

UNKNOWN MAN MURDERS WOMAN AND BATTLES WITH THE POLICE

(Continued from Page 1)

at him. Finally shots from the pump gun in the hands of Officer Pennish killed the man. His body was taken to the morgue.

In the dead man's pockets was found a note full of the vilest epithets. It said that he should have killed Miss Dudley last August, when she blew him at a den at 1268 O'Farrell street in San Francisco. The missive, which is partly incoherent, is unsigned. The man is supposed, from other papers found in his pocket to be C. H. Emery, of San Francisco.

Had No Love Affair

United Press Service
SAN FRANCISCO, July 26.—Ex-Governor Gillett today said that Miss Dudley had been in ill health for some years, and was recently operated upon for appendicitis.
"She was a quiet, reserved girl, and so far as I know," he said "had no love affairs which might have led to the tragedy. During the first session of the legislature while I was governor she was employed in my office. Later she was transferred to the engineer's office."

POSSESSES COIN BEARING PICTURE OF WASHINGTON

PORTLAND, July 26.—Dr. Charles W. Mapes of 1138 Belmont street is the possessor of a rare old coin, which he values very highly. It is a silver dollar coined in the year of 1795, four years before the death of General Washington. Dr. Mapes said he was offered \$125 for the coin, but refused to part with it. On one side of the coin is a picture of Washington with flowing hair, on the other side is the eagle and wreath. The piece of money is a trifle larger around and a little thinner than the present dollar pieces.
"I've carried the coin since 1891," said Dr. Mapes. "I accidentally got hold of it in San Francisco. I was in one of the fashionable saloons in the Knob Hill district when the bartender gave me the piece of money in change for a \$5 gold piece. At first I thought it was a counterfeit, and was shoving it back to him, when I happened to notice the date. I immediately took it and said nothing."

Dr. Mapes has a hobby of gathering antiques. He has a large collection of old and interesting coins.

Believing the women of the state have a direct interest in better roads, the Mothers' Congress, which is a branch of the national organization, has identified itself with the movement, and Mrs. George T. Gerlinger of Dallas, head of the Good Roads and Rural Schools committee, has taken steps to have the school children aid in the work. Boys are expected to report road conditions to the proper authorities, and if the rising generation can be interested in highway improvement, it is thought the future will provide better roads.

After an extended trip throughout Oregon, covering it for the first time, C. C. Chapman, secretary of the Oregon Development League, returned to Portland much impressed with its future. "It is better than Colorado or New Mexico, and just as good as the best parts of Utah and Montana," he said. "What is needed is for Portland to know more about the interior and to co-operate with the people of that section of Oregon for building up its agricultural opportunities."

Oregon may soon have a silk industry. A colony of Italians will settle in Wasco county next month, and the immigrants expect to raise mulberry trees for silk worms. The newcomers are said to be experienced in this industry in their own country, and they find on investigation that Oregon is suited to the growth of the "industrious worm and the manufacture of its gossamer fibre."

Secretary of the Interior Fisher will visit Oregon next month, inspecting the reclamation projects under way here. He will learn of conditions prevailing in respect to the forest reserves, vacant government lands and the other matters under his control. He will also visit other Pacific Coast sections and Alaska.

WHITE LOSES IN THE THIRD ROUND

"KID" McLELLAN HAD NO DIFFICULTY IN "DRYDOCKING" HIS TOW-HEADED OPPONENT IN A SHORT BATTLE

Before a very slim house Saturday night at Houston's, "Kid" White, the lightweight boxer from Dry Docks, N. Y., had his ambition to make good here knocked into a cocked hat in the third canto of a scheduled twenty-round bout, when McLellan won over him by the knockout route. During the first round he did some good work, but after that the bout was all McLellan's.

In the opening round White shot one over to McLellan's ear as they squared off, and Mac retaliated with a right and left to the face. After this there was more or less clinching, and the infighting was about even. White landed a hard right, oscillating Mac's head, and in dodging the blow that came in answer he slipped and fell to his knees. No power on earth could have stopped the blow, which hit White on the back, and Referee Linkenbach overruled White's claim of foul.

