Now 25c a Pair For "Holeproof Sox"

"Holeproof" at 25c a pair are exactly the same hose that have heretofore cost 33½c a pair.

The top market price for the best yarn is now less than before, and the makers are turning out so many pairs that they can afford to sell to us cheaper, so we can sell to you for less.

6 Pairs Guaranteed 6 Months
Formerly \$2—Now \$1.50

And the same guarantee goes with every box of six pairs: "If any or all of these hose come to holes within six months from the day you buy them, we will replace them free."

Buy "Holeproof" Sox now—save money—and get the original guaranteed sock—the genuine "Holeproof."

(Other "Holeproof" Sox at \$2.00 for 6 pairs and \$3.00 for 6 pairs.)

Reg. U. S. Pat. Office, 1928

CAN PINCHOT HOLD ON? A Question That Is Occupying the Mind of Officials in Wash- ington.

WASHINGTON, July 24.—To what extent can a subordinate of one department of the federal government direct the head of another department, and to what degree will the President permit such interference to extend without disciplining the subordinate or making a change in his cabinet?

An interesting controversy is pending between Secretary of the Interior Ballinger and Gifford Pinchot, chief of the forestry service of the Department of Agriculture.

Mr. Pinchot is being criticised and condemned with a degree of freedom these days that marks a diminution of his influence, if not the actual beginning of a movement to drive him from public service.

Congress Blocks Pinchot.

Months ago a resolution was passed by Congress providing that no new forestry reservations should be created, and no existing reservations should be enlarged in Oregon, Washington, Idaho, Wyoming, Colorado and Montana, except by act of Congress. Up to that time the reservations had been created and enlarged by presidential proclamation. Mr. Pinchot then found in Mr. Garfield, the Secretary of the Interior, a friend. Mr. Pinchot persuaded Mr. Garfield to withdraw as administrative sites in different localities from 50 to 200 or 300 acres near forestry reservations.

Upon the change of administration, when Mr. Ballinger succeeded Mr. Garfield, a new practice was promptly inaugurated. Mr. Ballinger decided that to withdraw the so-called administrative sites was a violation of the law, and the result is that the controversy has been referred to the Attorney-General for solution.

Secretary Ballinger has other

grievances against Mr. Pinchot. Not only is he of the opinion that Mr. Pinchot has been guilty of nullifying the will of Congress, but he feels a personal interest in a controversy which Mr. Pinchot has raised and has carried to the President.

Pinchot Carries Tales.

Last February Mr. Garfield, acting upon the recommendation of Mr. Pinchot, withdrew from settlement many acres of land located along streams. The withdrawal was based upon a policy to hold in control of the government all water sites located upon public lands. The withdrawal of these lands raised a loud protest throughout the West, and Mr. Ballinger, promptly upon taking the office of Secretary of the Interior, rescinded the order of his predecessor and restored to entry the lands that had been withdrawn. Subsequently Mr. Ballinger ordered that restricted areas surrounding water-power sites should be withdrawn from settlement.

Mr. Pinchot went to President Taft and told him how water power trusts would gobble up valuable sites in the public domain. The President was impressed with the showing made by Mr. Pinchot. He sent for his Secretary of the Interior. Mr. Ballinger was asked to explain what safeguards he had thrown out to protect for the public the valuable water-power sites. Mr. Ballinger experienced no difficulty in convincing the President that his action had been conservative, and that he was right.

Throughout the controversy Secretary of Agriculture Wilson has remained a mere spectator. Mr. Pinchot is supposed to have great influence, but whether it will be sufficient to keep him in his present position in the face of the opposition of Secretary Ballinger remains to be developed.

Mr. and Mrs. Fred Mills, Mrs. R. E. Merryman and Mrs. Lee of San Jose returned Sunday from a trip to Crater Lake.

BOARD OF DIRECTORS ADOPT APPROPRIATE RESOLUTIONS

Will Render All Assistance Possible
to Secure the Carrying Out of
Committee's Program.

Following are the resolutions adopted by the directors of the Klamath Water Users' association at their special meeting when the letter from Mr. Hopson was considered. The high tribute paid to the committee is well deserved. The action taken by the directors should meet with the cordial support of the land owners. There will no doubt be some difference of opinion, but it is a self-evident fact that no body of men could have accomplished more than has been done by the committee. There was only one thing left for the directors to do—approve it.

Whereas, a committee composed of Judge Geo. Noland, L. F. Willis, E. Terwilliger, J. G. Griffith and Abel Ady, selected by the board of directors of the Klamath Water Users' association to confer with Supervising Engineer Hopson and Project Engineer Patch for the purpose of effecting a definite understanding respecting the reorganization of the Klamath Water Users' association;

Whereas, said committee has faithfully, diligently and honestly performed their duty and secured favorable results from their conferences;

Whereas, this board wishes to express its appreciation of the work done by the said committee, and also for the courtesy shown the committee by Supervising Engineer E. S. Hopson, Project Engineer Patch and W. S. Wylie, attorney, U. S. R. S.; it is therefore

Resolved, that a vote of thanks be extended the committee for their faithful and honest work; also to Supervising Engineer Hopson, Project Engineer Patch and Attorney Wylie, U. S. R. S., for their courtesy;

It is further resolved, that a copy of these resolutions be spread upon the minutes of this meeting and a copy published in the daily papers published in Klamath Falls.

