**SUMMONS.**  
In the Circuit Court of the State of Oregon, For Klamath County.  
Wm. W. Hurn, Plaintiff, vs. Samuel Perry Nichols, Defendant.  
The undersigned, being sworn, deposes and says that the above named defendant, who is the owner in fee of Lot 3 in Block 1 according to the duly recorded plat of the town of Klamath Falls, Klamath County, Oregon, that whatever claim or demand may now or hereafter be made against or by the said defendant in respect to the title and the defendant be forever barred from asserting any claim in and to said lot 3 in Block 1 of said town of Klamath Falls, and for such other and further relief as to the court may seem just and equitable.  
This summons is published in the Klamath Republican by an order of Hon. Henry L. Benson, Judge of the Circuit Court of the State of Oregon, for Klamath County, made May 4, 1926, directing said summons to be published for six consecutive weeks, the date of the first publication to be made on the 4th day of May, 1926. F. H. Mills & A. L. Lewis, Attorneys for plaintiff.

**TO TEACHERS.**  
To teachers, pupils and school officers you will please note that the dates for holding examinations for pupils passing from the 8th grade have been changed from May 17, 18, and 19, to May 18, 19, and 20, and from June 7, 8 and 9, to June 8 and 9. The program for the first day will be written arithmetic, spelling, physiology, civil government and reading; for the second day, mental arithmetic, writing, language, history and geography. Pupils will indorse their papers with the number of the district or the name of school and also with their class number, and number the questions answered to correspond with the numbers on the examination paper. If there should be any questions of taking the examination who have not yet reported, please do so at once that a requisition for the necessary number of papers may be made. We were informed that laws passed at our latest session of the legislature could be furnished by April 15th, but at this date neither these nor our supplies order has been received.  
J. G. Wight, Co., Supt.

Families can be supplied now with "Tony's Best" at the Central Dining Parlors with or without meals.  
\$27,000 to invest with reliable sheep man. M. Day, Box 1988, Spokane.

**TELLS ORIGIN OF LAUGH.**

European Professor Says It Is an Expression of Joy Induced by Grogginess.

A European professor has made some very disillusionizing statements regarding the origin of facial expressions.

The first smile, he asserts, was merely a widening of the mouth of the prehistoric man at the prospect of being fed. Our savage ancestor bared his teeth gleefully as meal time approached, and in the course of ages the act was employed to express joy for any cause.

The sneer, in which we curl the upper lip, is a survival of the snarl of the brute or the savage man; while the sudden parting of the lips by which fear is indicated, perpetuates the act by which the startled animal or savage took a deep breath before preparing to fly or commence a struggle to the death.

Probably the most usual cause of disgust in the mind of primeval man was some bad tasting morsel in his food. The grimace he would then have made in expelling it has survived as our own method of expressing the emotion, whatever the exciting cause.

**PERSONALS IN PASSING.**

George F. Bowermann, new librarian of the District of Columbia, is a newspaper man.

A. W. Pagan, of Bangor, Me., is edited with being the oldest practicing attorney in the United States.

Miss Hubbard, of New York, intends to take some Venetian lace-makers to South Africa and have them teach their art to the Boer women.

Mme. Leubet, wife of the French president, is to be the first recipient of a new decoration bestowed in France on those who have distinguished themselves in the cause of charity.

A newspaper clipping bureau in Manhattan has collected 8,714 newspaper stories about the late Senator Hanna as a new his death. On an order from Elmer Dover, Mr. Borelle, the proprietor, has arranged these clippings in an album, consisting of 3,213 pages. It will consist of eight volumes, and it will contain matter equal to 16,221,526 words.

Admiral Makaroff, precisely ten years before he went down with the Petropavlovsk, delivered a lecture on St. Petersburg on the submergibility of warships. The Victoria catastrophe in the British navy was used as an illustration, and he had a model which he sank repeatedly to show the audience how rapidly an injured vessel of that class goes down.

In an attic room of his costly Fifth avenue palace Col. John Jacob Astor, the possessor of between \$7,000,000 and \$100,000,000, spends much of his time studying and experimenting in electrical science. A practical and watchful man of business, he neglects no part of his duty in the management of his vast properties, but his mind has a scientific bent, and it is recreation for him to solve complex problems.