In the second round McLellan stock went away up, for the Kennet had had the best of the game in every way. In the infighting he was especially good, and landed some damaging punches to his opponent's stomach. In this round White claimed a foul again, as McLellan struck in a clinch, but as Marquis of Queensbury were the governing regulations, this was permissible. This seemed to take some of the ginger out of White, though he landed several good wallops. When the gong rang for the third, White came up looking tired, while McLellan was as fresh as a daisy. McLellan started in to pummel the face and body of his opponent while White swung blindly in an endeavor to keep him off. Twice White went to the floor for nine counts, but he arose each time. Once he landed a swing, but his attempts, on account of his groggy condition, to stand up and box, were pitiful. Another tap in the face sent him down for four counts, and when he arose he rushed to a clinch with McLellan, but fell in a limp heap at the feet of his opponent.

Just before the bout McLellan issued a challenge to Frankie Edwards for a twenty-round bout. He agreed on a side bet of \$500, winner to take everything. Jack Linkenbach also challenged Edwards to fight at catch weights for a \$100 side bet, winner to take everything but the licking.

The first preliminary between Kid Garnett and Kid Altman went for three rounds, each youngster slamming and swinging with great gusto and little effect. During the third Garnett went down, and as Altman struck him before he arose Referee Newman gave Garnett the bout.

Frank Williams of Merrill and Lobby Allen went four rounds to a draw, the last two sections of which were chock full of interest for the fans. During the closing chapter both went at it with a vengeance, and by the time Referee Clay Cann held up two gloved hands, each man's face looked like they did in the kid days when they swiped blackberry jam from the pantry shelves.

TAFT MENTIONED AGAIN IN THE LORIMER CASE

United Press Service
WASHINGTON, D. C., July 24.—Hines today resumed the stand in the Lorimer probe. He asserted that Boutelle went to Taft and asked his support for Lorimer, and got the presidential approval.

An unsigned letter in Boutelle's handwriting was introduced. It was addressed to Hines, and said: "I would like to have Lorimer who was the only man who went to the president in his behalf and brought home the goods."

PULLMAN SERVICE FOR KLAMATH FALLS PEOPLE

Commencing July 25th a Pullman sleeper will be run through from Oakland to Klamath Falls. This car will come from Oakland on No. 16 and be transferred to train No. 40 at Weed. It will remain in Klamath Falls over night, and go south on train No. 39 at 8 o'clock in the morning.

SPRECKLES TELLS SUGAR SECRETS SENATE PASSES RECIPROCITY BILL

SON OF SUGAR KING SAYS STOCKHOLDERS IN THE TRUST WERE SKINNED OUT OF OVER FIVE MILLIONS AT ONE TIME

NEW YORK, July 22.—Claus Spreckles, son of the sugar king, and president of the Federal Sugar Refining company, testified before the Hardwick investigating committee that the trust stockholders have been milked for at least \$5,000,000. This was for the benefit of his father, Henry and Theodore Havemeyer and John Searles.

"The trust and father's companies, especially the Federal and Philadelphia, fought ruinously from 1888 to 1892," said Spreckles, "and then a truce was declared. Father agreed to sell 45 per cent of his control in the Federal company. He came to New York and found that the Havemeyers and Searles wanted to purchase on a valuation of \$5,000,000 for the entire plant. The reason for this was learned some months later, when the stockholders of the trust voted to pay \$10,000,000 cash for the property."

Spreckles testified that Searles forced him from the management of the Philadelphia property. He said that Searles ordered him to reduce the plant's production, and advance the prices. As he refused, the conflict came.

BATTILING NELSON MAY APPEAR HERE

Fistic fans in this section may soon have an opportunity to see Battling Nelson, the Durable Dane, who had 'em all a-going at one time, when he held the lightweight championship of the world.

Nelson, as is well known, still has designs on one Ad Wolgast, and has vision of seeing the championship belt girded around his own loins. He declares that he is the one man who can "come back," and to prove this assertion he has started a barnstorming tour, taking on the best second-raters to be found. From second-raters he expects to gradually work up the scale till he gets again on his old stamping ground in the pugilistic limelight.

