

BIG POWER PROJECT.

The Skaklyou Electric Power and Light Company proposes to begin work on a new power plant on the Klamath River, which is to be completed in three years or less and made capable of developing 64,000 horsepower. The plant will be located at Ward's Canyon. The tunnel will begin above the canyon and pass through the mountains at the bend of the river.

The company's present plant at Fall Creek is developing about six thousand horsepower, which will soon be insufficient to meet the demands upon it.

The Skaklyou Electric Power and Light Company has recorded in the County Recorder's office at Yreka claims to 450,000 inches, measured under a four-inch pressure, of the waters of the Klamath River to be taken at two points about half a mile distant from the present power plant on Fall Creek. Alex J. Roaborough, secretary of the company, is the claimant and locator. Jesse W. Churchill is the president of the company. The water location is said to cover the entire flow of the river at low water.

The company claims the right to use the water for household, stock, manufacturing, irrigating, agricultural and mining purposes and for the purpose of developing electrical power and power for all purposes.

The notices filed by the company state that two dams are to be built across the Klamath River, the larger dam to be 200 feet in height, 750 feet in width, 220 feet in thickness at the bottom, and 20 feet in thickness at the top, substantially constructed of cement and rubble. The smaller dam is to be 30 feet in height, 200 feet in width, 40 feet in thickness at the bottom and 10 feet at the top. The water from each dam is to be diverted on the south side of the river. Since the filing of the plans on the 15th inst. the company has changed the proposed height of the larger dam to 240 feet.

The flow from the larger dam is to be turned into five tunnels, each 11 feet in diameter and 1200 feet in length; the bottom of the tunnels to be level with that of the dam giving the full pressure of the river and dam; the tunnels to be lined with steel, iron or cement. Machinery is to be installed at the mouths of the tunnels to utilize the water.

The flow from the smaller dam is to be carried through a single tunnel 40 feet wide, 10 feet high and 1500 feet long, then through a ditch 35 feet wide, 10 feet deep, length not given, into a second tunnel 40 feet wide, 10 feet high, 500 feet long, into a penstock 40 feet long, 10 feet high and 20 feet wide. From the penstock the water is to be carried through five pipes of eight-foot diameter and 550 feet length, with a grade of 160 feet fall in 500 feet, to the power house on the Klamath River. The company has 60 days from February 13th in which to begin work.

Four days before the company posted its notices one J. A. Whitehead, giving San Francisco as his address, posted a notice on the south bank of the Klamath River, about three miles downstream from the state boundary line, claiming 100,000 inches of water, measured under a four-inch pressure, to be diverted by means of flumes, dams, ditches, canals, tunnels and siphons, the canal to be 50 feet wide and 15 feet deep, to be used for irrigation in the Shasta Valley and surrounding country, and for the development of electric power for public purposes.

An official of the Skaklyou Power Company, it is said, has stated that when the company filed its notice it had no knowledge of the earlier record made at Whitehead's request. Whitehead claimed to represent capitalists who have abundant resources to prosecute its plans.

An enterprise similar to that of the Skaklyou Power Company was begun a few miles north of the proposed plant by the Southern Pacific Company, above Topay Grade, below Keno Oregon, and several miles of ditch was completed before the recent financial stringency compelled the company to desist. The company's plans provided for a plant capable of developing 90,000 horsepower.

DR. MERRYMAN SICK.

Word has been received from Dr. Merryman to the effect that he is under the doctor's care in Portland. Senator Merryman was taken sick in Salem and was confined to the hospital there for a week previous to the adjournment of the legislature. He was then moved to the home of his parents in Portland. He is suffering from Ilio-Colitis, which is believed to have been caused by drinking water at Salem.

The French Ministry of Trade and Industry will organize a floating exhibition of manufactures and industries to visit the ports of other European countries.

PLEAD NOT GUILTY.