John Philip Sousa, the conductor, has received notice of his promotion from Officer de l'Academie Francaise to "Officier de l'Instruction Publique" of France. The new distinction gives Mr. Sousa the golden palms and rose of the French academy. He is the only American who has received this decoration. He is also a member of the Royal Victorian Order of England, having been decorated by King Edward VII. three years ago.

**INVENTION AND INDUSTRY.**

A new invention is the manufacture from ramie grass of cloth, creases, ropes and other articles.

Many thousands of workmen in Hamburg are abstaining from drinking beer, using coffee, seltzer and spirits in its place. They are doing this in support of the striking workmen of 22 breweries.

A test has been made at Montreal of a device to check the speed of vessels in an emergency. The vessel's speed is checked by means of fins, controlled from the wheel house, which open at right angles to the vessel's side.

A German investigator has recently discovered an exceedingly valuable and important property of aluminum, which consists in its application as a whetting agent, the effect produced on cutlery set with it being most astonishing.

The raising of lemons is a new industry in Florence, Col. The lemons grown in that city are said to surpass in excellence those shipped from the southern states, as well as those received in this country from Spain.

The telephone industry of the United States represents a capital of more than \$450,000,000, covering slightly more than 4,000 systems, with 2,315,297 telephones of all kinds, over which were exchanged during 1922 more than 5,000,000,000 telephone conversations.

Bricks are now being made of clean sand and ground quartz lime that are said to be as substantial as granite. They cost \$2.50 a thousand. The mixed ingredients are forced into a strong steel cylinder mold by means of a screw. After the air has been sucked from the cylinder water is admitted, the rock being forced by the resulting pressure and heat.

**RACIAL PECULIARITIES.**

Five feet is the minimum height of the Russian and French conscript.

The average Japanese soldier is not more than five feet four inches high. Rheumatism is almost unknown in Japan. The Japanese escape the maldy to a great degree by avoiding the excessive use of alcohol and tobacco.

In fasting feats the sect known as the Jains, in India, is far ahead of all rivals. Fasts of from 30 to 40 days are very common, and once a year the people abstain from food for 75 days.

Japanese women are seldom physically weak, a fact that is ascribed to

be very general adoption by them of a scientific system of bodily training "virtually enough, the average Japanese woman weighs about as much as the average Japanese man."

**NOTES ABOUT ANIMALS.**

It is a curious fact in natural history that no bird can fly backwards.

The largest serpent ever measured was a Mexican anaconda, which was found to be 37 feet in length.

Durham possesses four dogs to every pig, while in Lincolnshire there are four pigs to every dog. In Lincolnshire there are more pigs than in any other county, the number reaching no fewer than 116,248.

Man has a rival in the art of shaving in a South American bird called the "motnot," which actually begins shaving on arriving at maturity. Naturally adorned with long blue tail feathers, it is not satisfied with them in their natural state, but with its own lips of the web on each side, cutting only a little oval tuft at the end of each.

**IT WAS EVER THUS.**

Mortimer—I've saved a great deal this month by not smoking.  
Margaret—Where is it now?  
Mortimer—I don't know. It's just saved—Chicago News.

Strange Man.  
He was a grumpy cookbooklet, and he had but displayed great pride in her because her bread was not like mother made.  
—Houston Post.

A Conversation.  
"He lost his head."  
"No."  
"The chimney took him off his feet."  
"Resigned."  
"Yes, it was the only way he could save his neck. He hadn't a leg left to stand on."  
"Is he thought to be short?"  
"Oh, no!"—Puck.

Besides Stamps.  
Druggist—Well, I had a pretty good day today.  
Wife—I thought you would have. According to my count, more than 200 people entered the store.  
Druggist—Yes, and the beauty of it is that eight of 'em wanted to buy something.—Louisville Courier-Journal.

"How They Lost Her."  
"Why did your cook leave so suddenly?"  
"She baked two cakes last Saturday—one for me and one to take to her married sister. When she wasn't looking I exchanged them, and took for our own use the one she had intended to give away."—Royal Magazine.

Had Been There.  
Passenger to bus driver—Which are the courts of justice?  
Bus Driver—Dunno.  
Passenger—What! Not know where the law courts are?  
Bus Driver—Oh! them's the law courts over there, but you said courts of justice.—Aly Sloop.

