Like the Deadly Under-Current

which grasps one without warning, the mucous membrane which lines the entire body suddenly becomes weakened in some spot and disease is established. It may be of the lungs, the head, throat, stomach, bowels, or any other organ. Wherever it is, and whatever it seems, it all springs from the same cause—

CATARRH

or inflammation of this delicate pink membrane.

The system is weakened in winter. The delicate lining is more susceptible to irritation or inflammation, and thus we have pneumonia, grip, colds, coughs, fevers, etc., all catarrhal conditions which may easily be checked by one catarrh cure—Pe-ru-na.

That's the only way out of it. You may dose forever—you will not be well until you try the true cure and that is Pe-ru-na. You may think your trouble is some other disease and not catarrh. Call it what you will, one thing is sure, your system is affected and must be treated, and Pe-ru-na is the only remedy which reaches the right place and *does* cure.

MINING NEWS OF NEARBY STATES

BIG PLANT FOR HECLA.

Twenty Drill Compressor and Large Hoist Going In.

Burke, Idaho, August 9.—The Hecla mine, near here, on Canyon creek, in the Coeur d'Alenes, which reently paid its first dividend of $20,000, has under way extensive improvements. The company is putting in a plant for its eventual operation at 2,500 feet depth. This plant would include two 400-horse power boilers a compressor plant with a capacity of 20 drills and a hoist that could operate the mine to the 2500-foot level The installation of these improvements has been under way for some time. The large buildings for the reception of the plant are practically completed the boilers and compressor are on the ground and the work of putting them in place is going on rapidly.

It is expected that the entire new plant will be in operation by September 1. In the meantime the work of developing the mine is going forward rapidly and about 1,000 tons of concentrates a month are being shipped. The main shaft in which the big hoist will be operated is to be sunk to the full 2,500 feet, though operations will not be confined to this work. The ore bodies will be opened and mined at the successive levels as depth is attained.

TO OPERATE THE HEADLIGHT.

Coeur d'Alene Property of Remarkable Promise to be Worked.

Wallace, Idaho, August 9.—The Headlight Mining Company will soon let a contract for the running of a 600-foot crosscut tunnel to tap its vein 400 feet below the surface. The property lies immediately west of the Mammoth and covers the same vein. It will be opened by a crosscut tunnel half way up the mountain side from Canyon creek to the cropping of the ledge, cutting about 1,500 feet west of the Mammoth where there is a blow-out, indicating ore below. No work of consequence has ever been done on it, although ore has been found near the surface in two or three different places. It has been held for years by some prospectors who were not willing to part with it at any price which mining men were willing to pay.

Iowa Capital in Hoodoo.

Palouse, Wash., August 9.—W. J. Springer, of New Hampton, Ia., writes from there that he has secured capital to work the Blue Bird and eight claims in the Hoodoo district. He has employed M. W. Truax as manager of the mine and authorized him to begin work at once and push development.

Mr. Truax put a double shift to work and the property will be thoroughly developed. The Blue Bird is a copper property showing high values, and now that capital has been secured to develop it is expected to become a valuable producer.

James Malone reports a rich strike in the Elk creek disrict in Idaho on Breakfast creek. The rock carries good values in gold and copper.

STRIKE ON SILVER MOUNTAIN.

Another "Mere Chance" Fortune Stumbled Onto in Canada.

Spokane, August 9.—The Thompson boys have made a good strike on the Silver Mountain claims, in the Slocan district. After long prospecting, Russ Thompson stumbled upon a very fine looking ledge. This was exploited further with the result that one of the finest surface showings of galena ore ever shown in the camp was uncovered. It is from six to 18 inches across and chunks of ore weighing hundreds of pounds can be taken out with a pick. Three claims are embraced in the group, the Sinfi, Atwood and World.

PRESTON PEAK COPPER MINE.

Development Work Is Being Pushed on That Property.

Ashland, Or. August 9.—The Ashland Tidings says that Schoonover & Young, New York capitalists, represented by Henry Phillips, have spent $150,000 in the development of the Preston Peak copper mines. Work is being pushed on a 200-foot drift. The rock is very hard. Some of the ore assays 22 per cent in copper, $4 in gold and a trace in sulphur.

OREGON WONDER TO START.

Contract to Run a Tunnel Will Be Let at Once.

Prairie City, Or., August 9.—P. J. Morey and Elmer Cleaver have gone to the Oregon Wonder mine and will at once let a contract for running 300 feet of tunnel on the mine, to be completed with all possible haste.

New Company at Wallace.

Wallace, Idaho, August 9.—The Cathella Mining and Milling Company has filed articles of incorporation at Wallace. G. A. Cunningham, Patrick Sullivan, Adam O'Donnell, J. W. Weyer and Joseph F. Whelan are the incorporators and directors. Wallace is the principal place of business and the capital stock of $50,000 is divided into 1,000,000 shares.

Klondike Gold Shipments.

Seattle, August 9.—Gold shipments through Skagway from the great Klondike camp to the outside world this season have reached in round numbers more than $7,000,000.

BRIGHT CARBONATE MINE.

Property in the Greenhorn District That Looks Good.

Pendleton, Or., August 9.—Parties from the Bright Carbonate, located in the Greenhorn mountains, near Lawton, and owned by George Darveaux, Henry Kopittke, Frank Duprat, John Siebert and others, of Pendleton, report a rich strike in that mine in the face of the 160-foot tunnel. The vein has been penetrated 2½ feet and shows high values.

Midas Mine at Elk City.

Boise, Idaho, August 9.—Jesse Coulter has returned from a trip to the property of the Midas Gold Mining Company at Dixie, 26 miles from Elk City, Idaho. Eleven men are at work, and Mr. Coulter reports that the property is looking fine.

