### TEDDY KILLS AN ELEPHANT.

NAIROBI (British East Africa) May 14.—Theodore Roosevelt yesterday killed one elephant and captured another one alive. The live elephant he is sending as a gift to the New York Zoological Gardens.

The former President's first elephant was a big "tusker." The beaters had rounded up a dozen of the beasts. Roosevelt selected the biggest in the herd for his special prey and went after it.

The "tusker" was not vitally wounded at the first shot, which the former President sent plunging into his huge hulk. Instead of retreating, the elephant charged his assailants. Roosevelt, his son Kermit and Frederick C. Selous were in close quarters for a time. All were in imminent danger, and only escaped by a well-directed shot from the heavy express rifle of Roosevelt, which brought the beast to earth.

The remaining elephants in the herd stampeded. One of them, however, a baby pachyderm, only two months old, was unable to get away. It was roped and it will go to Montana by rail for shipment to New York.

### ALFALFA FOR FOOD.

OMAHA, May 16.—Omaha goes the vegetable food faddist one better and furnishes the proof that a man can live on hay and enjoy the best of health.

There are college men in town to prove the assertion. At the Creighton University there are clubs galore, and among them is one known as the "Alfalfa Hay Club" with 23 members, and one of the purposes of the organization is to demonstrate the very important fact that alfalfa is a human food product, as well as food for animals. The young men are working in the interest of science and at the same time they are furnishing daily evidence that grass is very palatable when properly treated.

The alfalfa leaves, with a small portion of the upper parts of the stalks, are ground together. Then they are run through a bolting machine that turns out a meal almost as fine as flour and having a rich brown color. The meal is then bleached until it has a creamy hue. It is cooked into a large number of very palatable articles of food.

Paris has an organization known as the Syndicate of the Discontented. Anyone who has a grievance is invited to become a member. The name is not appropriate; the organization should be called "Everybody's Syndicate."

### NEW WAY TO WORK THE BUSY LITTLE ANT

Ukiah, Cal., May 17.—Ranchers of this section are enthusiastic over a novel plan for combating the destructive fruit tree scale that has been discovered by Professor Harlan.

Harlan learned that the ordinary black ant is a deadly foe to the scale, and the experiments tried by the Ukiah ranchers prove that a colony of the ants will rid a tree of its scale in surprisingly short time.

According to the method most popular among the experimenters, a plate of sugar is placed near an ant hill, and when it becomes covered with the little insects it is removed to a fork of the tree to be treated. The ants at once leave the sugar and attack the scale vigorously. When they have cleaned the tree of the pest they again congregate on the sugar and are removed to another tree. It is thought that the discovery will be worth thousands of dollars to the fruit growers.

The United States Supreme Court is to decide whether or not bleached flour is dangerous. If it is anything like bleached hair, we have no doubt that the jurists will be tempted to consider the case behind closed doors.

### YAMHILL COUNTY VOTES \$56,000 FOR GOOD ROADS

M'MINNVILLE, Or., May 13.—The subject of good roads is a pertinent one with the Yamhill county court, a 5-mill special road tax having been levied in this county this year for permanent road improvement.

Four rock crushers of heavy capacity are crushing rock for the formation of macadamized roads throughout the county. During the 12 months of 1903 the sum of \$56,250.34 was expended for roads and highways in the county independent of the amount spent for bridges, and the road expenses for this year will exceed it by half.

Col. M. G. Wilkins will leave Friday for Medford, where he will attend the meeting of the Crater Lake road enthusiasts, at which time Governor Benson will make public his appointments of members of the commission. After the meeting Mr. Wilkins will attend the opening of the Rose Carnival at Portland, and from there will go to Seattle to visit his wife and take in the exposition.

### UNLESS IT'S A GOOD STORE IT WILL NOT PAY TO ADVERTISE IT!

Unless you know a person—unless that person comes into your life in some way—you are not greatly concerned about whether he is good or bad, desirable or objectionable.

It's so with a store. The people who never visit it care nothing about it one way or the other. It doesn't exist—for them. But when they are persuaded to patronize it—when they come to turn the spotlight of their attention on it—when it comes to have a part in their lives, as some stores must have in all lives—then it's different; then it does matter whether it strives to win confidence; it does matter whether or not its price concessions are genuine, dependable.

If it meets all tests that a good store must stand when it is advertised—when it thus invites the critical attention of the people—then advertising will "make" the store. If it fails in most of the vital things; if it proves, under the light of publicity not to be much of a store, then advertising will not pay—for it will emphasize the shortcomings as well as merits.

For the same reasons it is generally assumed that the store which does not advertise is seeking to avoid close inspection and comparison, and that the store which does is courting them.

Charles Loomis and James Dixon came up from Merrill Monday.
