

Mrs. Pinkham

The one thing that qualifies a person to give advice on any subject is experience—experience creates knowledge.

No other person has so wide an experience with female ills nor such a record of success as Mrs. Pinkham has had.

Over a hundred thousand cases come before her each year. Some personally, others by mail. And this has been going on for 20 years, day after day and day after day.

Twenty years of constant success—think of the knowledge thus gained! Surely women are wise in seeking advice from a woman with such an experience, especially when it is free.

If you are ill get a bottle of Lydia E. Pinkham's Vegetable Compound at once—then write Mrs. Pinkham, Lynn, Mass.

According to a return of the imperial customs authorities the total number of foreigners resident in the open ports of China, was 13,421 at the end of the year 1898.

tripping feet—the sparkling eye—the graceful movement—be-long not alone to the budding maiden. These graces are the right—aye duty of every woman until the hair whitens—and regal dignity replaces them. The mother who guards her strength has so much more to devote to the care and education of her dear ones. She should be a comfort—a cheer—always. Yet how many feel that they have the strength to properly balance the home? The world is listless, weary and morbid. Its blood flows sluggishly and is full of impurities. It needs a kindling, invigorating tonic to set it afire—it needs Pe-ru-na.

THE ONE MEDICINE in the world which women may rely upon positively. Pe-ru-na is good for everyone, but particularly for women. The various weaknesses which afflict the delicate organism spring from inflammation or catarrh of the mucous lining, and Pe-ru-na is a specific for catarrh in any organ of the body. Any congestion of a mucous membrane simply means catarrh of the organ affected. This is why Pe-ru-na cures all sorts of troubles where there is a specific for catarrh of any organ. The matter with you anywhere Pe-ru-na will cure you.

PE-ru-na'S CURE FOR BRUISES WHERE ALL ELSE FAILS. It cures Bruises, Swellings, Sprains, etc. Sold by druggists.

MINES AND MINING.

Sam Archer On "Cold Feet"—Says Some In Both Over and Under Frayed—A Great Country.

Samuel Archer, well-known in Seattle, in a letter from Nome, states that he is well and very busy. The following extracts from the letter are interesting:

"Lots of tents; lots of substantial buildings; a long, narrow, sandy, crooked main street, with buildings set in irregular fashion on either side; a number of other tents, then the tents stretching away for several miles along the shores of Behring sea; enough saws to supply the thirst of all the United States, with gamsters and scarlet-gowned women to match; dozens upon dozens of stores, eateries, cigar stands, lemonade and candy bazaars, scores of men peddling about the beach and streets trays filled with taffies, fresh vegetables, milk and so forth—and all the rest that goes to make a great big fair, populated by some 15,000 people, half of whom are in a terrible hurry, the other half lolling with every appearance of being dead for about four inches in from the outside all over themselves, and all ditty as the devil—that's Nome!"

"The mineral wealth of this country and its permanence as a place of residence is just now receiving a black eye by the many adverse reports being carried out by people with 'cold feet.' These reports do the country as great an injustice as have the willfully exaggerated reports of fabulous fortunes to be picked up here. The glowing reports brought here thousands of people who have no business in a mining camp, where hard work is required. They know nothing whatever of mining or prospecting; they do not even go out to the creeks or far along the beach, and are very easily discouraged when rubbed up against the rough life of a new country. Coming here 'to mine,' they exert no further effort in that direction than to make a few inquiries about the experiences of others, dig up a few hard-luck stories, then mope around cursing the country. Possessed of an idea upon landing that mining on the Nome beach consists of scooping into a sledge hearing shovels of gold dust and separating therefrom a few stray grains of sand, they collapse completely when the prosaic truth dawns upon them that mining here requires the same labor, sweat and worry that is required in other districts. It is no exaggeration to affirm that there is more sand than gold on the Cape Nome beach! All the 'sour doughs' here know that; let the chieftains take warning and gauge their expectations accordingly."

TROUBLE FEARED. Another Clash Expected Over Topkuk Tundra Claims.

More trouble is anticipated at Topkuk according to northern advices, between the soldiers, who are still on the ground, and the prospectors. Over 100 of the miners were arrested and 20 ringleaders taken to Nome for trial during the trouble previously. Later a sort of truce was effected, whereby the miners were allowed to work out some dumps they had on the disputed tundra. Now, however, that these dumps are about worked out, the miners are not willing to stand by the terms of the truce and will, it is said, make another attempt to work on the disputed ground, owned by the Alaska Commercial Company. The tundra strip over which the dispute arose is said to be the richest ground ever discovered in the North for its extent. It is quite shallow, but carries even higher values in several well defined pay streaks than the famous Topkuk beaches.

Farmers about Silveston, Or., are reported to hold the opinion generally that the winter insects contributed to the damage, the principal cause for shortness of the grain yield is rust.

Payette, Idaho, has supplied a large part of the cataloupes sold in Portland, Or., this year.

A new sawmill has been started at Coeur d'Alene, Idaho.

Idaho's state fair will be held at Boise, Sept. 8 to 13.

ALL ARE EAGER TO BUY.

Country is Actively Preparing for the Fall Trade.

