Ed Doering. See that new line of ladies' dressing combs in the window at Wither's Jewelry Store.

Mayor Alex Martin has been acting as police judge this week during the absence of Recorder C. C. Brower. Nearly all the cases have been "drunks" who have plead guilty and paid their fines.

The police court was in session Monday night to try a Scandinavian who was arrested for being drunk. On being asked if he was guilty or not guilty, he answered with a broad smile, "Oh, I tank I am guilty all right." This being the first offense the judge fined him \$5.

The Presbytery of Southern Oregon and the Home Mission Board have granted the request of Rev. W. G. Smith, and guarantee the full salary of \$600 for the first year, for a minister at Merrill, while the people provide a suitable House of Worship. As soon as the right man is found he will be placed in charge, and it is hoped that a church can be brought to self-support in this progressive community within five years. Rev. Smith will preach at Merrill next Monday and Tuesday evenings. A full attendance is desired as plans of vital interest to all will be presented.

Let us dress you up. You'll look prosperous. Bodge the city tailor.

J. F. Adams, who is in town this week states that he is going to send his big dredge to Laird's landing, on the Lower lake to do some work there. He has been engaged to do some dredging so that a dock and wharf can be built. A good wagon road has been completed from the terminus of the McCloud Railroad to Laird's landing on the lower end of the lake, a distance of 40 miles. Traction cars are expected to be put on this road and connection will be made with these by boats on the lake. This will give the people of Klamath County cheaper freight rates until either the Weed or McCloud roads are extended.

Watches de-magnetized. L. Alva Lewis.

Mr. F. T. Cook, who was here this week in the interest of Whitelake City, stated that he believed that his Company's efforts in behalf of Whitelake City would be of great benefit to the whole of Klamath county, and none of the citizens need have any fears of any member of their company making any fight on, or circulating any false reports about Klamath Falls or other towns in the county, as he says that they have been too long in the business not to know that that policy will do them no good. We are pushing Whitelake City he said, because we have invested there, and in pushing her, we of course help the whole county. In pushing Whitelake City we shall do so on her merits and the merits of the county as a whole, and not on the demerits of any other town. We believe there is room in the great Klamath county for our town as well as others and each will materially help the others.

Watches of all kinds. L. Alva Lewis.

**LAND FRAUD TRIALS NOW ON.**

Senator R. A. Booth was arraigned yesterday before Judge Bellinger on the indictment returned against him charging him with conspiracy to defraud the government out of public lands. Thru his attorney, A. C. Woodcock, of Eugene, he entered a plea of not guilty. L. R. Webster has also been retained by Senator Booth as one of his counsel for the trials which are to follow.

Henry Meldrum Levy Stipp and David W. Kinnaird, indicted for complicity in fraudulent surveys, and Harry L. Rees and Henry P. Ford, charged with complicity in a plot to obstruct the operation of justice by an attempt to defame the character of District Attorney Hensley, were also arraigned. Meldrum filed pleas of abatement to the indictments against him when his case was called, being represented by Dan R. Murphy. Stipp and Kinnaird pleaded not guilty to the indictment against them, they being also represented by Mr. Murphy. Rees and Ford filed motions to quash the indictment against them at the same time, stipulating that they should profit by any favorable decision in the Mitchell plea in abatement which is now pending and which will be decided by the court this morning. Rees and Ford were represented in court by Albert R. Joy.

**SELECTED SINGULARITIES.** Among the trees that are most sensitive to the wind are the cherry, the plum, the walnut, the black poplar, the service-tree, the ash, and certain varieties of pine. Other pines, especially the mountain varieties, and also certain firs, are very resistant to wind. Quannah Parker, the noted Comanche chief, announces that he is a democrat, and will support Judge Parker for the presidency. In an interview Quannah said: "Me heap democrat. Big judge, he my man; named for me, he my nephew; my Indians all democrat, all for Parker." The general impression prevails that rubber is a product like wheat or corn, to be obtained from a given tree. The idea is quite erroneous. It has been estimated that 1,000 different species contain rubber, though commercial quantities have been obtained from only 40 or 50. There is a merchant in New York who has made a fortune by the sale of celery. For 20 years he has handled nothing else. In season he buys it in car-load lots. Out of season he keeps large quantities frozen in ice, for which he obtains big prices. The celery comes out as brittle as glass. There is a New York barber who wears a No. 12 shoe. He was a sergeant in the German army, noted for his stability. He has a brother in the old country whose foot is so big that no ready-made shoe can be found to fit him. When he needs a new pair of shoes he buys a side of leather and sends for a shoemaker, who fashions his footgear at home. His foot is the largest in all Germany, about No. 17 in size. We have the skunk all to ourselves in North America. He lives in Canada as far north as the upper part of Mackenzie river, and is distinctively a North American animal. He is found throughout our broad domain from Portland, Me., to Oregon, and from Florida to Los Angeles. For some reason he seems to have prejudice against Nova Scotia, and is not known in Newfoundland. The skunk is really a very respectable beast, and cannot be severely blamed for making himself obnoxious to his enemies. Some bold experimenters assert that the skunk is very good eating.