Chas. Liskey and Alf. Wallis were brought into Court Friday morning to plead to the charge of stealing a steer and a cow belonging to Rex Bord on November 6 of last year. Attorney Leavitt, on behalf of Liskey, entered a demurrer to the indictment, claiming that the Grand Jury had no legal authority to find an indictment. It was argued that when the first panel of jurors were discharged, the Grand Jury being a part of the panel was also discharged, and therefore had no legal authority to find an indictment. The demurrer was overruled by Judge Noland without argument by the attorneys for the state. H. L. Benson, of Benson & Stone, appeared for Wallis. The two men then entered pleas of not guilty. The Court then asked if the state was ready to try the cases and was informed by Prosecuting Attorney Kuykendall that they were ready for the case of the State vs. Wallis on a charge of horse stealing. The case was set for trial at 9:30 Saturday morning. Judge Drake has been retained as private prosecutor to assist Attorney Kuykendall in the stock rustling cases.

MORE IMPORTED STALLIONS.

Messrs. McLaughlin Bros., America's leading horse importers, have shipped to Emerson Mays, their representative here, two extra good imported Percheron stallions and one of their handsome Imperial French Coachers, named Finasseur, to their Mr. M. C. Biggerstaff who is also representing them in Klamath County.

The stallions arrived on the steamer Klamath today and will be given two days rest, then Mr. R. E. Woods, another agent, and Mays will take the large drafters to interior points of Klamath and Lake Counties where they need good stallions.

The Messrs. McLaughlin Bros. have a great demand on the main line for their stallions and have neglected to come to Klamath County until of late. They plainly see that the coming of the railroad will be a great help to the stockmen of Klamath and Lake Counties. Therefore they will endeavor to make a few sales of their valuable horses which will be a great help to them in future sales, when all breeders will want a first class stallion.

PROTEST AGAINST GAME LAWS.

The people throughout the entire county are thoroughly aroused over the provisions of the new game law, and serious talk is now being made to try and kill it by the initiative and referendum law. It is expected that a petition will be circulated in a short time asking that the bill be submitted to the people for decision. If sufficient signatures are received, it will have the result of stopping the operation of the new game law until the next election.

The water fowls on the Klamath marshes are mating already and to allow shooting until the first of April would exterminate all the ducks in the country. In August, when the open season would commence, the ducks are unable to fly and a man wouldn't need a gun; he could kill them by the hundreds with a stick.

DREDGE REACHES MIDLAND.

The first dredge, working on the railroad cut across the marsh, reached Midland Thursday. The mammoth dredge which is finishing the grade is about 3000 feet from the shore and will take about two weeks to complete the work.

This will finish the work to connect with the grade on the main land built by Contractor Sayers. The grade across the marsh will then be leveled off and the laying of rails commenced. The grade is already practically finished from Midland to Klamath Falls, and it will take about ten days from the time work is commenced laying rails to reach this city. From present indications train service will be established to Klamath Falls some time in April.

The biggest experiment in sewage farming ever made in America may be undertaken in Suffolk County, N. Y. A tract of 100,000 acres on the sandy wastes of Long Island, which is now productive of nothing more valuable than scrub oak and rabbits, is said to have been purchased for this purpose. It is asserted that the purpose is to utilize this territory for a series of farms for the treatment of sewage from Greater New York by the irrigation process, by which stretches of sandy soil near cities in Europe have been turned into fertile fields. The plan suggested is that of piping the sewage of the metropolitan district and possibly New Jersey in two main lines, running probably from Wallabout and Coney Island districts.

There are 2800 counties of agricultural importance in the United States.

MAKE THIS UP AT YOUR HOME

Prepare at Home by Shaking Ingredients Well In a Bottle

What will appear very interesting to many people here is the article taken from a New York daily paper, giving a simple prescription, which is said to be a positive remedy for backache or kidney or bladder derangement, if taken before the stage of Bright's disease:

Fluid Extract Dandelion, one-half ounce; Compound Kargon, one ounce; Compound Syrup Sarsaparilla, three ounces. Shake well in a bottle and take in teaspoonful doses after each meal and again at bedtime.