Smokes and Smokes.  
Granger—How did he make all his money?  
Kimmins—Smoking. He was the greatest smoker in the world.  
Granger—Dry up, Kimmins; you can't make money by smoking.  
Kimmins—He did. He smoked hams.—Royal Magazine.

No Cause for Complaint.  
"And was your husband kind to you during your illness?" asked the inquisitive woman of her seamstress.  
"Just as kind as could be, ma'am," was the reply. "He was more like a friend than a husband, ma'am."—Chicago News.

What It's Like.  
"I see that New York's subway carried nearly 6,000,000 passengers its first month."  
"It looks like a success, eh?"  
"Yes. It's just like picking up money under the street."—Chicago Journal.

One of Many.  
Stringer—There was a time when I lived at the rate of \$50,000 a year.  
Swallows—indeed! And how long did you keep it up?  
Stringer—Oh, about 30 seconds.—Chicago News.

**SURE BREAK.**

Fair Elopers—What makes you think we are safe?  
Her Lover—Your father is chasing us in an automobile.—Los Angeles

**THEY SUFFER FOR BEAUTY**

Spanish Senoritas Bind Feet and Sleep with Heads Suspended from Rope.

"There are no lengths to which some women will go in quest of beauty," remarked an erstwhile fashionable and beautiful woman, "In Spain, where a small foot and white hand are the mode, many ladies tightly bandage their feet up at night on going to bed, and sleep with their hands suspended over their heads from pulleys, so as to keep the blood from them."

"I was acquainted with a lovely Frenchwoman who used to plaster her face with a paste every night, to keep away wrinkles and give a clear complexion. She also had a pair of white satin boots sewn tightly on every morning, and ripped off at night—a new pair being required daily. Sleeping with the face in a paste plaster, however, is fairly common; and a good many women use thin slices of raw beef for the purpose."

**ODDITIES FROM ABROAD.**

An innkeeper of Wilhelmshagen, who turns the scale at 562 pounds, is the heaviest man in Germany.

The undersalers of Malara, Spain, went on strike lately because they considered themselves excessively taxed.

Twenty-four men died inside of a huge tin recently made for a wine dealer in Strasbourg. It holds 1,000 hectoliters.

The mortality curves in London rise in proportion to the density of the fogs and consequent exclusion of sunlight, which is the deadly foe of disease germs.

Fresh operations against the sardine fishery on the coast of Brittany, are to be undertaken by the French torpedo boat No. 89.

Having thrown buckets of cold water over his consumptive chief, a Maori medicine man at Gisborne in New Zealand, was charged with manslaughter and fined \$50.

An eccentric Shropshire (England) sexton, who has just died at an advanced age, had been for over 61 years connected with Wellington parish church as gravedigger and sexton. The man had had no other ridges in a train or any other kind of vehicle.

Buda-Pesth has lost one of its best-known cranks, a man who always went barefoot and bareheaded. His favorite occupation was to offer medical advice to famous persons who were ill. This being rejected, he wrote long diatribes against human folly and printed them.

M. Fromlet, the French sculptor, has received a commission for a monument, to be erected in Paris in memory of the pigeons which carried messages during the siege. At its commencement the installation of the pigeon post was of marked service, and thousands of letters and dispatches were sent out from Paris by this means.

**TRADE TOPICS.**

Millinery merchants are complaining of poor trade.

Egypt imports annually about 250,000 worth of "cigarette paper."

A company has recently been organized at Kensburg, Prussia, to distill alcohol from peat.

The value of artificial and chemical fertilizers annually used in Italy is estimated at \$5,250,000.

Scientists estimate that there is energy enough in 50 acres of sunshine to run the machinery of the world, could it be concentrated.

Since 1896 the exports of German toys have risen from \$2,250,000 to \$13,550,000 a year. The native consumption is estimated at \$16,500,000 a year.

The greatest obstacle to Liberian trade is the total absence of direct communication between the west coast of Africa and the United States.

The male human needs more food than the female. The man tends to expend energy and the woman to store it up in the form of fat; he burns the faster.

In consequence of the discovery by Prof. Schrenk that the bacillus of consumption is not the same as that of tuberculosis, it is held in German medical circles that the present treatment of consumption will be radically changed.

