Engineer Humphrey Promoted.

Washington, March 31.—Thomas H. Humphrey has been promoted from assistant engineer to engineer in the reclamation service. He has been assigned to work at Klamath Falls under Supervising Engineer J. B. Lippincott. Mr. Humphrey is a native of Idaho.

In placing an order of five children on trial. He devoted a whole year to booming the enterprise. And it was heart-breaking work. He would win the approval of a lot of English or German or Scandinavian families, only to find in his own land no readiness of trade. And yet in spite of everything, he has succeeded in a measure. The scheme is working and Mr. Mathieu has decided to found a society and push the idea for all it is worth.

This society is to be known by the solemn title of "International Exchange for Children in the Study of Foreign Languages and Customs." For honorary president it is to have M. D'Estournelles De Constant, for acting president, Pierre Baudin former minister; for vice president MM. Firmery and Edouard Pefft, Inspector general of public investigation. Mathieu himself will serve as general manager, with the backing of deputies of the chamber if necessary. Jules Siegfried and a lot of others will look after the financing.

An elaborate system of correspondence has been drawn up already. There is a precautionary exchange of photographs first and a severe cross-examination of all concerned. The closing details of the railroad journey, under suitable escorts in the case of girls, are really looked after by the exchange.

Definitely Indefinite. Landlord—Come, now, when are you going to pay your arrears? Author—I will satisfy your demands as soon as I receive the money which the publisher will pay me if he accepts the novel I am going to send him as soon as I have finished the work which I am about to commence when I have found a suitable subject and the necessary inspiration.—Cassell's.

The report of the town engineer was approved and ordered filed.

A petition was presented to the board by Fred Melhase, signed by a number of the citizens of the town, asking that an ordinance be passed providing for a license for meat peddlers. On motion of Councilman Bishop it was ordered that a committee of two be appointed to look into the matter and ascertain what would be a reasonable license, and if the committee find it necessary, to frame an ordinance to be submitted for action by the board at their next meeting. The president of the board appointed Councilmen Bishop and Hurn on the committee.

Rev. W. G. Smith, who was present, then asked permission of the board to present a matter which he considered of vital importance for their consideration. He wished to suggest to the board that they increase the amount of the saloon license. Attention was called to the action being taken in Baker county and other parts of the state in increasing the saloon license, which he believed was resulting in the reduction of the number of saloons. He stated that he had hoped to have brought the matter before the board before any new saloons were started in this city, but saw that he had been too late, as licenses had already been issued to two new ones.

Geo. Horn—"I believe the proper way to bring this matter before the board is by petition. If the majority of the people are in favor of such measure you can count on the board."

C. St. Geo. Bishop—"I think this board would stand with a majority of the people."

Mr. Smith asked if the board would take the same view and were favorable to enforcing the existing laws.

L. F. Willits—"I believe that public sentiment is what enforces the law. The town council is elected to carry out the wishes of the people, and as long as a majority of the people are opposed to the enforcement of certain laws, it is needless for the board to try to do anything."

Hurn—"As far as the existing laws are concerned it is an easy matter to have the laws enforced. All that is necessary is to swear out a complaint and a warrant will be issued."

Rev. Smith stated that he believed the saloon men themselves would be willing for the license to be raised as it would keep others out of the business. He had spoken to two of the saloon men and they were in favor of it. He said that in regard to the enforcement of the existing laws, he himself had made complaint at one time and had been unable to find an officer who would issue a warrant.

At this point Recorder Brower arose and said he would like to ask the names of the two saloon men who were in favor of having the license raised. Mr. Smith stated that he was willing to give the names but did not know if the men would care to have it known.

Mr. Brower then said: "I would like to ask Mr. Smith if the complaint referred to was made in this town?"

"It was."

"I would like to ask the gentleman if the officer who would not issue the warrant referred to was myself?"

"Yes; it was."

"I WANT TO SAY THAT IT IS A LIE!" In explanation I will say that Mr. Smith came to me in regard to a matter and wanted a warrant for the arrest of certain parties. I informed him that it was necessary to have a written complaint to have a person arrested. He insisted that it was my business to draw up a complaint. I insisted that it was not and that I did not care to do so. The recorder is governed by the same law as is the justice of the peace. I told him that the proper officer to look to was the city attorney, but that any proper complaint handed me would get a warrant immediately."

In reply Mr. Smith said that he did not hear the matter as presented to the board, but that if he had any business with the recorder in the future, he would go properly prepared.

The board then proceeded to canvass the election returns, and the recorder issued the certificates of election and the officers were sworn in.

Councilman Willits moved that the services of the town engineer be dispensed with for the present and that he be asked to file the plats and field notes of all grades established. The motion was carried.

J. C. Rutledge tendered his resignation as city attorney and the same was accepted. The meeting then adjourned until next Monday night at which time the new Board will be organized.

**WHY I Advertise in the Newspapers**

I advertise in the newspapers because I am not ashamed of my goods or the work of my repair department, and to let people know about myself, my store and my stock.

Because I cater to the intelligent class and they read the papers, and I believe in increasing my business.

Because I talk to more people through the newspapers at a greater distance in less time and at a more reasonable price than in any other way.

Because my newspaper advertising has brought me greater returns for the least expenditure of any advertising I have done.

Because when I write an ad., I am not too stingy to pay for placing it in the best possible medium or to have it inserted so that it is attractive. Thus I know it is seen and read by almost everyone in the house where the paper goes.

Clearing-House in Europe by Which Different Nationalities Are to Be Traded.

One of the curious things run across in Europe is the scheme of a Frenchman named Michael Breal, broached as long ago as 1886, and which is being again taken up.

It consists of a wholesale exchange, a swapping of children, from one family to another, says a recent report.

Here is a Parisian father in modest estate, with a son. This man has an ambition that his child shall have a thorough knowledge of German. The proper thing would be to place the child in some German family for awhile. But the difficulty for the father is to discover just the right sort of family—one who would receive the child, one that he could trust with the child, and, above all, one who had a child to swap. The Parisian father would be spending no extra money in housing the German child and teaching it French, while his own was eating at a German table. Meanwhile two nations were understanding each other better. It was a splendid scheme, if only it could be carried out.

What was needed was a baby broker, as it were, an exchange, a clearing house for children, an agency to keep tabs of families willing to swap children and to engineer the swap. A man named Tom Mathieu saw the chance, and improved it during the vacation period last year. He had prejudices to overcome. After a deal of letter writing he won the indispensable, not to say inevitable, sanction of college professors, of great authors, prominent lawyers and members of parliament. He even succeeded