A well-known druggist here at home, when asked regarding this prescription, stated that the ingredients are all harmless, and can be obtained at a small cost from any good prescription pharmacy, or the mixture would be put up if asked to do so. He further stated that while this prescription is often prescribed in rheumatic afflictions with splendid results, he could see no reason why it would not be a splendid remedy for kidney and urinary troubles and backache, as it has a peculiar action upon the kidney structure, cleansing these most important organs and helping them to sift and filter from the blood the foul acids and waste matter which cause sickness and suffering. Those of our readers who suffer can make no mistake in giving it a trial.

One of the most interesting and picturesque trees in the world, as well as one of the most ancient, is the Monterey cypress. Its native habitat is extremely restricted, for it is found in its wild state in only two spots in the whole world—on the edge of a grove of conifers stretching for a few miles between the Bay of Monterey and the Bay of Carmel (the latter of which bears a striking resemblance in outline and color to its prototype in the Holy Land) and in a similar spot near Pescadero, a little town lying on the coast between Monterey and San Francisco. The Monterey grove consists of only a dozen or two cypresses of large size and most striking appearance. Their trunks are massive and wrinkled with hoary age, while their boughs gnarled and twisted, grow chiefly on one side, away from the stormy wind that has buffeted them for thousands of years. The noble trees are limited to the rocky, wind-beaten shore, on which some of them have but a precarious hold. Hemmed between the slowly encroaching ocean on one hand and a pine forest on the other, their future is exposed to great hazard. It is, therefore, gratifying to observe that a number of thrifty young cypresses are holding their own against the pines for a short distance inland.

During the thirty-seven years that the German Federal Government has been in existence 2,707,676 natives have emigrated, nearly five-sixths of them to the United States.

INDIGESTION IS ENDED FOREVER

Misery from an Upset Stomach Vanishes Five Minutes Later

Why not start now—today, and forever rid yourself of Stomach trouble and indigestion? A dieted stomach gets the blues and grumbles. Give it a good eat, then take Pape's Diapepsin to start the digestive juices working. There will be no dyspepsia or belching of Gas or eructations of undigested food; no feeling like a lump of lead in the stomach or heartburn, sick headache and dizziness, and your food will not ferment and poison your breath with nauseous odors.

Pape's Diapepsin cost only 50 cents for a large case at any drug store here, and will relieve the most obstinate case of indigestion and upset stomach in five minutes.

There is nothing else better to take gas from stomach and cleanse the stomach and intestines, and besides, one triangle will digest and prepare for assimilation into the blood all your food the same as a sound, healthy stomach would do it.

When Diapepsin works, your stomach rests—gets itself in order, cleans up—and then you feel like eating when you come to the table, and what you eat will do you good.

Absolute relief from all Stomach misery is waiting for you as soon as you decide to begin taking Diapepsin. Tell your druggist that you want Pape's Diapepsin, because you want to be thoroughly cured of indigestion.

Many farmers believe that dandelions increase the yield of milk and, consequently, that the presence of dandelions in pastures and meadows is rather desirable than otherwise. A Belgian investigator, J. P. Wagner, has shown the incorrectness of this opinion which, he says, is founded wholly on a false analogy, suggested by the milky juice of the dandelion. According to Wagner, the presence of dandelions in large numbers in pastures exerts a very deleterious effect on the quality of the butter and is one of the numerous causes of the difficulty of making butter of fine flavor and good keeping qualities in spring and early summer. The presence of large quantities of dandelions in hay has a similar effect. Hence Wagner advises farmers to weed their pastures, whenever it is practicable to do so.

There are more McCall Patterns sold in the United States than of any other make of patterns. This is an account of their style, accuracy and simplicity. McCall's Magazine (The Queen of Fashion) has more subscribers than any other 1. size Magazine. One year's subscription (12 numbers) only 20 cents. Latest numbers, 3 cents. Every subscriber gets a McCall Pattern Free. Subscribe today. Lady Agents Wanted. Handsome premiums of McCall's Magazine. Free Catalogue of the latest styles and Dressing Catalogue (showing 400 premiums) sent free. Address THE McCALL CO., New York.
