Japanese Plan to Drive Kuropatkin late Itands of Chinese General.

St. Petersburg, May 18 .- In view of the official dispatches regarding the hostile attitude of the Chinese within and without the Russian sphere of influence, the authorities here do not conceal their apprehension as to the outlook, especially in the north of the empire, for they propose to call the attention of the Celestial government to the impending uprising in Tapadziasti, in order that repressive measures may

be instantly taken. It is known and appreciated here that all the powers have made strong representations to Pekin in the interest of the preservation of the tranquillity of the empire, but it is stated that Major General Pflug's dispatch of May 14 shows the necessity for further impressing the Celestial government with the advisability of acting with a firm hand. The authorities here do not forget that the Boxer revolt which spread from Shantung would have involved the entire empire had it not been for the firmness of the southern viceroys.

The military authorities in St. Petersburg claim to have information of sensational character to the effect that the Chinese have tacitly agreed to co-operate with the Japanese operations against the Russians.

The Japanese propose, it is stated, to drive General Kuropatkin's forces into flood waters from Umatilla river. If neutral territory and enable reprisals the slightest infringement of the neutrality of China by Japan, and the Chi Pendleton—The fact that \$2.75 and churian frontier, could not be charged more was realized for dry ewes and two with a violation of pledges in respect year olds, two and three years ago, to noninterference in military operations in Manchuria.