Cobalt is one of the minerals found in the atmosphere of the sun and in meteorites. It usually occurs associated with nickel, arsenic and sulphur, and is frequently an incidental product in the working of copper, bismuth and nickel ores.

**CURRENT CONUNDRUMS.**

Why is bread like the sun? Because when it rises it is light.

Which was the largest island before Australia was discovered? Australia.

What trade should be recommended to a short person? Grocer (grow, sir).

Why is the letter A the best remedy for a deaf woman? Because it makes her hear.

When is money wet? When it is due (dew) in the morning and missed (mist) in the evening.

If Rider Haggard had been Lew Wallace, who would "She" have been? She would have been "Ben Hur."

Under what condition might handkerchiefs be used in building a wall? If they became brick (the cambric).

Why is a watch-dog bigger by night than by day? Because he is let out at night and taken in in the morning.

If the alphabet were invited out to supper which of the letters would get there late? All those letters which come after "t."

Which is the most dangerous season of the year to walk in the woods, and why? In the spring, because the trees shoot, the flowers have petals, and the bulrush is (bull) rushes) out.

**WAYS OF WRESTLERS.**

Ancient wrestlers were permitted to rub their hands on the sand in the arena, but wrestlers of to-day are debarred from using resin, drug or any preparation to increase the tenacity of their hold.

**MODERN PILGRIM VILLAGE.**

Town of Duxbury at Plymouth Bay Is as Picturesque as in Antiquity.

Quaintly picturesque is the little Pilgrim town of Duxbury, declares Austin Cook, in Four-Track News. The water of Plymouth bay washes its long sandy beach, while to the south rises the green slope of Captain's hill. It was the second settlement made by our forefathers, and still clinging to it are the memories of those early days. Miles Standish was the ruling spirit and at one time owned the greater part of the village. Who does not feel a personal affection for the "redeemable" captain, with his quick temper and his warm heart? Although not at that time a member of the Pilgrim communion, he left all the wealth and luxury of his ancestral home in England, and cast his lot with these devout and sincere people, and most efficiently did he serve them. Before they left the "Mayflower" he was chosen military commandant, and soon proved his courage by penetrating into an Indian encampment and dealing with them so summarily that ever after they stood in awe of the man, "who the little in stature, was great in strength."

**FROM FOREIGN FIELDS.**

A bill has just been presented in the senate of Liberia for the regulation of polygamy.

England is still far in the lead in the number of sea-going ships; it has 1,250; Germany coming next, with 1,145.

Tyrol now has 893 trained Alpine guides. Last year 8,113 tourists were made, in which 14,655 persons participated.

Great success has attended the efforts of the troops and coast guards in Egypt to combat the locust plague by destroying the young insects with anti-wings.

Count Zeppelin, who wrecked his airship and at the same time his fortune, in Lake Constance, Italy, has raised \$4,000 by subscription for the purpose of building another ship.

The Austrian marriage laws are very severe. They prohibit marriages between Christians and Jews and between Christians and infidels. A marriage between a Protestant woman and a man who said he had no particular creed has just been annulled by the supreme court.

A further find of papyrus has rewarded the excavations undertaken by the Italians at Memphis, in Egypt, under the direction of Borchardt. In addition to a number of official documents, it includes a portion of an unknown epic, and one or two other literary fragments of interest.

Several British warships of the Australian squadron were recently laid off at Plymouth. Their condition is described as "rotten." A naval authority said of them: "There is not one of them that could capture a Chinese junk." The East Indian squadron is said to be in a similar plight.

Draft animals in Honduras are mules, asses, oxen and horses. These animals are all of a diminutive type, and serve very well for the carrying of freight, but for the purpose of hauling carriages and wagons these little beasts rarely do, and yet they carry packs of 200 pounds and through roaring streams.

**HOW TEACHERS START.**

Many Things Are to Be Considered by Prospective Pedagogues—No Standard of Excellence.