In the Summit District.

Seattle, August 9.—A number of locations are being made in the Summit district, on the Cascades. The numerous discoveries in that district are exciting lively interest in the Yakima valley.

SLOCAN IS ON THE JUMP.

Nearly All the Mines Are Again Shipping Ore.

Sandon, B. C., August 9.—Nerly all the mines around Sandon are shipping again. The Idaho sent out 500 tons in July of high grade ore, and will do better in August.

The Payne shipped about 1,200 tons in July, and has paid its quarterly dividend of 3- per cent. The Truth, Queen Bess, Whitewater, Slocan Star and Rambler-Cariboo are regular shippers.

The Ruth mill in Sandon is running double shift and the company is putting in two more Whitley tables, these doing better work than the round tables. It is shipping about 200 tons of good grade concentrates per month.

Sandon is building up rapidly. About 900 men are on pay rolls in and around Sandon.

PLANS FOR GOLDEN ZONE.

Capacity Will Soon Be 100 Tons of Ore Daily.

Loomis, Wash., August 9.—At the Golden Zone plans have been completed for increasing the capacity of the mill to 100 tons daily. The necessary machinery has been ordered and the work of adding to the present mill structure for its accomodation begins at once. The Golden Zone is so thoroughly opened up that it will be able to supply the daily mill run with a minimum force. Continuous development of the ore bodies will go steadily forward though there is more than 100,000 tons of ore in sight.

The management proposes to increase the capacity of the mill from its profits until it can treat 500 tons daily. That a mine of this character could in three years be brought to such a high stage of development, show quantities of ore and be scarcely known outside of the district tells the story of the quality of work being done at a dozen properties in the Palmer Mountain district. Mill runs up to date have averaged about $10 per ton, and this is probably a good average of the mine.

Silver King Again Going.

Seattle, August 9.—Captain Gifford, who has been appointed mine manager of the reorganized Hall Mining and Smelting Company, proposes to justify the faith which he has had in the Silver King as one of the great mines of British Columbia. He has an extensive programme of development mapped out and within a short time he expects to have 500 men at work in the company's property. A small force will go to the mine and get things in shape. Electric power instead of steam power may operate the mine machinery and possibly the smelter.

Kellam's Camp Is Next

Helena, Mont., August 9.—W. Kellam and J. D. Bone, two Montana prospectors, own a group of six claims on the eastern slope of Eureka mountain, two and one half miles from Grand Forks, B. C., that are attracting considerable attention, and are regarded as of considerable promise. There is a well-defined quartz ledge on the Laconia. It averages about 20 inches wide. A shaft has been sunk to a depth of 25 feet. The foot wall is in granite. Assay returns gave small values in gold and copper and it is expected that they will improve with depth.

FAMOUS MONUMENTAL MINE.

Likely to Start Up With a Good Force of Men.

Baker City, Or. August 9.—It is currently reported that the once famous Monumental mine, eight miles north of Granite, now idle for five years, is to be started up shortly with a force of 100 men. C. S. Miller, the principal owner of this property, will neither confirm nor deny the report.

Showing of Ignorance.

By the printed reports of a recent examination of applicants for positions in the census office at Washington an astonishing amount of ignorance is shown to exist among the applicants They are especially and funnily ignorant, says the Washington Star, regarding the famous men of history—as to the time in which they lived and as to what they accomplished. Fifty-two persons entered the competition and only 14 reached a percentage above 90, while 19 failed entirely. Some of the answers would be taken for jokes did they appear anywhere else than in a department report.

There was Jefferson Davis, for instance, who was placed on record by one applicant as "a famous general of the war of 1812." Another stated that Mr. Daivs "was president of the United States and wrote the declaration of independence." The first postmaster general was another who worried the applicants considerably. One man suggested George Washington, another Patrick Henry, and a third Wendell Phillips. A young southerner disposed of all argument by stating that it was "a gentleman named Bissell."

William Cullen Bryant, whose boast was, "I am a bookman," had his identity mixed with that of the Nebraska orator by a young woman, who stated "William Cullen Bryant was the Democratic candidate for president, a silver advocate and a resident of Nebraska." And even Abraham Lincoln appeared to be examined in varied lights. Here are some of the answers to the inquiry concerning him:

"Lincoln was a great general and distinguished himself in the war of 1812."

"Abraham Lincoln was a personal friend of the colored race and was one of the signers of the declaration of independence."

"Abraham Lincoln was born in Illinois, where he worked from rosy dawn till dewey eve as a farmer's lad until he became president."

Steamers operated by the O. R. & N. Co. between Portland and San Francisco have been patronized liberally on every trip this summer. The trip down and back can be made for $24. That small amount includes meals and berth, with everything first-class, and the best possible attendance. Steamers leave Portland every fifth day, at 8 P. M. The round trip from Portland to San Francisco and return, can be made in eight days, giving nearly four full days in San Francisco for sightseeing or business.

Belgium's census was taken on the last day of last year, and the general results as regards population have just been made public. The population of the kingdom is 6,744,532, consisting of 3,363,436 males and 3,381,096 females. Officially Antwerp is the most populous town, with 282,318 inhabitants; Brussels follows with 201,065.

Some farmers who broadcasted cow peas this season sowed oats with the peas. As the cow pea is really a bean and supports are not required, the oats are injurious, as the cow pea will thrive much better when given the land alone. If oats are wanted they should always be seeded in another field.

An Unselfish Nature.

"When I get to be a man," said the boy, who has a good memory for phrases, "I'm going to strive to cultivate an unselfish nature."

"That's right," replied his father. "How are you going about it?"

"Well, in the first place, if I have any little boys, I'll let them shoot their own fireworks, instead of telling them they must let me do it, for fear they will hurt themselves."
