NEW INSTRUCTOR FOR KLAMATH COUNTY HIGH

E. V. Hawley Arrives to Take Charge of the Manual Training Department This Year

Mr. E. V. Hawley, who is to teach the manual training in the County High School during the coming year, arrived in his automobile yesterday evening. He says that the best roads on the entire trip were those between here and Ashland.

Mr. Hawley is a product of the Oregon educational system, having graduated from the Electrical Engineering department of the O. A. C. in 1906. Immediately after graduation Mr. Hawley went to Schenectady, New York, where he spent about a year in the shops of the General Electrical company. From this position he was called the following spring to fill a vacancy in School of Engineering and Mechanical Arts at his Alma Mater. For the three years that he has held this position at O. A. C., Mr. Hawley has proved himself an excellent teacher. He is greatly interested in athletics, and has for some time played guard on the faculty basketball team of the college. The high school boys will no doubt call upon him to coach them in their athletics during the coming year. The county school is fortunate in securing a man of Mr. Hawley's training and experience to establish the new department.

Young Catfish are Placed in Aspen Lake

Trout Fry are Also Placed in Moss Creek—Hard Work to Stock Lakes With Fish

O. A. Stearns has returned from his trip to Aspen lake and vicinity, where he went to place the young catfish and trout fry in the waters of that lake and the streams in that vicinity. The catfish were placed in Aspen lake, while it was the intention to place the trout fry in several small lakes which lie to the northwest of that body of water. But the smoke from the forest fires was so thick that the lakes could not be found, and the young trout were placed in Moss creek instead, where they will probably find their way to the lakes sought when the high waters come after the snow is melted in the spring.
