bring our local players to a realization of the fact that there must be some determined practice work done before the tournament is held if we hope to retain the cup in Klamath Falls.

Lake county, the same as Klamath, divided the county offices between the two parties. On the state offices the majority were as follows: Hawley 277, Bean 688, Bailey 201, Chamberlain 61, Campbell 241, W. J. Moore 12, Merriam 144.

The county officers elected were as follows: Albert Dent, Republican, sheriff; Frank Payne, Democrat, clerk; A. J. Foster, Democrat, assessor; R. B. Jackson, Democrat, school superintendent; Faulkner, Republican, surveyor; F. O. Ahlstrom, Republican, treasurer; Wallace, Democrat, coroner; C. A. Rohart, Republican, commissioner.

The county as a whole went wet by 85 votes, but aside from Lakeview and a few of the smaller precincts the county will be dry.

On July 1st in this city will be held a civil service examination to fill positions as junior clerk in the Reclamation Service at salaries ranging from \$60 to \$125. The vacancy in the Klamath Falls office calls for a clerk qualified in stenography and typewriting and in bookkeeping at a salary ranging from \$90 to \$125 per month. All necessary blanks for the examination can be secured at the local office.

When Senator Fulton was informed of the defeat of H. M. Calk he gave out the following statement:

"I regret very much the defeat of Mr. Calk. I am not going to believe, however, that a Republican Legislature will elect a Democrat to the United States Senate until I witness the actual fact. I am on record as contending when the direct primary law was adopted, that the people did not understand that under any circumstances a Republican Legislature would be called upon to elect a Democratic Senator, or they never would have adopted the law. In my judgment, in selecting a Senator and taking the oath of office to support the Constitution of the United States, if the legislator selects anyone for the Senate who in his judgment does not represent the principles and policies that are for the best interests of the people, he violates his oath.

"Hence I say the Republican Legislature will not elect Democratic Senators."

Wood river valley may appropriately be termed the land of artesian wells. Already there are twelve wells flowing steady streams, and in many instances the water is forced from 3 to 15 feet above the level of the ground.

These wells range in depth from 110 to 230 feet, and the water is cool and clear, making it suitable for all uses. It is but a short time since the first artesian well was sunk, but by the close of this season there will be no less than thirty wells in the valley. C. T. Oliver has recently sent enough pipe to that section to sink twenty wells, and well borer Duffy, of Merrill, is now working in that section and has enough contracts to keep him busy during the entire summer. It is only a matter of a short time until every home in the valley will be getting its water supply from an artesian well, for in every part of the valley where the experiment has been tried it has been successful.

In the south end of the valley there are wells that flow 60 gallons per minute from a two-inch pipe and the water is thrown as high as nineteen feet above the ground level. The temperature of the water is 37 degrees, but five above the freezing point. Some of the parties in the valley contemplate experimenting with four-inch pipe in order to increase the flow so that it will be of sufficient volume to be valuable in the irrigation of the lands of that valley.

Aside from being used for household and stock purposes the water is being used by many in irrigating small patches and fine gardens are being raised. The fact that artesian water abounds in Wood river valley should lead to experiments in other parts of the county. If artesian flows could be found in the Klamath basin it would be a material aid in the development of the country.

Reports from Lake County are that the recent county seat removal question played a prominent part in the election. Every one who failed to identify himself with the movement was sure to receive a small vote in the north end of the county. It will be remembered that the measure was not submitted to a vote, owing to the fact that many of the signers withdrew their names just before election and left the petition without the required number of signatures to entitle it to a place on the ballot. A number of the candidates from the south end of the county were defeated because they were identified with those who opposed the removal of the county seat from Lakeview. It seems that the only solution for the antagonism between the two ends of the county lies in the creation of a new county and the people of the south end are heartily in favor of this.

County Clerk-elect C. R. DeLap announces that during his term of office Miss Lyle Watson, who has ably filled the position under Clerk Chastain, will again be chief deputy, and that C. F. DeLap will be the other assistant in the office. Miss Watson is thoroughly familiar with the work and the change in officials in this important office will cause no break in the regular work.

MONEY TO LOAN: Hard times, but I have some to loan if you have the security. E. B. HALL. 13-101f

An excellent exhibition of Tennis was played on the Club Courts, Seventh street and Klamath Ave., Friday evening, when Professor Crook of Albany, Ore., and Henry Crosby, of Circleville, Cal., defeated the local players, W. S. Wiley and Burge Mason, in three fast sets, 3-6, 6-2, 6-2.

While this was the first time Messrs. Crook and Crosby have ever played together, they did some good team work, and made some excellent individual plays. The manner in which they handled themselves at the net, as well as on the back lines, shows that they are in good form.

Some excellent returns of difficult shots were also made by Messrs. Wiley and Mason, showing them to be acquainted with the game, tho' not in as good form as their opponents. Every game was hotly contested, and they kept the visitors working at all times. Mr. Crosby has entered as a contestant in the tournament to be held here in July and states that there will be at least four others from his section of California.

