"It is an It Wind That Blows Nobedy Good."

That small ache or pain or weakness is the "ill wind" that directs your attention to the necessity of purifying your blood by taking Hood's Sarsaparilla. Then your while body receives good, for the purified blood goes tingling to every organ. It is the remedy for all ages and both sexes.

IMPROVED TOURIST SLEEPERS.

Railroads Are Acceding to Demands o Middle Classes Who Want Better Sleeping-Car Service.

In response to the demand of the times the O. R. & N. and its connections are placing in operation a much better grade of tourist sleepers for Pacific coast service than at any previous time. The largely increased traffic to this section of the country has demanded all the improvements of latterday transportation, and in consideration of tihs the railroads are establishing a service which is excellent in every particular. Not only are the wishes of the first-class passengers served, but those who are traveling to and from the East on second-class tickets are splendidly cared for. There are was a time when a tourist sleeper appealed to a limited number of people who were traveling on the "cheap" order, in every meaning of the term. Now, however, there has been a radical change. With the better tourist sleepers in operation the class of passengers has been improved, and one may now travel upon them and enjoy all the privileges of a first-class sleeper at a greatly reduced rate.

Daily, on the O. R. & N. Eastbound fast mail, is attached one of these latest improved tourist sleepers, a model of beanty and handsome appointments. The new cars are almost an exact counterpart of the first-class sleepers.

One noticeable feature of the new tourist cars is the absence of a smoking spartment. The new cars being built by the Pullman Company are not porvided with smoking apartments. This new departure has been taken because of the fact that most through trains are provided with composite cars, which provide a smoker for the sleeping-car passengers.

Kit Carson's tifle, which was carried by him for more, than 40 years, is now in the possession of the Montezuma lodge of Masons, at Santa Fe, of which lodge Kit was a member.

\$100 REWARD \$100.

The readers of this paper will be pleased to parn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional dis-case, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the founda-tion of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The pro-prietors have so much faith in its curative of the disease and giving the foulars for any case that it fails to cure. Send for list of testimonials. Address F. CHENEY & CO., Toledo, O. TRANSPORTATION INADEQUATE. MINES OF ALASKA.

Favorable Report From Head Waters of the Big Horn-Glowing Reports From the Porcupine.

Herman Olson has returned to Skagway from the headwaters of the Big Horn river, which empties into Taku Arm opposite the Golden Gate. He found a foot or 14 inches of snow at Ptarmigan pass on his return, and a week ago there was even more of it in the Big Horn mountains. While the snow was too deep for Olson to reach the highest point desired, he was fortunate enough to find another copper and gold ledge, which is from 25 to 50 feet in width, and carries ore which looks remarkably similar to the wonderful rock taken from the famous Engineer's group on Taku Arm. Olson staked four claims for his principals on this ledge.

Cook's Inlet Country.

John W. Cliff and Captain S. B Johnson and wife, have just arrived at Skagway from Cook Inlet. "We left Sunrise City, Cook Inlet, September 15," said Mr. Cliff, "making the trip down in 14 days. The mining season for that part of the country had about closed when I left. This has been one of the most favorable seasons, so far as climate conditions are concerned, ever seen in that country. But few, if any, new gold discoveries have been made reported. on the Kenai peninsula this season. The old established mines have been resonably successful. Mills creek, Lynx creek, Granite creek and Upper Six-Mile river, may be mentioned among those that have produced well in

the Sunrise mining district. They are all sluicing propositions. The properties mentioned have yielded all the way from \$8 to \$100 per day to the man for part of the season. The Turnagain Arm district has several paying streams, among which are Resurred tion, Bear, Palmer, California, Gla-

cier, Indian and Crow creeks."

Fortune in Gold Dust.

There came to Skagway the other day 11 boxes of gold dust, each weighing nearly 400 pounds, and the whole valued at \$750,000. The gold dust was brought out by the Flyer Line Steamboat Company for the Canadian Bank of Commerce, and on its arrival there was taken to the Brannick hotel and deposited in the downstairs front room, in which a bed was laid for the guards. H. E. Rudd and G. H. Burns, who have lived with it ever since it left Dawson. Rudd and Burns were formerly mounted Policemen and went in with Major Walsh in 1897, when Rudd remained in this town for nearly a year. These men say this is certainly the largest shipment of dust that ever came out this way, and they believe it is the largest single shipment that ever left Dawson.

now at work on the tunnel: but this is not likely, as the engineer has scarcely had time to make the exact location of that important piece of work. A large stock of supplies has already been

taken out to the new station, and several pack animals are employed in taking out further supplies.

When Navigation Closes.

Charles Sperry says the Yukon was closed by ice at an unusually early period last year. He says that in 1886 he was at the mouth of Stewart river on the Yukon, and the river did not ton close that year until on Thanksgiving day, November 24, on which day three scows, bringing 13 men, arrived at Stewart river. On November 10, 1888,

Mr. Sperry and another man, took their dog team in a boat and started for Circle City, but on the 13th of the same month they were blocked by ice at the mouth of the Klondike river. From these experiences it appears that there have been years during which naviga-tion was open much later than last year, when it closed at Dawson, November 8.

Bennett Is Booming.

Bennett is experiencing a great boom, says the Skagway Alaskan. The whole lake shore is lined with men building scows and there are not enough restaurants to feed the people. All kinds of business is flourishing, and it is probable that things will re-

main in this state until the close of navigation. Conditions at Dawson.

Private telegrams were received by E. S. Busby, Canadian customs inspector in Skagway, saying that Dawson was enjoying fine weather and excellent business. His advices also conveyed the information that there is a scarcity of socks, potatoes, hay and oats in the Klondike capital. A great deal of provender is passing through Skagway, but most of the hay and oats is for the Canadian Development Company. Within the last two weeks over 200 tons of hay have gone forward from Skagway.

Likes the Porcupine District.

J. A. Cameron, who was for six years deputy warden of the state penitentiary at Walla Walla, has just returned from a 10 days' trip to the Porcupine district, with which he is very favorably impressed. Mr. Cameron was accompanied by his brother-in-law. T. D. Stewart, who was so much taken up with the different mining propositions on Porcupine and McKinley creeks that he concluded to remain a week or 10 days longer in that country, reports the Alaskan.

Passengers from Atlin report that about 175 miners came out from the Atlin district in one day recently, many of whom remained at Bennett. A large number of these were not in flush circumstances, and not a few of them will turn their faces toward Dawson, now that the bars are down.
