Bids will be opened on March 16 at Los Angeles for 10,000 barrels of cement to be used on the canal tunnel. The government will deliver this to the contractors at the railroad terminals nearest the place of operation. We are told that the California and Northwestern railroad people have assured Mason & Davis Company that their road will be within ten miles of Teter's landing by July 4, and it is probable that it is at this point the cement will be delivered, and will then be hauled to the boat landing. This will save a great deal of time and expense.
