

### BLOCKS ARE A SUCCESS

#### The Hydraulic Stone and Brick Company Has Proven an Important Industrial Factor Already

It is expected that thirty days will see the completion of the Jacobs' block at the corner of Sixth and Main streets. This structure has been watched with the greatest interest, due to the fact that it is the first structure in the city to use the cement blocks manufactured by the Hydraulic Stone and Brick company. As is the wont in so many communities, every new enterprise is condemned without a hearing. The product of the Hydraulic Stone and Brick company was no exception. It was strange to hear some business men busy telling why such a block would not be a success, and that it never would be used in the erection of buildings in this city. The prognosis, however, proved incorrect. Everyone is agreeably surprised with the result obtained with the block in the Jacobs building.

It has been demonstrated that these blocks will stand the severest test to which they may be put, and no longer is there any fear manifested as to their value as a building material. As for beauty of effect, they are hard to beat.

Another structure that is being erected with these blocks is the residence of J. A. Thompson. A different face from that used in the Jacobs block is being employed, and is proving very popular.

The value of this industry to the city has been demonstrated to a large number of the business men of the city during the past few months. Thousands of dollars have been paid out for labor, and this found its way into the channels of business, every line being benefited. Plans are under contemplation for enlarging the scope of this industry, and it is safe to say that the time is not far distant when it will be one of the principal revenue producers in the city.

### DRILLING FOR WATER

#### IN YONNA VALLEY

##### Attempt Being Made to Locate the Fort Klamath Artesian Flow

William Wood of Bonanza, A. L. Michael, C. H. Burgdorf, Liskay brothers and other residents of Yonna valley have employed the services of Mr. Powers, the driller who brought in most of the artesian wells in the Fort Klamath country, to drill a well in Yonna valley, in the hopes that the artesian flow from the Fort may be tapped. At last reports he was down 500 feet, having made over 200 feet the first day. Great things are looked for if Mr. Powers is successful.

One resident of Yonna, H. S. Oden, seems to have been thoroughly convinced that artesian water would be found, and the finding followed by a deluge, for it is reported that he came to the county seat for the purpose of securing an injunction to stop operations, basing his plea on the belief that if a flow was struck all property in the neighborhood of the well would be inundated. At last reports no injunction had been issued.

**EXHIBIT BOOTH COMPLETE**

Farmers invited to send in their Exhibits

Tonight the exhibit booth on the courthouse grounds will be illuminated, and from now on is ready for exhibits that may be submitted. Those who are in charge earnestly invite the farmers and ranchers to submit all specimens they may have. The exhibits will be changed now and then, and there will be plenty of room for all that can be sent in, and every farmer may be certain that his exhibit will be very welcome.

The object is to let the passing stranger and those who have lived here for some time know what can be done on Klamath county soil, and if all help as they can this will be accomplished more efficiently and thoroughly than otherwise.

A New York woman left her husband because he threw eggs at her. That was not only impolite, but extravagant.

### WASHINGTON MEN BUY LAND

#### Substantial Citizens From Northern State See Advantage of Investing Now

Several practical young farmers from Klickitat county, Washington, have been here for the past week looking over the Klamath basin. While it was not their intention to buy land on this visit, still the country looked so good to them that they bought two small tracts and secured options on larger holdings.

The party was comprised of Robert, Alex and William Cheyne, Sam L. Courtney, Lee Benson and W. Thompson. Robert Cheyne bought the A. Kershner place of forty acres near Henley at \$45 per acre. Mr. Courtney purchased 80 acres from R. H. Short and took an option on another tract. Alex and Wm. Cheyne secured an option on 160 acres of land under the ditch, making a substantial payment to hold the property. Messrs. Benson and Thompson have leased the O. K. barn and will engage in the livery and feed business.

The members of the party who have become interested in farm lands have returned to their Washington home to dispose of their holdings there, so that they can come here at once to occupy the lands they have secured. It is the intention of these gentlemen to interest a number of Washington farmers in lands in this section. It is quite likely that as a result Klamath county will gain a very desirable class of citizens who will do their part in making this section one of the wealthiest agricultural districts in the state of Oregon.

All of the purchases made and options secured were through the Home Realty company, which firm has recently succeeded in interesting several desirable residents in Klamath lands.

### TEACH THE BOYS A TRADE

#### They Know Not What to Do on Leaving School

Social and industrial conditions in the United States demand that industrial education for the rich and poor alike should be democratic. This conclusion was reached by many leaders of workingmen and industrial educators addressing the American Federation of Labor's committee on industrial education today.

Suggesting that European countries were far ahead of the United States in the matter of fitting young girls and boys for a trade, Charles F. Richards of New York city, originator of the National Society for the Promotion of Industrial Education, argued that the committee should fight for a plan that would relieve the American schoolboy of the confusing plight of not knowing what to do when turned away from school.

He declared that more than one-fourth of the boys left the public schools in New York before graduation because they "were sick of it." This he regarded as due to lack of industrial training.

President James Duncan of the Federation strongly indorsed the proposition of introducing industrial training into the last grades of the grammar schools.

**FALL IN LINE**

Howard L. Shepherd has begun the good work, and today sent down a lot of grain, fruit and vegetables to be placed in the exhibit building on the courthouse grounds. Mr. Shepherd has done a great deal in the way of advertising this country, and now again is first with his contribution to the exhibit building.