Friday evening Bat boxes ten rounds at Medford with Tommy Gaffney. During the coming week the officials of the Klamath Athletic Club will try to secure him for a bout here. He will probably be matched against Frankie Edwards of Oakland or Bud Anderson of Vancouver, Wash., two clever lightweight boxers, who will meet here in a twenty round mix on August 4th. Anderson was matched with the Dane in Vancouver earlier in the summer, but before the bout took place the authorities stepped in and put a stop to exhibitions of the fistcut game. The winner of the Edwards-Anderson bout will probably be pitted against Battling, and this will add more interest to the first battle.

BANK WRECKER MAY NOT BE EXTRADITED

SAN FRANCISCO, July 22.—Governor Hiram Johnson today refused to grant extradition papers in the case of Louis J. Wilde, the San Diego millionaire, who was indicted in Portland on the charge of embezzlement, unless it can be shown that he is guilty as charged. After he heard the argument, he asserted that he did not believe Wilde guilty.

Governor Johnson said he had the opinion of the attorney general, upholding his view. District Attorney Cameron of Portland has arranged a conference with Attorney General Webb to see if he can convince him of Wilde's guilt, as otherwise there will be no extradition.

MESSINGER SERVICE FOR TELEGRAPH CO.

Manager E. C. Austin of the local office of the Western Union Telegraph company, has secured messenger delivery dispatches transmitted over his company's lines, and today W. O. H. Kline of the City Messenger company commenced the work of delivering messages for the telegraph company. This will be greatly appreciated by local people, as it insures prompt delivery of all telegrams.

MOVES TO THIS CITY FROM EDMOND, OKLA.

Lake Moore of Edmond, Okla., has moved to Klamath Falls with his family, consisting of his wife and five children. Mr. Moore visited this city several months ago on the invitation of W. A. Delzel of the First National bank, and was so impressed with this section that he returned to Oklahoma and immediately began disposing of his heavy property holdings preparatory to moving here. He still has several pieces of property in his old home which he expects to dispose of in the near future.

SEVERAL SENATORS CAME IN WITH MINOR CHANGES IN THE FACT, BUT THESE WERE ALL KILLED THIS MORNING

WASHINGTON, D. C., July 22.—By a vote of 53 to 37, the reciprocity treaty, fostered by President Taft, and providing for closer trade relations with Canada, was passed by the senate this afternoon.

The reciprocity measure passed without any amendments, in the same form as it passed the house. It will probably go to President Taft next week for his signature, after he returns from Beverly.

A number of minor amendments, which came up at the last minute, were defeated. A long preliminary session was used in getting them out of the way.

Before the final vote the McCumber amendment, reducing the duty on a number of household articles, and Nelson's amendments placing grains, butter, cheese, horses, cattle and sheep on the free list, and Simon's amendment, free listing meat products, were defeated by a formal vote. A number of the Cummins amendments were defeated viva voce.

Twenty-four republicans, among them Jonathan Bourne of Oregon, voted against the bill at its final passage. Three democrats also opposed the measure.

PRESIDENTIAL BOVINE HAS A FINE NEW STABLE

WASHINGTON, D. C., July 22.—Not content with a life of ease and inaction, quietly munching grass on the broad lawns back of the White House, Pauline Wayne II—officially designated as the milk producer for the president and his family—has just been housed in a brand new stable fitted up with every modern convenience.

The stable itself is situated at a convenient distance from the White House grounds, where Pauline is let to pasture, so that she will not get unduly tired traveling the distance twice a day. In addition to being constructed according to the most modern plans, Pauline's abode is fitted up with conveniences which are usually found in dwellings for human beings.

The stable is built of brick and steel the floors are concrete and the walls are cement, so arranged that the entire structure can be flooded with water and thus kept absolutely clean. There are patent automatic filling feed and watering basins, electric lights and a shower bath. And the shower bath is expressly made for Pauline.

Every evening during the hot weather Pauline will be brought home and rubbed down and massaged by a special Swedish attendant, who will see that the bovine lady does not get too fleshy from want of exercise. Following this she will be bedded in sterilized straw and fanned to sleep by an electric fan. It is thought that if she gets restless during the summer that an appropriation will be made for a graphophone to soothe her and aid her in falling asleep.

TROUSERS FOR MODERN MAID

NEW YORK, July 22.—"Evolution in the work-a-day clothes of the business woman means trousers."

