Instead of the possible 60 per cent, only 17.6 per cent were found in the churches of upper Manhattan. Seven years earlier, Dr. Waldron found only 27.4 per cent of the Protestant population of Boston at worship. The unchurched population of New York, according to the City Federation of Churches, in 1905, was 1,071,981, while members and non-communicant attendants were respectively 337,289 and 485,934, or, in percentage of the whole population, 26.7 against 20.5 for the two classes of adherents combined.
