# KLAMIATH REPUBLICAN SUPPLEIIENT． 

## VOL． 7.

## SPEED PROORAM，

kamath County Agricultural Asso－ tiation，three days，commencing Detober 16th，1902；

ниет day，остонкн 16.
Onc－half mile dash for
，free for all，purse， 8100.
Hatf－mile dash．saddle horse
ee，free for all Klamath county burses：purse，＊75．
3．Trotting，one mile，free for all Slamath county horses，best 2 out （13 heats；purse， 875.
4．One－fourth mile and reprat， frefor all Klamath comenty horses：
anse，$\$ 100$.
5．Five－eighth mile dash．free for sudde mules；purse， 825 ，
skOOND DAY，OCTOBER 17
C．Five－eighths mile dash，free
ho all：purse，$\$ 75$. roall：purse．s75．
；．One mile trot，free for Klamath
，anty horses，best 2 out of 3 heats： unse， 8100 ．
（x Onequarter mile pany race for ，miles owned in Klamath county， frace to this free；purse，225．
9．Squaw race，one mile，free for fi．Indian women to ride；purse 82.5 тины DAу，остовкв 18.
10．for all；purse，\＄100．
II．One mile slow race，
1．－One riders purse so cach horse
12．One mite dash．free for all： （112x． 81.50.
Gquaw race．an fieit．
re． 810
Indian foot race，one－fourth mile；
wise 810.
Purses， 70 per cent the Ist horse；
iper cent to 2nd horse．
per cent to 2nd horse．
Bntrance fee 10 per
Batrance fee． 10 per cent of purse ball races except pony race：three to her and two to run．
a．T．Balowis，President．
J．G．Piehek，Secretary．

## CALLAN＇S abridoed．

In his lecture on＂Nature as In－ whetory to the Siences．＂Prof． Blan traced the nature－study move－ nut through the different stages of velupment：Ist，the bookmakers＇ nourmal，or prodigious in nature cachers alse，fell in with this notion presenting the marvelous to pupils excite their curionty．This prim－ fie impulse and wonders，was soon found be contrary to the thost important fild stould te taught the
ed familiar things atout his home e should learn to see wonders in be commonest objects．instead of ping to the worid＇s end to tind ange things which be has me nation for understanding and

## 

Th．value of the study from the elitarian point of veew．was dis－ osed at great length．The prace cal value of this study to the aver－
ve man or loy．，was well brought e math or hey．was well brought
．He said in part： He said in part：
It is certainly worth while to nuw the useful or hurtful things in ature．The study of plant，brings at the medicinal or poisonous quali－ Pr．Some plants and animals are Tdally use to man，for fousd，cloth－ og or shelter．Some of the simplest bysiology have to do with comfort hysiology have to do with comfort

KLAMATHEALLS，OREGON，THURADAY，OCTOBER 9， 1902.
No． $2 \%$ ．
tions and marhines in general use in our bomes，fields and factories， need to be explained in elementary sclence lessons．One of the most striking characteristics of the physi－ cal world，is the multiplex utilities of the natural sclences．In all the daily concerns of all classes of people． it forms a most important part． Wherever there is progress in the worla，there you will hind men seek It has come to be one of the nature ant functions of education，to give ant functions of education，to give
children an understanding and mas－ chidren an understanding and mas－
tery of the physical conditions of life． tery of the physical conditions of life．
and of the many and varied utilitien and of the
of nature．
＂In all naturestudy much atten－ tion should be given to fanction． The pupils should be set to finding out as much as they can for them－ selves．The horizontal position of ceaves on plants，they will readily see
us the best for giving shade．The as the best for giving shade． heaps of decayed ur decaying leaves in the words will suggest the value
of muleh or soil curichment．What of mulch or soil ewrichment．What leaves are used as food for animals and mens how they are prepared and ravages of imsects protected from the livens the pupil in his other studies． but is the begimning of economic botany．
Lead the pupil to observe the transformation of the cabbage worm into the cabbage buttertly；the value importand as a garden protector；the destroyer；the habitat and value of the wild animals and birds．You will not only have laid the founda tion for a better and more contented citizen，but an excellent foundation for zoology．

By leading the child to observe properly the formation of soil from
the decomposed rocks，how the roots the decomposed rocks，how the roots
of the forest trees disintegrate the rocks and thus aid in the formation of soll，he will easily infer that the destruction of forests retards soi！ formation and promotes rocky de－ erts，as well a
panying evils．
＂Here again，we have not only laid a foundation for a class of boys and girls that will become farm and boys and girls whom the deceptive attracthons of city life will not casily lure．
Many teachers complain that the curiculum does not allow time for nature study．Yet we believe that time could be made at least once or twice a week for study
work in nature stady．

If the attempt ioe carnestly made and persisted in for awhile，it win be found that the interest avakened by the new work，will re－act as aa incentive upon all other school work．
The mental activity induced，the The mental activity induced，ri．e reasoning from effect to cause and vice versa，awaken all the facelties and give the child a practical inter－ est in his surroundings and habitu－ ates him to inquiry into the useful－ ness of each object in his environ－ ment．
＂Nostudy is worth anything that does not enrich the inner and higher lite of the student．For this，natare
study is pre－eminently adapted．Esen at its poorest，it cannot fail to add much to the resources within the 10 － dividual．In so far as it does that， it saves．