R. G. Dun & Co.'s weekly review of trade says: After a great wave of advancing prices, optimism as to business is generally dangerous. But the top was reached the middle of March, since which time reaction has come to every asking whether in some directions the decline may have not been reasonably large as was the advance, and whether buying on the present basis of prices is not fairly sure. There are fresh evidences of weakness in raw materials, notably the break in structural iron, but each one is availed of to place heavy contracts. New York is welcoming buyers from all over the country in larger numbers than for many years at this season, in drygoods, groceries, in jewelry and in hardware, and if contracts are not placed to as large a volume as expected, it is because of the conservatism of those who think they may compel some further shading of prices. Reports this week from other important points of distribution show the same eagerness to buy when the time seems right. It is becoming more apparent that the bottom has been reached in prices of iron and steel. The decline was severe and recovery must be slow, but gradual advance and moderately increasing activity are more healthy than violent changes. In no single division is the improvement more striking than in any other. Except steel rails, all forms of iron from the ore to the finished product are being sought more eagerly and with less effort to secure further concessions in prices, but when the secretary of agriculture was reported as predicting "dollar wheat" before the end of the year, the market showed an inclination to disagree, and the September option fell below 80 cents for the first time in two months.

BAD BLOOD, BAD COMPLEXION.

The skin is the seat of an almost endless variety of diseases. They are known by various names, but are all due to the same cause, acid and other poisons in the blood that irritate and interfere with the proper action of the skin.

To have a smooth, soft skin, free from all eruptions, the blood must be kept pure and healthy. The many preparations of arsenic and potash and the large number of face powders and lotions generally used in this class of diseases cover up for a short time, but cannot remove permanently the ugly blotches and the red, disfiguring pimples.

ETERNAL VIGILANCE IS THE PRICE OF A BEAUTIFUL COMPLEXION when such remedies are relied on.

Mr. H. T. Shore, 294 Lucas Avenue, St. Louis, Mo., says: "My daughter was afflicted for years with a disfiguring eruption on her face, which resisted all treatment. She was taken to two celebrated health springs, but received no benefit. Many medicines were prescribed, but without result, until we decided to try S. S. S., and the time the first bottle was applied the eruption began to disappear. A dozen bottles cured her completely and left her skin perfectly smooth. She has since used S. S. S., and now a bright, clear complexion is hers forever."

S. S. S. is a positive, unfailing cure for the worst forms of skin troubles. It is the greatest of all blood purifiers, and the only one guaranteed purely vegetable. Bad blood makes bad complexions. S. S. S. purifies and invigorates the old and makes new, rich blood that nourishes the body and keeps the skin active and healthy and in proper condition to perform its part towards carrying off the impurities from the body.

If you have Eczema, or your skin is rough and pimply, send for our book on Blood and Skin Diseases and write our physicians about your case. No charge whatever for this service.

Cape Nome is situated on the shores of Behring sea at the mouth of Snake river, Seward peninsula, central-western Alaska, U. S. A., 65 degrees north latitude and 166 degrees west longitude, and, by ocean route, distant from its base of supply, Seattle, 2,700 miles. In making the ocean trip from Seattle one steams westward for 1,900 miles across the North Pacific ocean to Dutch Harbor, on the Aleutian archipelago, and thence northward 800 miles to the land of gold, passing en route the government's sealrookeries on the Pribilof islands.

In Utica, N. Y., a block of new apartment houses has just been furnished with a complete installation of electric cooking utensils in each flat. The electric kitchen furniture consists of three round platters or "stoves," an oven and a broiler. It is declared that meats broiled on the electric gridiron are much more palatable than those scorched and charred over red hot coals. The electric "stoves" are placed on an ordinary kitchen table when in use, and when their work is over, they are stowed away in a drawer or on a shelf.

A new use for the phonograph has been found in New South Wales. A candidate for office found it impossible to visit all parts of the sparsely settled region he wished to represent in the legislature, dictated his speech into a phonograph, had an orchestra play a few pieces into the machine, and then sent a number of the machines over the country in the hands of political workers. He sent a picture of himself with each machine, and had the workers give the people a description of his life and his ability. That man does serves success.

Siberia is not such a desert as you may think. The limited traffic on the Siberian railway have most everything one could ask for in the way of comforts. They have a library, a piano, a barber shop, a gymnasium, hot water as well as ice water, double windows to protect the passengers from dust, heat and cold, a writing room with all necessary materials, and an observation car at the end of the train. Each train has a doctor, who remains aboard to administer to the care of passengers free of charge. The time from Irkutsk to St. Petersburg is seven days.

A vagrant lad was arrested in Philadelphia the other day for some misdemeanor, and in response to the questions of the police justice, he declared that he was 14 years of age and an orphan. "How long have your parents been dead?" asked the sympathetic justice. "Over 20 years," was the prompt reply of the little lad.

The police force in London is an army in itself. An official report issued by the city shows that the force numbers 13,564 men. That is 19 policemen to the square mile.

Supreme Court Sustains the Foot-Ease Trade-Mark.

Justice Laughlin, in Supreme Court, Buffalo, has ordered a permanent injunction, with costs, to issue against Paul B. Hudson, the manufacturer, of the foot powder called "Foot-Ease," and also against a retail dealer of Brooklyn, restraining them from making or selling the Dr. Clark's Foot Powder, which is declared, in the decision of the court, an imitation and infringement of "Foot-Ease." The powder for tired, aching feet to shake into your shoes, now so largely advertised and sold all over the country, is the owner of the trade-mark "Foot-Ease," and he is the first individual who ever advertised a foot powder extensively over the country. He will send a sample free to any one who writes him for it. The decision in this case upholds his trade-mark and renders all parties liable who fraudulently attempt to profit by the extensive "Foot-Ease" advertising, in placing upon the market a spurious and similar appearing preparation, labeled and put up in envelopes and boxes like Foot-Ease. Similar suits will be brought against others who are now infringing on the Foot-Ease trademark and common law rights.