This is the expressed opinion of Dr. Maude Glasgow, a prominent woman's worker in the clubs of New York. She is serious in her belief that not many years from now the business woman will go to work in clothes hardly to be distinguished from those of her male competitor.

"Imagine how much more free a woman would be if she worked in trousers," said Dr. Glasgow. "Just let a man try skirts and see what he would do."

"Nothing can be said against the trousers for women on the ground of immodesty, for there can be nothing more immodest than the present style of clothes. Women seem to have lost all sense of the dignity of dress. Trousers would show a great deal less of the contour of the figure, less of the ankles, and would be more decent for women than their narrow skirts and low cut waists."

MOYER HINTS AT A "LABOR TRUST"

BUTTE, Mont., July 22.—Declaring that labor unions would eventually be brought under the Sherman antitrust law, at which time their legal status will depend on the court's opinion as to whether they are "unreasonable," President Charles Moyer in his annual report to the Western Federation of Miners here recommended labor support for the recall of judges. He considers the recall the only defense labor would have against judges opposed to the union movement.

Moyer also recommended the purchase of corporations with money now

devoted to strike funds and the active participation of the federation as a whole in politics.

WILL DIAGNOSE DISEASE THROUGH "HUMAN AURA"

CHICAGO, July 22.—Following the discovery that an aura or "human atmosphere" surrounds every person, Dr. Patrick S. O'Donnell of Chicago is confident that the results will be that physicians will be enabled to exactly diagnose every ailment that the flesh is heir to.

"The human aura is an emanation from the body visible as a soft blueish gray light under certain conditions," said Dr. O'Donnell. "Every person gives off this aura, which varies with physical and mental condition of the subject. The best auras are discovered around highly excitable persons, who are of marked intelligence. Women, as a rule, are better subjects than men. The width of the aura that surrounds a woman's body is from twelve to twenty inches, while men often display an aura of only three or four inches."

A corpse, says Dr. O'Donnell, has no aura, which can be seen to vanish as life leaves the body. In case of disease in any portion of the body the appearance of the aura in that part is changed. In case of cancer the light over the afflicted portion is greatly increased. These changes, it is believed, will indicate to the diagnosing physician the exact location of the ailment, even though the pain produced by it is in a different part of the body.

JUGGLING WITH SCHEDULE IS CAUSE OF LOW WOOL PRICE

I. D. Applegate has returned from Cornell, where he has been looking after the sale of his wool. From him we learn that Applegate, Murphy and O'Connor will have their wool clip of 150 sacks, aggregating between 55,000 and 60,000 pounds, shipped by the gravel scow to Merrill at once and delivered at Klamath Falls by teams, where it has been sold to J. Koshland & Co. of Boston.

The price received for the wool was 13½ cents, which is 3½ cents less than last year and 7½ cents less than two and three years ago. Mr. Applegate says that this section has lost in revenue \$2,000 over last year and \$3,500 over two years ago. It is his opinion that the low price received this year is directly due to the tinkering with the wool duty by the present congress, and he says that while the people have been promised a reduction on the cost of underwear and woolen goods, it will take a mighty long time to get even in a section where the sheep and wool business is a leading industry.

NEW GUN SENDS SHELL CLEAR OUT OF NIGHT

WASHINGTON, D. C., July 22.—A gun that will carry its projectile clear out of sight is the style that is to be placed in the turrets of the battleship of our navy.

The gun has been tried out at the proving grounds and has shown that it is without doubt the most powerful naval weapon in the world.

With a muzzle velocity of 2,400 feet a second, the shell will have a range of about fourteen or fifteen miles. Consequently it will land far beyond the horizon at extreme elevations. It might hit a ship that the gunners could not see; a friend or an enemy, perhaps. Hence the ordinance officers will be unusually careful with ships mounting these great guns for target practice.

CONVICTED COUNTY ASSESSOR SENTENCED TO EIGHT YEARS

United Press Service
OAKLAND, July 24.—Assessor Dalton was this morning sentenced to serve eight years in the penitentiary following his conviction upon a charge of bribery. His attorneys announced that they would not appeal. Dalton was arrested May 18th, after he had taken \$5,000 in marked bills from Samuel Eastman, vice president of the Spring Valley Water company. The evidence at the trial showed that he had agreed to reduce the assessment of the company in Alameda from \$1,500,000 to half of that for a bribe of \$25,000. Detectives who overheard the arrangements saw the transaction when the bills passed. Dalton was indicted the next day, and convicted July 14th.