There is nothing in our common school culture to make a child fa－ forces of life－animal or vegetable－
that he must as a farmer deal with． There is no cause for wonder that the drift of our population is away porant of the stones ese．To be ig． the simplest stones and clays and to deaden farm life le nature，is oodeaden farm life beyond endur－
ance．The surest wace．The surest and wholesomest way of widening the horizon of life， is woltiply interests and keep
them fresh and eager．To this end， them fresh and eager．To this end，
there is no stronger contributary in． there is no stronger contributory in－ luence than nature－study．
Why，by our neglect of his early cars，do we insure that the former loses，as he rises inte manhood，the
delight with which in fresh infancy， delight with which in fresh infancy， he could live a companion of the of the emotions that helong togard humanity，allow his heart to grow steeled to the gorgeousness of the sky，to the appeal of the vast ocean， or to midnight．The beauty of form． colur and proportions on the thower bird，insect，cloud，ete．，furmish lim－ itless ，＂pportunities for aesthetic cul－
Then
Then the relation between science and religion and their inter－depen－ den＇e was carefully traced．He
quoted from Prof．Huxely that true sxience and true religion are twin sisters and the separation of either from the other，is sure to prove the death of both．
He alse dwelt on the profound re－ spect for underlying law，which sei－
ence study ence study generates．That＂the scientist sees that in virtue of these laws，the process is ever toward a Thuser reward and higher happiness． nal principle of things，prove him－ self intrinsically religious．＂
He traced the progress of civiliza－ tion as due to science．How the rec－ ognition and establishment of natur－ al laws，has emancipated humanity from superstitions，and made it pos－ sible for millions to live in comfort where previously but thousands eked out a scanty existence．

One count in the indictment brought against the modern public xhool，is that the teacher is ton prome with his pupils except to shar）－ en the： r wits．That it is no affair of his，if they turn out quick witted rascals．On the other hand，there secms to be a tendency on the pari of the home，to turn over all the training of children to the school．
and their control to our few ordi－ and their
nances．

In this evasion of responsibility lies a very grave danger，not only to
the individual but the community． the individual but the community． The sehool should strengthen and ex－ tend the work of the home in char－ acter building．If this is neglected in the home，then more than ever is it true that the integrity of the re－ public is

## BONANZA＂SQUIBS．

Died，daughter of Peter Peterstein－ er，October 1 ，aged 3 years．Remains were interred in the Bonanza ceme－ tery．
Born，to Mr．and Mrs．J．A．Stew
t，a som，Octwier 4
Born，to Mr．and Mrs．A．D．Slack
The new residence of Dr．Johnson is nearing completion and is an orna－ ment to our town．

Mrs．Fuller，mother of Hosmer Fuller，our young harness maker，
visiting with Hom，and his wife for
Miss Kittie Campbell who has been making her home at the Goss Hotel for a short tume past，has been called home by the illness of her mother． Mrx，Lindsey．
Mrs．A．D．Harpold has returned from Grants Pass and reports a fine trip and in love with Rogue River Valley．
We understand that Ed．Terwilli－ ger has sold his river ranch to a com－ pany of land speculators，and that other ranches have been bargained for．
J．O．Hamaker is the busiest man in the county locating tumber men．
Mr．Chas．Hoagland will move a residence from his ranch into our town in a couple of days．
Geo．McDonald and family return－ d from Medford last Tuesday where they went for fruit and supplies．

## THE TIMBER BOOM．

## （Ashland Tidings：

There seems no end in sight to the coming of timber land locators．One night be led to believe from the number who have already arrived in Ashland and crossed the divide of he Cascades into．Klamath and its yellow pine belt，that all the avail－ able land had been filed on．But apparently not so．Next week，as a change from the small sets of from four to eight locators who have here－ tofore been going out at one time， there is to be a large crowd of no less than forty members arrive in Ash－ land and make the trip across the mountains to the Sprague River sec－ tion where so much tiling has already been done．They come all the way from the state of Iowa and make the excursion for the especial purpose． A mong the number with the crowd is a man that will make a location who is rated by Bradstreet＇s as count－ ing his wealth by $\$ 3,000,000$ ．His wife accompanies him and will also avall herself of the generosity of Uncle Samuel＇s land laws．
Besides those who have been go－ ing into Klamath county via Ash－ land，a large number have gone from the south．The livery men of Klam－ ath Falls and other points have been taxed to their utmost capacity to furnish rigs and teams to carry the locators out to the timber land and they have done a thriving and most protitable trade as a result of the movement．
A prominent Klamath caunty ofti－ cial estimates that the timber land that will be proved up on during tie present year will increase Klamath couniy＇s assessmeat roll by $8.500,000$ ． This will help the county＇s finances very materially．