It is up to the rest of us to follow his example and fall in line.

Harvesting the last of October is an unusual thing, but nevertheless there are still several ranchers who have not completed this task. In the vicinity of Midland there is yet a considerable acreage of grain in which the headers are now at work. Little threshing has been done, and judging from the many grain stacks it will be late in the season when the golden grain is finally stored away for safe keeping.

John Jacobson of Bly registered at the American Friday.

### CRONEMILLER IS SURPRISED

#### Land in the Fort Klamath County Reaches Figure That Astonishes the Former Publisher

F. P. Cronemiller, formerly publisher of the Herald and now receiver of the land office at Lakeview, is in the city for a few days. This is his first visit to his old camping grounds since he was fortunate enough to get out of the newspaper business and into a governmental berth. During that time many changes have taken place in this city and county, and his return finds him unprepared for the great transformation.

"I always had a good deal of faith in the future of Klamath Falls and Klamath county," said Mr. Cronemiller, "but I have come to the conclusion that I was not quite the seer I had believed myself to be. During the past year the changes that have taken place far exceed what I thought possible, and I am now ready to believe that the prediction of 25,000 for 1915 will not fall far short of the mark."

"One thing in particular that has astounded me, as well as everyone who has had any knowledge of the fact, is the tremendous increase in the values of land in Fort Klamath country. The demand for property there is very strong, and the prices have reached a height that the optimistic had never dreamed of. It is now only a question of what the limit is going to be."

"What has happened in the Fort country I find has occurred elsewhere in the county. The demand for land is increasing and with it the price. In Klamath Falls I see many changes that give me a good deal of satisfaction, and the day is not far distant when it will be the second city in the state."

### HILL ROAD TO KLAMATH FALLS IS A CERTAINTY

#### Will Double Force Next Week—1,200 Men Now at Work.

Chas. Horton, the big stockman at Olene, has just returned from The Dalles and Bend, where he has been shipping cattle to the Hill camps along the Deschutes. Mr. Horton received the contract for supplying beef to the men working in Porter Bros.' construction camps, and was recently notified that they expected to double their force of men, and that he should be prepared to allow eight head of beef a day, instead of four, as at present.

Porter Bros. are now employing 1,200 men, and will add 1,200 more within the next week or two. Mr. Horton says it is a pretty busy country up there, and almost impossible to get a bed in any of the towns along the road.

Twohy Bros. are at work on the east side of the river, where the Harriman survey runs.

Mr. Horton, who is in a position to know, said that Hill's road will come to Klamath Falls, and that, there being competition, freight rates would be much lower and the passengers given every accommodation.

It is very doubtful that Congressman Tawney will benefit from the President's tariff speech in Winona, Minn., Mr. Tawney's town. The Minnesota Republican press continues to be severely critical of both Tawney and the speech.

When Senator Bailey challenges Mr. Bryan to a joint debate, Mr. Bryan finds that the unity of the Democratic party, etc., will suffer when two of its ablest champions start to maul each other.

That Mr. Taft possesses a sense of humor is proved by his assertion that the Republican party is not a free trade party.

President Taft has never expressed the hope that corporations would develop paroxysms of delight at the prospect of being taxed.

Long, slim bay horse, branded S—the Shook brand—on left shoulder. Reward will be paid for information leading to his recovery. Shook Ranch, Dairy, Ore. 10-21-11

### WHAT THE KIDNEYS DO

#### Their Unceasing Work Keeps Us Strong and Healthy.

All the blood in the body passes through the kidneys once every three minutes. The kidneys filter the blood. They work night and day. When healthy they remove about 500 grains of impure matter daily, when unhealthy some part of this impure matter is left in the blood. This brings on many diseases and symptoms—pain in the back, headache, nervousness, hot, dry skin, rheumatism, gout, gravel, disorders of the eyesight and hearing, dizziness, irregular heart, debility, drowsiness, dropsy, deposits in the urine, etc. But if you keep the filters right you will have no trouble with your kidneys.

Josee Freeman, Sterling Mine, Jacksonville, Ore., says: "I actually believe that Doan's Kidney Pills saved my life. I suffered from kidney disease for a long time before I realized what was the matter with me. My worst troubles were pains in my back and limbs and an irregularity in the passage of kidney secretions. I was unable to rest well on account of the pains and felt so stiff and lame at times that I could hardly walk. I finally learned of Doan's Kidney Pills, and as they were so highly recommended I procured a box and began using them. They seemed to be just what I required, for in less than two weeks beneficial results were apparent. When I had used seven boxes I was in better health than I had been for years."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

It is said that the jack rabbits stood up like exclamation points when our president crossed the western plains after having indorsed the policies of "Nelson Aldrich" and "Joe Cannon."

Mr. Pinchot is satisfied; Mr. Ballinger is satisfied; Mr. Taft is satisfied. Mr. Glavis alone seems to be possessed of a lemon.

Mrs. Annie Besant says the coming man will be seven feet tall. What a horrible time that man is going to have crowding into a Pullman berth.

### UNDERWOOD'S PHARMACY

#### A FEW BARGAINS.

Five lots, sign,ly location, \$1500 Can loan \$750 on the deal.

A nice cottage with bath, large lot, \$1700. A good buy.

A large residence, fire lot, \$3500

Three cottages on three lots. Room enough for another cottage; \$2250.
