wood first disappears, then the silica or stone takes its place. We have all heard of mending a broken skull with a silver plate. No skull was ever mended with a silver plate. The manager of this freak show, also has an Indian skull supposed to be petrified, but to the best of our knowledge it was a large piece of putty. This is the "Gawd's" truth.

A PIONEER GONE.

Sudden Death of an Old Pioneer of Southern Oregon.

John Pearson, an old timer of Southern Oregon, died suddenly of heart disease last Saturday morning near Keno, Or., aged 66 years, 11 months and 27 days.

Mr. Pearson was on his way to the Dorris ranch with Watt Alred and wife and had stopped at the Teater's ranch Friday night. Saturday morning he went out to hitch up his team, and was standing by the wagon talking to a little girl when he suddenly fell to the ground and expired. Mr. Pearson had been troubled with heart disease for a number of years and as he was a very fleshy man, weighing about 250 pounds, these attacks were very frequent.

He was born in Tennessee Aug. 18, 1832. At the age of 20, 1852, he came to California and remained there for about ten years. In 1862 he moved to Jacksonville, Oregon, and in April, 1867, he was married to Mrs. Mary Alred of that place.

The remains were brought to Klamath Falls Saturday night and interment made in the cemetery at this place Sunday morning at 10:30 o'clock. Besides his wife and son, Harry, he leaves a large circle of friends to mourn his loss.

TIMBER GETTING SCARCE.

What an Eastern Millman Says of Oregon Forests.

The timber supply of Oregon may last 25 years yet, at the present rate of consumption, according to W. P. Bartlett, of Eau Claire, Wis., who arrived in Portland a few days ago. Mr. Bartlett is vice-president of the Grande Ronde Lumbering Company, of La Grande, and owns 100,000,000 feet of standing timber in Coos county, which he does not care to touch for several years to come, as lumber is yearly becoming more valuable, while the demand is increasing just as steadily in the markets of the world.

Mr. Bartlett says that he has not put up mills unless timber for 10 to 15 years is first secured. If a mill makes 1,000,000 feet annually, it will be necessary to secure 10,000,000 feet at least of standing timber.

The present wasteful process of sawing logs, he says, will soon have to stop. While among some Puget sound sawmills lately he noticed that they were wasting a fortune in timber every month, in throwing away slabs that should have been cut into pickets and lath, while the big circular saws, with inserted teeth, cut away 10 per cent of the log. He uses band saws altogether, and thus saves a large proportion of this waste, while the furnaces burn only sawdust, the coarser debris being sold to the beet-sugar factory at La Grande, for fuel.

Wisconsin timber is rapidly being exhausted, and the East will soon have to look to the coast for all its railroad ties and large bridge timber in the future. At Eau Claire, 10 years ago, there were 12 big sawmills in operation; now there are but three, and timber is getting very scarce and remote with these.—Oregonian.

The Workmen Lodge.

The A. O. U. W. Lodge of Klamath Falls is keeping apace with, if not leading the other Ancient Order of United Workmen lodges in Oregon in the matter of new membership. Tuesday evening eighteen out of the sixty odd applicants for membership were initiated into this, the greatest of fraternal and beneficiary orders, and within a month the lodge in this place will have a membership of over 100. Very soon a hall of its own will be constructed, and we doubt if any other order in the state can show such progress. The new officers of the lodge are: A. D. Carriek, M. W.; R. I. Hammond, P. M. W.; Ky Taylor, foreman; A. L. Leavitt, overseer; C. L. Parrish, financier; Alex. Martin, Jr., receiver; J. W. Siemens, recorder; J. W. Hamakar, guard; J. M. Fountain, J. W. James Lindsey, O. W.
