

True Economy

The difference of cost between a good and a poor baking powder would not amount for a family's supply to one dollar a year. The poor powder would cost many times this in doctors' bills.

Royal Baking Powder may cost a little more per can, but it insures perfect, wholesome food. In fact, it is more economical in the end, because it goes further in leavening and never spoils the food.

Royal Baking Powder used always in making the biscuit and cake saves both health and money.

You cannot, if you value good health, afford to use cheap, low-grade, alum baking powders. They are apt to spoil the food; they do endanger the health. All physicians will tell you that alum in food is deleterious.

The Missionary's Little Joker.
A native Maori chieftain, the descendant of cannibal kings, is now completing his medical education in Chicago. Cannibalism ended in his tribe, he says, when Bishop Selwyn converted his grandfather; but he tells some stories of it which have a distinctly humorous flavor. For instance: It is said that once a chief captured a missionary who was anything but a toothsome morsel, as he was old and thin and looked as if his flesh would be tough. The missionary warned the chief that he would not make a good dinner, and pulling up his trousers, cut a slice off the calf of his leg and offered it to the chief. The chief tasted it, said he didn't like it, and passed it to a subordinate. The sub tasted it, made a wry face, and passed it on. The next man who took a bite of it spat it out. The missionary was released. After he had gone it was discovered that he wore a cork leg.

Use of a Great Name.
Here's a tip for some of our old friends who have big names and need a little ready money: Turner Beall, president of the Produce Exchange Trust Company used to be secretary of the Produce Exchange and of the New York Southern Society. Among the men of his acquaintance he admires none so much as he does Colonel Williams Herburne Washington. A little while ago he asked Colonel Washington if he might use his name in a financial transaction. Having implicit faith in Beall, the colonel consented, and was pleased to receive a short time afterward a check for \$15,000, his share of a deal made by his friend on the strength of the name of Washington.

The Elder's Inspiration.
At the close of a forenoon session of a ministerial conference, in announcing the opening subject for the afternoon, the presiding officer said: "Elder H. will present a paper on 'The Devil.'" Then he added, earnestly: "Please be prompt in attendance, for Brother H. has a carefully prepared paper and is full of his subject." And the Homiletic Review says that it was some minutes before the presiding officer understood the laughter which followed his remarks.

Cooked Towels in Vienna.
One of the best known citizens of Santa Clara, who has been along while Europe, brings back a number of funny stories about Vienna. "In that city," he says, "poker and cocktails are playing the duce with men and women, especially these prepared cocktails. I was in a Viennese liquor place where one of the men spoke a little English. "Buy a bottle of cooked towels!" he asked me. "Gracious, what is that?" "Not know cooked towels? Surely mossier is an American?" "I am."

"Why cooked towels is the name of your drink. The great American drink." "Do you mean cocktails?" I asked. "Ah, mon Dieu, no. Cooked towels. See, here's the inscription. "We call these cocktails, my friend." "Ah, thank you, I thank you. I ask the American ladies and gentlemen to buy the cooked towels and they laugh at me. Now I know. It is cooked tails. Ah, that is good to know; cooked tails."—San Francisco News Letter.

Returned the Compliment.
The obsequious person who seeks fees from his acquaintances by pretending to mistake them for noblemen occasionally meets one who does not fall into the trap. The following example is taken from an English paper: An English gentleman of somewhat imposing personal appearance had a door opened for him at the Paris opera house by an usher, who bowed low and said: "The door is open, prince." The Englishman glanced at him, and without extending the expected fee, simply said: "Thank you very much, viscount."

In Ton Great Haste.
Wife—What's the matter, John? You walk lame. Husband—Yes, a pretty girl with fluffy hair and diamond earrings got on the car coming up, and I sprained my leg in giving her a seat.—New York World.

No One Said Nay.
"Scotland's emblem is a thistle, and her poets are fond of talking about braes," said the reckless punster. "One would judge from that that California is a paradise for donkeys."

HAS A HOUSE FULL OF HONEY.
Wisconsin Farmer Makes a Discovery in an Abandoned Building.

Mr. Whitte, a Pleasant Prairie, Wis., farmer, has more bees and honey than he knows what to do with. About two years ago a swarm of bees took possession of an old frame house on his farm and as they were not disturbed they multiplied until there are millions of them. Mr. Whitte recently made an attempt to enter the old house; he succeeded in getting far enough to find the whole interior lined with honey comb and then he made a hasty retreat. He says there must be several hundred pounds of honey there, but he does not want any of it at present. He will wait for winter before making another attempt.

