## East Klamath Falls Tracts

Everybody knows the "Mitchell Ranch"—Eighteen Hundred Acres—extending from Lake Ewauna with its fertile bordering tule lands across the gently sloping ascent to the main canal of the United States Reclamation Service and with the oldest and hand-somest orchard in the valley, great fields of alfalfa, timothy and wild hay under irrigation; garden tracts in cultivation, and 400 acres of the tracts lying above the main canal, nearly all under the survey for the High Line Canal, and which is the choicest fruit land.

Fourteen Hundred Acres of this magnificent ranch is signed up with the Klamath Water Users' Association.

County Court Meets.

The regular meeting of the County Court was held at the Court house in this city on Thursday, Friday and Saturday of last week. Very little of importance came before the meeting, most of the time being consumed in the transaction of routine business.

The question of opening the road to Altamont met with considerable opposition by many property owners, the main contention against its construction coming from the California Northeastern railroad. The objection was based on the fact that the road would be through the freight yards of this company, and as considerable switching would be done there at all times; it rendered it hazardous for vehicles traveling over the tracks. The Court, however, approved the finding of the viewers, and the road will be opened at an early date.

All other petitions for roads were approved, and the supervisors instructed

to open up same.

An adding machine and solar transit was ordered purchased for use of the county.

Flattering Recognition.

The Redlands Review of May 3 contains a report of a concert by the Ciel Club of that city. The membership of this organization is composed of the exclusive set of this beautiful California City, and their concerts are of a degree of artistic excellence that has won for them high praise. The honor of even participating in the chorus is one much sought after, while participation in solos, duets or quartettes is only permitted where the vocalist is possessed of superior attainments. An examination of the program reveals the name of Miss Worden of Klamath Falls, as a member of the quadruple quartette and her many friends here will be pleased to learn of her success and to know that under the careful direction of Madam Lord Wood of Redlands, of whom she is a pupil, she is so rapidly gaining the much coveted prize of possessing a contralto voice that is winning for her such recognition and distinction. Klamath Falls feels proud of its representative and wishes her much success.

I. O. O. F. Delegates.

S. E. Martin, as delegate from Merrill, and George Huro, C. L. Roberts and Carey Ramsay as delegates from Klamath Lodge 137, and Miss Mand Baldwin as delegate from Rebekah Lodge, will leave this week for Portland to attend the meeting of the Grand Lodge to be held in that city next week.

Mr. Martin expects to visit Frisco, before going to Portland. Mrs. Martin and Mrs. Ramsay and son, accompanies the party, and expect to visit friends and relatives in Portland and other points.

Reservoir All Right.

Tuesday afternoon a majority of the street committee, composed of Messrs. Martin, Bishop and Dr. Hargus accompanied by Mr. Gates of the Water company and representative of the two papers, visited the reservoir. The object of the visit was to see if any foundation existed for the charges that impurities and refuse were to be found in the basin, or pollution of the water from immediate surroundings was possible.

After a thorough examination by the committee it was found that there was no cause for the complaint made, that every precaution necessary for the protection of the purity of the water was being taken and that nothing of a contaminating character was to be found.

The water company has been experiencing great difficulty of late from leaks in the basin. The original lining was made of asphalt, it being the accepted theory at the time of construction that it was the best material to use for this purpose. Experience has proven it ineffective, and the company has relined the basin with cement. Having a diameter of 38 feet at the bottom, 65 feet at the top, supposed to hold an average depth of 9½ feet, thus creating a capacity of 300,000 gallons this basin would be sufficient to supply a city of many times the size of Klamath Falls. It has been, however, impossible to get more than 7 feet of water into it, until it was relined. Friday the relining was completed and found to be perfect, so that now from nine to ten feet of water is carried.
