**PUBLIC NOTICE.**

Department of the Interior, Washington, November 18, 1908.

In pursuance of the provisions of Section 4 of the Reclamation Act of June 17 1892 (32 Stat. 388), notice is hereby given as follows:

Water will be furnished from the Klamath project, Oregon-California, under the provisions of the Reclamation Act, in the irrigation season of 1909, for the irrigable land shown on farm units of

**Willamette Meridian.**—T. 39 S., R. 8 E. T. 38 S., R. 9 E. T. 40 S., R. 9 E. T. 39 S., R. 10 E. T. 40 S., R. 10 E. T. 41 S., R. 10 E. T. 49 S., R. 11 E. T. 41 S., R. 11 E. T. 41 S., R. 12 E.

**Mr. Diablo Meridian.**—T. 48 N., R. 5 E.

approved November 16, 1908, by the Secretary of the Interior and on file in the local land offices at Lakeview, Oregon, and Redding, California.

Homestead entries accompanied by applications for water rights and the first instalment of the building and operation and maintenance charges may be made under the provisions of said act for the farm units shown on said plats. Water right applications may also be made for lands heretofore entered and for lands in private ownership and the time when payments will be due therefor is hereinafter stated.

The limit of area per entry, representing the acreage which, in the opinion of the Secretary of the Interior, may be reasonably required for the support of a family on the lands entered subject to the provisions of the Reclamation Act, is fixed at the amounts shown upon the plats for the several farm units.

The limit of area for which water right application may be made for lands in private ownership shall be 160 acres of irrigable land for each land owner.

The charges which shall be made per acre of irrigable land in the said entries and for lands heretofore entered or in private ownership which can be irrigated by the waters from the said irrigation project, are in two parts as follows:

1. The building of the irrigation system, \$20.00 per acre of irrigable land, payable in not more than ten annual instalments, each payment not less than \$2.00 per acre or some multiple thereof, provided, however, that full payment may be made at any time of any balance remaining due, after certification has been made by the Commissioner of the General Land Office that full and satisfactory compliance has been shown with all the requirements of the law as to residence, cultivation and reclamation.
2. For operation and maintenance, which will, as soon as the data are available, be fixed in proportion to the amount of water used, with a minimum charge per acre of irrigable land whether water is used thereon or not. The operation and maintenance charge for the irrigation season of 1909 and until further notice will be 75 cents per acre of irrigable land whether water is used thereon or not.

For lands heretofore entered, the first instalment on account of the said charges for the irrigable lands shown on these plats shall be paid for the season of 1909 at the local land office at Lakeview, Oregon, or at Redding, California, at the time of entry and of filing water right application, the total payment being not less than \$3.75 per acre. The second instalment shall be due and payable May 1, 1910, at the same place. Subsequent instalments shall be due and payable on May 1 of each year at the same place.

For lands in private ownership and for lands heretofore entered the first instalment shall be due and payable May 1, 1909, and the instalments for the year 1910 and subsequent years shall be due and payable on the same date and at the same place.

The first instalment of the charges for all irrigable areas shown on these plats, whether or not water right application is made therefor or water is used thereon shall be due and payable as herein provided.

The regulation is hereby established that no water will be furnished in any year until all operation and maintenance charges then due shall have been paid. Accordingly no water will be furnished for the irrigation season of 1909 for any lands, unless the portion of the instalment for operation and maintenance due and payable on or before May 1, 1909, has been paid on or before that date, and in like manner no water will be furnished in any subsequent irrigation season unless payment has been made on or before May 1 of that year of the portion of the instalment for operation and maintenance which was at that time due and payable.

For all applications for water rights filed after June 15 in 1909 or any subsequent year, one instalment of the charges for building, operation and maintenance, \$3.75 per acre, must be paid at the time of filing, but the portion of the instalment for operation and maintenance shall be credited on account of the instalment of said charges for the subsequent year.

If any instalment of the charges shall not have been paid in full on or before May 1 of the year subsequent to that in which it is due and payable as herein provided, it shall then become delinquent and under the terms of Section 5 of the Reclamation Act, the entry and water right application shall be subject to cancellation with the forfeiture of any moneys paid thereon.

The charges herein provided for may for the convenience of applicants be paid to the special fiscal agent of the U. S. Reclamation Service assigned to the Klamath project for transmission to the register and receiver of the local land offices on or before the date specified for payment at the local land offices; but in case this privilege is availed of, the necessary charges for transportation of the cash as determined by the Special Fiscal Agent, must accompany the payment of the water right charges.

**NOTICE.**

To All Actual Settlers on Railroad Lands:

The time has now arrived when every settler on railroad lands should join in a complaint in the suit now pending between the Government of the United States and the Railroad Company and others. The object of this is that the rights of every one may be settled at the one time, and every person who intervenes, if the settlers are successful, as we fully believe they will be, will at once be enabled to obtain title to their land, while if they are not joined in this suit, complications will be sure to arise, either by forfeiture of the lands to the Government of the United States, or by reason of a decree of the court simply affecting parties to the suit, or in other ways that will make it more expensive to the parties than at present, and would take them a long time to get title even if successful in other proceedings.

All parties who are interested are invited to call upon or correspond with the undersigned at once.