A young man, fresh from college, who decides to become a school teacher, has many things to consider, says Leslie's. The profession, if it can be called a profession, is still unorganized. No standard of excellence or diploma certifying ability is required. Methods of teaching in public schools in New York state are very different from those in Colorado, and those in Utah are different from those in Buffalo. There are private schools of all kinds. There are almost as many methods of teaching vocal music. College positions the young graduate must ignore temporarily, at least, for at present the colleges are choosing men with doctor's degrees, preferably from abroad. To obtain his first position he ordinarily joins an agency. He takes to the agency his record at college, supplemented by as many pleasant recommendations from his professors as possible, pays his yearly fee, and promises the agency a certain percentage, five per cent, usually, of his first year's salary. Occasionally his college will find a place for him in one of the schools that prepare directly for it. At any rate, he will find without great difficulty a position that will support him. Perhaps it will be in a little denominational boarding school where he will teach 13 different subjects during his first year, as one man I know did. If he survives his first year successfully and with some measure of content in the work, he is likely to be a teacher for the rest of his life.

**WOMEN AGREE NOT TO KISS**

League Formed in City of Mexico Bars Osculation Between the Members.

A little red button worn by some 200 women, old and young, married and unmarried, among the leading social sets of the City of Mexico marks a new departure, or rather a new step, in progress. This little, round, red button, says the Los Angeles Times, signifies membership in what is known as the Anti-Kissing League. Members of the league take solemn pledge not to kiss each other, in public or private, but put it on the ground that kissing is contagious, or, rather, the means of conveying contagious diseases from one fair lip to another. There is nothing visible to the naked eye in the constitution of this league against kissing other than members of the female persuasion, and, in fact, the practice, aside from the supposed danger of infection, is decidedly, to the male sense, not only deplorable, but unnecessary. When one woman in ten or twelve minutes of time on a street sees to kiss three or four other women before alighting from the car she certainly violates the golden rule by making all those passengers wait. How far this new league will conduct its offensive and defensive campaign remains to be seen.

**Pike's Peak Record.**

The record for climbing Pike's peak was made recently by H. H. Robinson, of Colorado Springs, Col. The mountain is 14,117 feet above sea level, and the former record was made in three hours and five seconds. Mr. Robinson made the ascent in two hours and 56 minutes. He wore a heavy pair of shoes, carried an umbrella, and the last mile walked in two inches of snow.

**Apple Tempted Eve.**

A botanical friend showed me not long since what he said was an apple that must have tempted Eve in what was surely a tropical fruit garden, says a writer in Country Life in America. It was a little bit of an oriental crab, about a third of an inch in diameter, and of course, it was bitterly sour. My philosophizing friend pointed out that, of course, the fruits in Eden were the natural "wild" fruits, and he was wondering whether the fall of mankind would not have been accelerated if the attractive tree had been hung with a few drops of the golden bellflower, or of crimson-striped weedy or wineapple.

**A Colt That Assisted.**

One rainy day a farmer opened the barn door and tried to call in the cows, so that he would not have to walk in the deep mud to drive them. One cow refused to come, although he called her name repeatedly. A colt, standing at the other side of the yard, watched him, as he vainly tried to drive the cow into the steppings into the mire. Then the colt quietly stepped up to her and bit her of course she moved. He followed, giving her a nip whenever she moved in the wrong direction, until she went through the door into the barn. She was trotted back to the other side of the yard.

**NOTES IN GENERAL.**

"If war is hell, pray what is taking a pleasure jaunt with an antique automobile?"

At least a half dozen women in the business and professional life of Chicago receive \$10,000 per year from their vocations.

He took his medicine like a man, which is to say that he left it lying right in front of the clock where his careful wife had placed it to catch his eye.

India has, perhaps, a greater variety of plants than any other country in the world, having 15,000 native species, while the flora of the entire continent of Europe only embraces about 10,000.

One peculiar feature of the bee farming in the west is the practice of keeping swarms on floating beehives, so that they may follow the stream to find new flower pastures. This, by the way, was done in Egypt thousands of years ago.

The medical colleges of the five Swiss universities have more women than men. The reports for the year show 981 women to 763 men. At Bern, alone there are 377 women students, at Lausanne 171 and at Geneva 151. At Geneva women have just been permitted to practice law. Miss Nelly Favre is the pioneer woman attorney.

Poisonous compounds cannot be used to destroy flies without danger, and the following mixture is both effective and safe. Thoroughly mix together one teaspoonful of black pepper and two tablespoonfuls of cream. Place a little of this in a saucer where flies abound. It is a good plan also to wash the inside of window panes with a weak solution of carbolic acid, for this will prevent flies from settling on them.