The machinery molders of Pittsburgh have decided to ask the manufacturers for an advance in wages of at least 10 per cent, and the establishment of a minimum wage rate of not less than \$2.75 per day. The attendance numbered over 300, representing every machine shop in the city and almost 1,000 skilled mechanics. The molders have made no demand for a wage advance since 1898, when they won their fight after a short strike. Since that time wages have gone up and down, and all semblance of uniformity has been obliterated. Some of the shops are paying as high as \$3 a day, while others pay 40 to 50 cents less.

An ordinary dinner-table wine glass was recently broken by singing. The man who did it had a deep, full voice. He set the glass on the table, stood beside it and ran up and down the scale as though in search of a note. When he settled on one rather high the glass shook visibly. The note was repeated, sung as loudly as possible, and finally the glass shattered and crashed into bits.

The lily of the valley contains prussic acid. It is thought dangerous to put the stalks in a person's mouth, because if the sap chances to get into a crack in the lips an annoying swelling is produced.

A MAGNIFICENT WOMAN.
Holds Up Peruna as the Ideal Remedy for Female Catarrh.

Mrs. Clara Makemer, housekeeper for the Florence Crittenton Anchorage Mission, of Chicago, writes the following letter from 302 Chestnut street, Chicago: "Peruna is the best tonic I have ever known for general debility, a sure cure for liver complaint, and a never failing adjuster in cases of dyspepsia. "I have used it in cases of female irregularities and weak nervous system to the sex, and have found it most satisfactory." From early girlhood to the end of the child-bearing period few women are entirely free from some degree of catarrh of the pelvic organs. With Peruna the thousand and one ailments dependent upon catarrh of the pelvic organs can be wholly averted. "Health and Beauty" sent free to women only, by The Peruna Medicine Co., Columbus, Ohio.

The Grand Breach.
One of the Bohemian citizens of the town went home the other night after having donned a pair of skates that would have slid him over an Arizona desert with the mercury bubbling out of the top of the thermometer. He had no recollection of how he got home and even the next morning he was not certain whether he was on a storm-tossed Atlantic liner or making a leap from a balloon minus a parachute. He went down to the breakfast table with enough wet towels wrapped around his head to make a turban for the mahdi. His wife met him with reproaches in her eyes, but she did not scold him. She wanted to inform him of his conduct the night before, however. "My dear," she said, "did you know that you came very near killing us all when you went to bed last night?" "Nope," said her husband, thickly, as he felt his hot forehead. "Well, you did. You knocked over the baby's cradle. Then you blew out the gas and we were nearly asphyxiated. What do you think of that?" Her husband is usually a resourceful man, but the fumes of many cocktails taken the night before somewhat clouded his intellect. He made a grand breach and tried to look pathetic. "M'love," he said, as a ray of inspiration burst through his foggy brain, "wasn't I here to die with you?"—Washington Post.

Vanderbilt an Inventor.
"She works, Mr. Waite," said Cornelius Vanderbilt, Jr., as he entered the office of the superintendent of motive power of the New York Central railroad. He had just come down from Albany, where locomotive No. 947 had been tested to see if the fire box invented by Mr. Vanderbilt was a real fire box or only a toy. The young scion of the great rail-roading family ran the locomotive himself. It was built at the company's shops at West Albany, and it made its first trip on Wednesday afternoon. The Vanderbilt fire box can be easily taken out for repairs and put back again. This is an improvement over fire boxes in use at present, which cannot be extracted under 10 days. Young Cornelius, the inventor, is a draftsman in Mr. Waite's office, and has designed several locomotives.

Explosives.
Thirty years ago there were only two dozen explosive compounds known to chemists; now there are over 1,000.

Passing of the Horse.
So soon as nature sees an improvement there is a change. The candle gave way to electricity and the horse to the automobile. The fact that Hostetter's Stomach Bitters has been sold for over half a century proves its value. There is nothing to equal it for stomach or liver trouble.

