watering place.

If the present year's business shows any advantages and gives promise of greater returns the company intends to construct a light-draft steamer to ply upon the upper lake and use the launches for the other routes. Sawmills are being erected at Klamath Falls and vicinity and the country is said to be attaining unusual prosperity. Reports from there are to the effect that nowhere along the coast are the inducements for nimrods more alluring. Fish and game of many varieties abound there and largely upon this is based the hope of making the lakes summer attractions.

Teams were sent to Pokegama for the boats yesterday and we may expect to see them on the lakes in a short time.
