# AS OLD AS THE PYRAMIDS

That blood poison existed among the ancients has been proven beyond question. It has been traced back thousands of years, and is as old as the Pyramids. This blighting curse has been handed down from nation to nation and from individual to individual till it has spread to all parts of the world.

Contagious blood poison, as it is called in modern times, begins with a small sore or ulcer through which the virus enters the blood. This is followed by inflammation and swelling of the glands of the groins, a red eruption breaks out on the body, sores appear in the mouth and the throat becomes ulcerated, and as the disease takes a deeper hold and the blood becomes more thoroughly

infected, the hair and eyebrows drop out, the skin is spotted with copper-col-

ored splotches, the bones and muscles ache, and it seems to the victim of this monster scourge there is not a sound spot in the whole body. .The horror of this awful disease transmits the taint to his children. and Contagious Blood Poison thus becomes responsible for many of the ills of childhood—Skin Eruptions, Catarrhal Troubles, Sore Eyes, Scalp Disease, White Swelling, Scrofula and others just as bad, S.