The Old Man Caught.
The Father—Young man, I think I heard you kissing my daughter in the parlor a short while ago. The Young Man—Oh! then you are not as deaf as people think you are, after all?—Yonkers Statesman.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly extending their operations to other parts of the system, have done great injury to the general health. The only constitutional cure on the market is taken internally, and acts directly on the mucous surfaces of the system. They offer one hundred dollars for any cure not effected by Dr. HENRY & CO., Toledo, O. Sold by Druggists, 75c.

Literary Switzerland.
A French statistician records that Switzerland produces annually more books than any other country in proportion to the number of inhabitants—namely, one to every 3,000. Germany comes next with one to every 3,200; Italy with one for 3,300; France one for 3,500; England one for 6,500 and the United States one for 12,400.—Pittsburg Post.

Improved Train Equipment.
The O. R. & N. and Oregon Short Line have added a buffet, smoking and library car to their Portland-Chicago through train, and a dining car service has been inaugurated. The train is equipped with the latest chair cars, day coaches and luxurious first-class and ordinary sleepers. Direct connection is made at Chicago with the Union Pacific, and at Ogden with the Rio Grande line, from all points in Oregon, Washington and Idaho to all Eastern cities. For information, rates, etc., call on any O. R. & N. agent, or address W. H. Hurlbut, General Passenger Agent, Portland.

For 19 years the left arm of Eli Forbes, of East Brimfield, Mass., had been eased from rheumatism. He was sitting at his window one evening recently when a thunderstorm arose. A flash of lightning seemed to play about his affected arm, causing a shock and prolonged pricking sensation. In an instant the arm shot forward involuntarily, and from that time it has been as well as ever. Beginning Tuesday last, the Denver Overland Cotton Mills put on a double shift of workmen in response to the demand for low grade cotton stuff throughout the country. The company will run day and night. The former force was 250 employees, but this will be doubled as rapidly as the works can be adjusted to the new conditions.

The Unpardonable Breach.
"Maud, would you like to sue a man for breach of promise?" "Not unless the promise he had made was to buy me ice cream."—Chicago Record.

ACTIVITY IS WIDESPREAD.
Volume and Value Testify to Prevailing Prosperous Conditions. Bradstreet's says: Trade activity is widespread, all volume and value testifying to prevailing prosperous conditions. Only good trade centers, and some markets report tall demand as holding out longer than expected. Railway earnings, bank clearings, returns and quotations of staple prices are all encouraging, pointing as they do to a maximum volume of business for this period of the year. Crop returns for October bear our earlier impressions of shortened yields of most leading agricultural products. Expectation of more moderate yields of leading cereals is not confined to this country; the world's wheat crop will admittedly be smaller, and rye, barley and oats yields are not expected to be so large as a year ago. The higher range of prices of all staples, and particularly of agricultural products, will furnish a profitable balance of producers. The liberality of foreign demand is, perhaps, best known in the September report of exports of leading products. Shipment of breadstuffs are as large as those of August, and there was naturally a heavy gain in cotton exports, which are doubled those of the same month a year ago. Totals of leading exports show an increase of 23 per cent over September, 1896, but a decrease of 8.5 per cent from September 1897, which witnessed very heavy shipments of breadstuffs. Wheat, including flour, shipments for the week aggregate 5,203,634 bushels, against 5,183,308 bushels last week, 4,729,998 bushels in the corresponding week of 1898, 5,549,720 bushels in 1897, 4,156,817 bushels in 1896, and 2,409,446 bushels in 1895. Business failures in the United States number 164, as compared with 146 last week.

Scarcely any German soap comes to this country. England is Germany's best soap customer, and last year bought 2,250,000 pounds out of a total export of less than 5,000,000. In 1898 Germany's exports of perfume amounted to \$2,250,000, a gain of almost \$500,000 over 1897.

Secret of a Girl's Beauty

Dr. Williams' Pink Pills for Pale People. For over two years my daughter had been declining from a strong, healthy, rosy-cheeked girl to a pale, weak and helpless invalid. She was afflicted with chronic headaches, languid, apparently without cause. I tried several doctors, but all without avail. Finally, to please a friend, I bought a box of Dr. Williams' Pink Pills for Pale People, and to our surprise, before it was used her headaches ceased, the color began to return to her cheeks and lips and her strength began to assert itself. I think she had finished them all, she was completely restored, and today she is a rosy, healthy girl instead of a pale, weak and sickly one. From the Oregon Independent, Salem, Ore.