Whereas, Supervising Engineer

Hopson, U. S. R. S., requests the board directors of the Klamath Water Users' association to co-operate in obtaining the stockholders of the Klamath Water Users' association to increase the capital stock of said corporation from a capitalization of \$2,000,000 to \$6,000,000, and the par value of each share be increased from \$20 to \$30 per share; and

Whereas, it is essential that this board act upon said request at once, and that upon receiving a favorable report the price of water in the Upper Project will soon be announced, the proposed constructions determined, and more definite plans for reclamation of the marsh lands and entire project be made known to the stockholders; and it further appearing that the best interests of this association will be subserved by assisting in the matter; now therefore, be it

Resolved, that this board notify Supervising Engineer Hopson that this board will render all assistance within its power towards increasing the capital stock of this association and the par value thereof.

PLEVNA ITEMS.

Those visiting the Falls from Plevna and vicinity Saturday were: Mr. and Mrs. Brentner Sr., C. B. Faulkner and sister Nellie, Arthur and Clifford Sevits, Mr. and Mrs. Byers and daughter Mary, and E. Thompson and daughters Lola and Blanche. Charley, Emery and Glenn Sevits made a trip to the Falls Sunday.

Mrs. Brentner Sr., who has been visiting at Santa Barbara, Cal., returned to her home in Plevna last week.

H. H. Van Valkenburg is haying this week.

Mrs. Rice Brown of Round Lake visited with Mrs. Barnes of Plevna Monday.

Mr. and Mrs. Kerns called on Mr. and Mrs. Sevits Sunday.

Mr. Swan of the Falls was in Plevna on business Tuesday.

J. H. Barnes was at G. W. Heavilin's Tuesday.

Nellie Faulkner of Bakersfield, Plevna.

C. B. Faulkner is cutting hay for Mr. Swan.

Mr. Ager is haying this week.

J. H. Barnes was in town Wednesday.

A. Brentner is cutting hay on Mr. Lee's place.

G. Byers was in town Friday.

NO DECISION REACHED OVER STREET CAR AFFAIRS

Expert Is Coming to Inspect Project
and Recommend What Improve-
ments Should Be Made.

There seems to be a hitch in the electrifying of the street car system and how long it will tie up matters cannot be stated at this time. It seems that affairs have taken such a turn that it may be necessary for the Klamath Falls Land and Transportation company to erect a power plant of its own in order to secure power at a price it can afford to expend. In the meantime it is likely that a gasoline motor car will be installed. C. N. Hawkins left Monday morning for his home in Hollister. He declined to make any statement whatever about their plans, stating that matters were in such shape that no definite decision had been reached and none would be reached until matters were more fully investigated.

It is intimated that before any decision is reached an expert will be sent to this city for the purpose of examining the property of the company and passing judgment on what improvements have to be made. When asked if this were true, Mr. Hawkins begged to be excused from further discussion of the matter. The same answer was given when he was asked if the expert that is to come would not be a representative of a certain bond-purchasing people, who have been interested to the extent of buying the bonds of the company.

"All I have to say at this time," said Mr. Hawkins, "is that we intend to keep faith with the people of this city, as we have always done. Everything cannot be done at once. But the improvements we have promised will be of such a character that even the most critical will be satisfied."

Messrs. Gould and Brown are still in the city, their stay being indefinite.

B. C. Crandall of Pasadena, Cal., one of the big capitalists of Southern California, is in the city for the purpose of investigating conditions here. He is greatly impressed with the future of this city and it is quite likely that he will invest quite heavily in Klamath property.

WORD COMES FROM PORTLAND HARRIMAN MAY COME

Principal Part of His Diet Will Be
Milk, and He Proposes to Aid
in Securing the Fluid.

According to the Portland Telegram the statement that Harriman is not coming West this fall will not down. The Telegram of Saturday contained the following:

It has been learned here that E. H. Harriman, in his effort to regain his health, expects to come to Oregon and milk cows instead of Wall street. Arrangements are being made at Pelican Bay lodge which indicate pretty clearly that the "wizard of the Pacific" will spend some time at his Pelican Bay country place early this fall. The conjecture is that he will come to Oregon shortly after his arrival home from Europe in September.

The plans for preparing his Southern Oregon retreat for him include the construction of a small model dairy on the place, in which Mr. Harriman will keep a cow or two to supply him with fresh milk, which is the principal article of his diet prescribed by the European specialists now attending him. Whether he will add the exercise of milking the cows to his frugal diet is a mooted question, but he will have the opportunity of so doing should he be so inclined.

Mr. Harriman's reason for having the dairy erected at Pelican Bay is that when he was here a year ago he was unable to get a daily supply of fresh milk and cream, and now that this has become an essential part of his daily sustenance he is preparing to equip his lodge with a pair of gentle moosie cows.

COSTS UNCLE SAM MUCH TO PROTECT HIS FORESTS.

For the administration and protection of the 148 national forests in nineteen States and territories and Alaska, the government spent \$2,526,095.02, or about one and one-half cents an acre for the calendar year 1908. Of this amount \$592,169.18 was spent for permanent improvements, including the construction of 3,400 miles of trails, 100 miles of wagon roads, 3,200 miles of telephone lines and 40 miles of fire lines.

To the Public:

As an introduction to the trade of
Klamath Falls and Klamath County
I have inaugurated a Great Sacrifice
Sale. It will continue until
further notice.