**9 COUNTIES NOT REPRESENTED**

Of the 33 counties of Oregon, 24 have made appropriations for separate displays at the Lewis and Clark Fair. Plans of exhibit have been submitted by about one half of these already and it is expected that plans will be received for the remaining not later than Saturday. Any of the counties that have not furnished plans and specifications for their exhibits by the first of May, will be ruled out and the space redistributed or awarded to outside applicants.

The counties that will not be represented, except through individual exhibitors, are, Clatsop, Crook, Curry, Grant, Klamath, Lake, Multnomah, Tillamook and Wheeler.

**Centennial Notes.** "Hit the trail" at the Lewis and Clark Exposition, opening in Portland, June 1. Foundations are being laid for an annex to the Administration building and for the post office and express office at the Lewis and Clark exposition. Elaborate clusters of electric lights, representing the final touches to the Bridge of Nations at the Lewis and Clark Exposition, are now being placed in position.

All exhibits for California's participation in the Lewis and Clark Exposition were shipped from that state April 15. The famous Boston-Montana band of 35 pieces, composed entirely of underground miners from Butte, Mont., will attend the Lewis and Clark Exposition. The band was organized twenty years ago and ranks with the best musical organizations of the country.

Two men who will participate in the rock-drilling contests at the Lewis and Clark Exposition enjoy enviable records. In fifteen minutes this team drilled through 37 inches of hard, tough granite. The men are husky miners from the Galice district in Southern Oregon.

A large tower is being erected over Guild's lake at the Lewis and Clark Exposition. Upon this will be placed a searchlight, the rays of which will be cast about the grounds at night and greatly enhance the lighting features of the Centennial.

A feature of the Oriental displays at the Lewis and Clark Exposition will be a large sandalwood temple, which in the East India building at the St. Louis Exposition, attracted much attention. The building has been shipped and will be erected at the Centennial within another week.

The itinerary of the Missouri Valley Medical excursion to the American Medical Association convention in Portland, during the Lewis and Clark Exposition, has been decided upon. A week will be spent in the Yellowstone National park and two days in Seattle and Tacoma.

**NOTES IN GENERAL.** If war is hell, pray what is taking a pleasure jaunt with an untamed automobile? At least a half dozen women in the business and professional life of Chicago receive \$10,000 per year from their vocations. He took his medicine like a man; which is to say that he left it lying right in front of the clock where his careful wife had placed it to catch his eye. India has, perhaps, a greater variety of plants than any other country in the world, having 15,000 native species, while the flora of the entire continent of Europe only embraces about 10,000. One peculiar feature of the bee farming in the way is the practice of keeping swarms of floating beehives, so that they may follow the streams to find new flower pastures. This, by the way, was done in Egypt thousands of years ago. The medical colleges of the five Swiss universities have more women than men. The reports for the year show 981 women to 763 men. At Bern alone there are 377 women students, at Lausanne 171 and at Geneva 151. At Geneva women have just been permitted to practice law. Miss Nelly Favre is the pioneer woman attorney. Poisonous compounds cannot be used to destroy flies without danger, but the following mixture is both efficacious and safe. Thoroughly mix together one teaspoonful of black pepper, two teaspoonfuls of moist sugar and two tablespoonfuls of cream. Place a little of this in a saucer where flies abound. It is a good plan also to wash the inside of window panes with a weak solution of carbolic acid, for this will prevent flies from settling on them.

**FEMININE FADS AND FANCIES.** The Windsor tie is a popular favorite. Soft blue is one of the modish colors. The velvet cabochon is a fancy of the season. Yokes when used on shirt waists are molded after the 1830 type. Broad-shouldered effects will prevail in shirt waists next season. Orchid of a purple shade is popularly adapted for evening wear. Tailored neckwear in Madras and linen is enjoying considerable vogue. The tight-fitting Louis XVI. bodice, much pointed in front, is the newest. Shirt waist sleeves tend toward the bishop order, with a somewhat wider cuff than in the past.

**A LITTLE VARIETY.** The electric motor is fast displacing the leather belt in factories. The palais de Castille, the home of the late Queen Isabella in Paris has been purchased by the French government. As an advertisement of its thread a well-known firm has, after several attempts, connected Europe and Asia across the Bosphorus, says the London Financial Times, with 1,250 yards of cotton.

Rear Admiral Robley D. Evans is a baseball enthusiast and seldom misses an opportunity to see a game. He has been visiting Mrs. Evans' sister in Poughkeepsie, and while there attended a contest of the Hudson River league and "rooted" uproariously for the home team, which won.
