Deafness Cannot Be Cured

by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure deainess, and that is by constitutional remedies. Deafness is caused by an infamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

—Indeed, yes, sir. I had 'em when I was ten years old. Broke out all over me.

A Chance to Get Even.—"I wish," and the expressman to the lawyer, "that you would send in your bill for the legal advice." "I am waiting." replied the lawyer, "until I get your bill for my May moving. I'd rather have the cal applications as they cannot reach the used portion of the ear. There is only one

his back up.

I was afflicted with Tetter in bad shape. It would appear in blotches as large as my hand, a yellowish color, and scale off. You can imagine how offensive it was. For twelve years I was afflicted with this trouble. At night it was a case of scratch and many times no rest at all. Seeing the good the medicine was drived the medicine was drived. good the medicine was doing a friend who was taking it for Eczema, I commenced it, and as a result the eruption be-gan to dry up and disappear, and to-day I am practically a well man. Only two tiny spots are left on the elbow and shin, where once the whole body was affected. I have every confidence in the medicine, and feel sure that in a short time these two remaining spots will disappear.
S. S. S. is certainly a great blood purifier, and has done me a world of good.
I am grateful for what it has accomplished, and trust that what I have said ill lead others who are similarly afflicted to take the remedy and obtain the same good results that I have.

125 East Fifth Ave. JOHN F. LEAR.

While washes, soaps, salves and powders relieve temporarily, they do not reach the real cause of the disease. The blood must be purified before the cure is permanent. 8.S.S. contains no potash, arsenic or mineral of any description, but is guaranteed

Cost of Louis' Buttons.

Twenty thousand dollars for a dropshaped pearl scarfpin, \$15,000 for a pearl stud, \$4,940 for a coat fastener formed of a white bouton pearl with gold bar, \$850 for seven buttons en suite and \$775 for a pair of brilliant sleeve links-these are a few of the prices realized at the recent sale in

London of a noble marquis' jewelry. But, after all, everything is comparative, and the marquis' gems, rare and costly though they are, would have been quite eclipsed by Louis XIV.'s personal jewelry. The "grand monarque" had many crazes, but for buttons he had a positive mania. In a single year, 1685, he squandered \$600. 000 on them, and some of his pur-

chases are well worth glancing at. On Aug. 1, 1685, he bought two dlamond buttons for 67,966 francs and seventy-five diamond buttons for 586,-703 francs. The buttons for a single vest cost Louis \$200,000. Of the 354 "boutonnieres" used 162 contained five diamonds each, while the remainder were single diamonds. In all, the "great monarque" is said to have spent \$5,000,000 on buttons alone.

Silence One Can Sec.

cate or too loud for the ear to register. not produced by an insect. After drying, the three feet long; a short tail, without nails are polished with a fine brush, rattles, and is slow and clumsy in its and are finally rubbed with a rosy movements; but, lurking as it does in unguent to give them a shell-pink.

Many over-exposed negatives can be saved, when using a two-solution developer, by keeping at hand a very dilute solution of No. 1, in the proportion of about one to eight of wafer. When the image during development flashes up and threatens to cloud over, quickly transfer the plate to this diluted mixture, the effect being to instantly retard development and cause the negative gradually to acquire density and detail. After a minute or so, the developer may be again poured over the plate for a brief moment, then poured off and replaced by the No. 1, and so on, until development is complete. A negative equal to one correctly exposed will result, having good gradation and plenty of detail.-Camera and Dark Room.

The depth of tone in a background greatly affects the resulting portrait. The matter is one which must at one time or another have received the attention of every thoughtful portraitist, one of whom here gives his experiences. He suggests that for the purpose of studying the influence of the background it is only necessary to take into consideration three simple cases-a dark, a light, and an intermediate background-and with these a few experiments will demonstrate that the selection made for any particular subject will in no small measure influence the resulting portrait. With a sitter in dark clothing, the darker background will strongly concentrate the interest on the face, and by comparison with them will reduce the apparent strength of the shadows therein. With light drapery the effect is exactly opposite, the drapery drawing attention from the face, and by its suggested lightness increasing the apparent depth of the shadows. A medium tint in the background has the effect of making the interest more general, and, being nearer the shade of the darker portions of the face, it tends to reduce the contrasts. -Camera Craft.

OUR VENOMOUS SNAKES.

or Copperhead There are only few varieties of venmous snakes in this country. The chief of them are the rattlesnake and the copperhead. In the South is to be mond-backed rattler, and a variety of copperhead that lives around ponds and rivers, called the water moccasin. Farther West, on the other side of the West, little dinky bob cars drawn by Mississippi River, there are several

Miss Rose Hennessy, well known as a poetess and elocutionist, of Lexington, Ky., tells how she was cured of uterine inflammation and ovaritis by the use of Lydia E. Pinkham's Vegetable Compound.

" DEAR MRS. PINKHAM: -For years I enjoyed the best of health and thought that I would always do so. I attended parties and receptions thinly clad, and would be suddenly chilled, but I did not think of the results. I caught a bad cold eighteen months ago while menstruating, and this caused inflam-mation of the womb and congested ovaries. I suffered excruciating pains and kept getting worse. My attention was called to your Vegetable Compound and the wonderful cures it had performed, and I made up my mind to try it for two months and see what it would do for me. Within one month I felt much better, and at the close of the second I was entirely well.

"I have advised a number of my lady friends to use it, and all express selves as well satisfied with results as I was." - MISS ROSE NORA HENNESSY, 410 S. Broadway, Lexington. Ky. — \$5000 forfeit if original of above let-ter proving genuineness cannot be produced.
