almost sure to end in the second stage of catarrh, which is making so many lives miserable. If Peruna was taken every time one has a cold or cough, chronic catarrh would be practically an unknown

Miss Elizabeth Uber, No. 57 Bassett street, Albany, N. Y., writes:

"I have always dreaded unsettled weather because of my extreme llability to catch cold, when a catarrhal trouble would quickly develop through my entire system which it would take weeks to drive away. I am thankful to say that since I have taken PERU-NA I do not have any reason to dread this anymore. If I have been at all exposed to the damp, wet or cold weather, I take a dose or two of PERUNA, and it throws out any hint of sickness from my system."—Miss Elizabeth Uber.

Mrs. M. J. Brink, No. 820 Michigan avenue, St. Joseph, Mich., writes:

"This past winter during the wet and cold weather I caught a sudden and severe cold, which developed a catarrhal condition through my entire system, and so affected my general health that I was completely broken down, and became nervous and hysterical and unfit to supervise my home. My physician prescribed for me, but somehow his medicine did me no good. Reading of PERUNA I decided to try it. After I had taken but three bottles I found myself in fine health."—Mrs. M. J. Brink.
