## A Baffied Tigress.

An officer of the Bengal Lancers, who was seized by a tigress, owed his ecape to a curious accident. The tigress seized him by the breast of his coat and shook him till he became unconscious. On recovering he heard a strange noise at a little distance, as if somebody was sneezing violently. It was the tigress berself. He slowly turned round and gave a furtive glance in that direction.

He could hardly believe his eyes. There was the tigress slinking off with her tail very much between her legs and sneezing most violently and making the most piteous grimaces. The truth dawned upon him like a flasn of lightning. In the operation of shaking him his snuffbox had flown open from his waistcoat pocket, and the tigress had received the contents thereof full in her face.-Cornhill Magazine.

"I suffered with inflammation and falling of the womb and other disagreeable female weaknesses. I had bad spells every two weeks that would last from eight to ten days and would have to go to bed. I also had head-ache and backache most of the time and such bearing down pains I could hardly walk across the room at times. I doctored nearly all the time for about two years and seemed to grow worse all the time until last September was obliged to take my bed, and the doctors thought an operation was the only thing that would help me, but

this I refused to have done.

Then a friend advised me to try the Pinkham medicine, which I did, and after using the first bottle I began to improve. I took in all five bottles of Lydia E. The diseases most feared are those which are inherited—handed down from generation to generation, and family to family. By far the most destructive of these is Cancer, which finds the greatest number of its victims among the children and grand-children of those whose blood was tainted with this dreadful malady. You may carry this poison in the blood for years, but as the vital powers begin to wane a slight bruise or cut, wart or mole, sore or pimple may develop into Cancer. From middle life to old age is the time when the slumbering poison is most apt to break out, a sore or ulcer often degenerating into Cancer, and Tumors become more progressive and ulcerate through the skin, the sharp, shooting pains causing the most intense suffering.

The Cancer patient naturally grows despondent as one after another the usual remedies fail, and the sore shows no sign of healing. The impurities that have been accumulating in the system, perhaps for generations, cannot be eliminated nor the poisoned blood made pure by salves, washes and plasters. The proper treatment is to purify and build up the blood, remove the cause, when the sore or ulcer heals.

Mr. J. B. Arnold, of Greenwood, S. C., writes: "A tiny ulcer came, just under the left eye. It began appreading, and grew worse rapidly, destroying the virus, stops the formation of Cancerous cells and cleanses the virus and finally ceased altogether, the sore dried up the virus of impurities. What we say of S. S. S. as a cure for Cancer is supported by the testiment of the blood is so polluted and the system so thoroughly saturated with the wait until the blood is so polluted and the system so thoroughly saturated with the wait until the blood is so polluted and the system so thoroughly saturated with the wait until the blood is so polluted and the system so thoroughly saturated with the polson that no medicine, however efficacious, can check the progress of the disease. If there is a taint in your blood get it out at once, don't wait for some external evidence of it, the appearance of a tumor or ulcer.