WETS AND DRY SCRAP WITH BALLOTS IN TEXAS

AUSTIN, Texas, July 22.—The entire state of Texas is today balloting on the adoption or rejection of the constitutional amendment providing for prohibition throughout the entire Lone Star state. Fine weather prevails.

On account of the great interest, one of the heaviest ballots on record is being cast. Governor Colquitt is among those who are opposed to the move to prohibit the liquor traffic.

BACK GIVES OUT

Plenty of Klamath Falls Readers Have This Experience

You tax the kidneys—overwork them—
They can't keep up the continual strain.
The back gives out—it aches and pains;
Urinary troubles set in.
Don't wait longer—take Doan's Kidney Pills.

Residents of this vicinity endorse them.

Can Klamath Falls people doubt the following evidence?

J. J. Myers, 758 Boulevard street, Ashland, Ore., says: "The public statement I gave in 1907 in praise of Doan's Kidney Pills holds good, and I am glad to confirm it. Although I never had much faith in proprietary medicines, I was finally induced to procure a supply of Doan's Kidney Pills and begin their use. My back pained me severely, and I could not stoop without becoming dizzy. I was also annoyed a great deal by too frequent passages of the kidney secretions. Doan's Kidney Pills gave me relief after I had taken a few doses, and continued use brought the most satisfactory results. My advice to people similarly afflicted is to give this excellent medicine a trial."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

ASHLAND MEN TO CONSTRUCT THE THIRD UNIT OF SEWERS

After advertising for bids on three different occasions, and rejecting two sets of bids submitted, the city council has at last awarded the contract for the construction of the third unit of the sewer system. The contract has been awarded to Thomas H. Simpson and E. E. Phipps, contractors from Ashland. These gentlemen were the only two who bid on this work, as the Chico Construction company and Frank Roberts, who bid on the two former occasions, withdrew from the field.

By the terms of their bid the contractors agree to build the sewer unit complete, furnishing the pipe, for \$12,667.65. In the first bids submitted, Frank Roberts' bid for the sewer complete was \$13,835. He made a bid of \$10,000 for the work alone.

The bonds of the contractors have been placed at \$10,000, and they will commence work as soon as possible, in order to complete the system by the coming of the bad weather season.

The bids as introduced by the Ashland men was for \$12,979.20, giving the city the right to deduct \$392.15 in case they saw fit not to build a portion of the unit on Main street, as originally planned. This would necessitate the tearing up of the pavement near the Baldwin Hotel, and cause quite a bit of expense. As the Baldwin Hotel and the buildings on the opposite side of Main are already sewered, it was pointed out where the work could be done cheaper by following the curb on Main for a distance of 345 feet with the sewer carrying the sewage of Cedar street.

It was suggested that the city eliminate this piece of work from the contract, and enter into a separate contract for it, and then a discussion arose in which Councilman White took a prominent part. White seemed to think that this matter could be taken up some other time, but Wilkins was in for immediate steps. "I think we ought to do something now," said the Colonel. "I'm tired of this procrastination."

N. C. O. ENGINEERS NEAR LAKEVIEW

The locating party under command of Engineer Will Oliver finished the work mapped out for them at New Pine Creek Thursday, and moved to the Eccleston place, six miles south of Lakeview last Saturday morning. From this point Mr. Oliver will permanently locate the line from Punk's Point to Lakeview.

In commenting upon the line that would be followed Mr. Dunaway while here stated to some of our local people that the west line was impracticable, and that the tangent line to the east would be followed if all the right of way had to be condemned. This, he said, was the best line for the road and that this line would greatly facilitate both speed and the handling of the valley's products.—Lakeview Herald.

Header for Sale

McCormick header in good running order, with three header boxes. Can be examined at the E. S. Phillips ranch on the Merrill road. r 27-4*

To the Farmers

We want your eggs, chickens and produce. Call and see us. The Fulton Market, Main street, next to Muller's Music company.