Meeting of Water Users

(Continued from First Page)

is due directly to the rejection of the bids on the Clear Lake dam. This is especially true in so far as Mr. Murphy is concerned. Yesterday the Herald stated that a resolution would be introduced asking for the removal of Mr. Murphy from the position of Project Engineer. In connection with the matter of the rejection of the Clear Lake dam bids, the following telegram, dated Washington, D. C., received Thursday by Mr. John Irwin, one of the directors of the Association, will be of interest and importance in guiding the actions of the Association at its meeting tomorrow:

"Mr. John Irwin, Director Klamath Water Users' Association—Murphy report on Clear Lake dam bid favorable as to schedule one, unfavorable as to schedule two. Henny's report the same. Henny's recommendation was that contract be awarded on Schedule one to Mahoney Bros., but all bids have been rejected. C. W. FELTON"

The bids on the Clear Lake dam were rejected by Director F. H. Newell, and in connection with the rejection of the same he stated that the bids were too high, that the required per cent of the lands in the Upper Project was not signed for government irrigation; that the approach of the railroad would improve the condition for work and reduce the cost, that only two bids had been received, and that much of the land already under the ditch was not being cultivated.

Project Engineer Murphy states that he has not been advised if the contract will be re-advertised or if it will be undertaken by force account. If the work would be re-advertised it could be completed next year, but not as early in the season as if the contract had been awarded.

Following are abstracts taken from the letter of Supervising Engineer D. C. Henny written to Director F. H. Newell: "There were two bids as follows: Mahoney Bros., of San Francisco, total schedule 1, \$84,950, total schedule 2, \$30,825. Maney Brothers, Winnemucca, Nevada, total schedule 1, \$157,045, total schedule 2, \$41,935. The engineers' estimate as reported January 16, 1908 total schedule 1, \$77,415, total schedule 2, \$17,600.

"Mahoney Bros. bid is within ten per cent of the engineers' estimate, and is, in general, very well balanced. All other bids are considered excessive." The above abstracts are taken from a letter under date of April 15th, and in this Mr. Henny made no recommendations as he was awaiting further information from Project Engineer Murphy. Under date of April 28th, he wrote among other things as follows:

"In regard to the project engineer's recommendations, I beg to state that I have a letter from Mr. Murphy in which he recommends that Mahoney Bros. bid for the dam be accepted and for the dikes be rejected. In regard to land subscriptions the project engineer reports that there have been unconditionally subscribed 67 per cent of the lands under the project; that there have been conditionally subscribed 2 1/2 per cent. The condition in regard to these lands being that the Service make settlement with the owners for water rights claimed on Lost river and Langell Valley. It is further reported that the Bowne tract is also subscribed, a contract with Mr. Bowne for the purchase of his water rights on Lost river and rights of way for canals on about 2000 acres of land for \$7000 having been executed by Mr. Bowne, and this makes the total subscription reach 74 1/2 per cent.

"The project engineer has treated the matter from a broad view and believes that the interests of the project demand that the work be proceeded with. It is true that the land subscription has not reached the limit previously suggested of 85 per cent, but I believe that if this limit be adhered to the Upper project may as well be deferred to the future and with it the treatment of Tule lake. It is also true that the outflow from Tule lake continues encouraging, but it hardly seems advisable to continue adding to the irrigation under the Lower Project and to the return waters flowing into Tule lake depending solely upon finding relief by means so precarious.

"In making the following recommendation I will further say that I have had the land owners under the Upper Project distinctly understand that in case the Government should proceed with the construction of the Clear Lake dam it would require heavier land subscription before I would make any recommendation to continue with the Upper Project works and to commence with the construction of the canals.

"In view of the above I recommend that the bid of Mahoney Bros., of San Francisco, in Schedule 1, aggregating \$84,950, be accepted." On April 29, Supervising Engineer Henny again wrote Director Newell, recommending that the bid be accepted on schedule 1, and that the bid on schedule 2 be rejected. In connection with this the rejection of bid on schedule 2, he stated: "There is no urgency in commencing the work on the dikes, which can be re-advertised later if thought best. This work need not be attended to until next year."

It will be seen from the correspondence that both Project Engineer Murphy and Supervising Engineer Henny favored the acceptance of the lowest bid on the Clear Lake dam, and the fact that both of these gentlemen are in favor of this should give assurance to the members of the association that something will be done on the Upper Project if it is in their power to have it done.

Jack Evans, of Bonanza, was arrested Monday by Deputy Sheriff John Schlock on complaint of Monroe Lytle, and he was brought to this city for trial. The complaint alleges that on June 2nd Jack Evans outraged the public morals of the city of Bonanza by appearing on the street, clothed in woman's nether garments. It is said that the capers of Mr. Evans caused quite a sensation in the little city.

Work on the Lake county court house at Lakeview is progressing nicely according to the statements of parties from there. The structure will be one that will be a credit to the county and will suffice all of the demands for many years.
